Claims of Long Standing need Time for Audit.

AUDIT OFFICE, OTTAWA, January 2, 1907.

SIR,—In previous years we have experienced considerable difficulty in closing up the public accounts, from the fact that claims of long departmental standing have been forwarded to the Audit Office only within the last few days of the fiscal year, leaving no time for an efficient audit before votes would lapse.

In future, please consider the time-extension after March 31 to be applicable only to current services, accruing (say) during the fiscal year in question.

All claims of older origin might, I think, without inordinate departmental effort, be submitted to this office by March 31 at latest.

Claims which need a longer departmental examination than this will also probably need a longer audit, and should be carried over into the next fiscal year.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, January 4, 1907.

SIR,—I have your letter of January 2, concerning the settlement of claims of somewhat long standing which you desire to be effected and laid before you for audit at the time of the closing of the fiscal year.

I may say that I find as desirable as you do yourself to have a reasonable time for the audit of those payments, but you will understand that we cannot issue upon your office any applications, which call for your audit, until such time as the appropriations have been approved by parliament and placed at our disposal for expenditure.

As you are aware, as soon as the fiscal year begins, and for the past few years it has coincided almost with the closing of the session, there is a general rush in the departments for payment of accounts, many of which are awaiting a vote from parliament. All of those payments have to be examined and the preparations to lay them before you entail considerable labour, and it is not to be wondered that long outstanding claims are sometimes delayed to allow other matters capable of easier handling to have precedence. I may say, however, that the list of such claims in the department has been pretty well cleaned up during the past two or three years by the work of the Departmental Board of Arbitrations, and I know of only a few now which await final settlement after a vote shall have been obtained from parliament.

You may rest assured, however, that I will do my best to have them laid before you in sufficient time to permit of good audit, if circumstances and the sittings of the House somewhat favour me in that direction.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, March 25, 1907.

SIR,—Let me acknowledge receipt of your letter of January 4, in reply to mine of January 2, on the subject of the presentation of claims of long standing, in time to be audited with care before the close of the fiscal year.

Your letter goes on to say: 'You will understand that we cannot issue upon your office any applications which call for your audit, until such time as the appropriations have been approved by parliament, and placed at our disposal for expenditure.'

It is of course impossible for you to transfer claim accounts to this office under a formal application for payment, before the funds are available. It seems, however, feasible, to send all such papers to this office under an ordinary letter of enclosure, with the information that formal application will be made for payment as soon as funds are available.

In this manner a careful preliminary audit can be made, and all necessary additional information procured, before the rush of closing comes on. It is also possible that some unforeseen weakness may then develop in the claim, before payment is made.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, April 30, 1907.

SIR,—Respecting your letter of March 25, concerning the presentation of claims of long standing, possibly I did not explain myself clearly enough in reference to the time at which our applications can be issued on your office for payment of such claims. You suggest that it is advisable to send papers concerning such claims to your office with the information that formal applications will later be made when funds are available.

What I meant was that often enough when such claims have been passed by council and authorized to be paid in the estimates within such time as those estimates are prepared and passed by the House until they are so printed and passed, we have no information, neither formal or informal, that provision will be made for any such payment, and although we are made aware of this by the passing of the vote, we consider it would be useless to ask your office to perform work of auditing on an application which may possibly never be made if the item to cover the payment is not outlined by council and by parliament.

If, however, we are in future in a position to know that a vote has been passed by parliament some considerable time before our application can be made, we will have no objections to submit papers to you for preliminary examination and auditing.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, May 10, 1907.

SIR,—Let me acknowledge receipt of your letter of April 30, in further discussion of the subject of 'Claims of Long Standing.'

Our proposition of March 25 was, that while the department is waiting for formal orders in council or special votes, the correspondence concerning such claims should be transmitted to this office, so that they can be examined with deliberation on their inherent merits, leaving only the orders in council and vote-wordings to be reviewed in the closing moments of the fiscal year, when less time is available.

Your objection of April 30 is, that if the orders in council or special votes should fail to pass, then the audit office would have been put to unnecessary work in examining accounts which cannot be paid.

If you give us the choice between auditing some of the long-standing claims unnecessarily (as feared by your letter), and not being able to audit the rest of the claims at all (as has often been the case hitherto), we will run the risk of the superfluous work without hesitation.

Please therefore follow out the course suggested in the Auditor General's letter of March 25. If the new system has any serious defects, they will develop themselves in the working, and can be then remedied. They will however be less than the objections to auditing without time.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

Land Purchases : Reports on Sites.

AUDIT OFFICE, OTTAWA, May 2, 1907.

SIR,—Your recent applications for payments for land have been supported by a printed form headed 'Report on Site,' containing 13 questions, most of which ask for information required by this office.

Item 10 is not as full as it might be; it reads as follows: 'An extract from Registrar's book, showing price paid for property at previous sale.'

This question is a result of several letters written about 1903-4, of which two can be found at pages V—365 and V—366 of the Auditor General's Report for that year.

The request there is: 'I would like to have copies of recent entries of transfers of the property in the registry office books, if any.'

It will be seen that this is much more comprehensive than your item No. 10, which relates to the price only.

For future cases of land purchase, please have the printed form so amended as to elicit all particulars of the recent transfers.

Also, as the amounts paid are frequently large, it would be well for the local officer to make out and sign a duplicate report for the use of this office.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

Westville Public Building : Purchase of Site.

AUDIT OFFICE, OTTAWA, May 4, 1907.

SIR,—Let me acknowledge receipt of your application No. 695 for $2,000 in favour of the Acadia Coal Co., being purchase price of site for Westville public building.

The order in council of December 12, 1906, as furnished to this office, reads as follows: 'That authority be given to purchase certain property from the Acadia Coal Co. in Westville, N.S., for the sum of $2,000, as a site for the proposed public building at that place.'

No further details as to location and size are given in the extract from the valuator's report, which is attached to the application.

Please remedy this defect at an early date, so that the payment may be released before May 15. Also, a diagram would be acceptable.

It is preferable in all cases to have a full copy of the local officer's report, containing no asterisked lacuna.

The papers are returned herewith, for completion in the directions indicated.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

PUBLIC WORKS DEPT., OTTAWA, May 8, 1907.

SIR,—I have the honour, by direction, to acknowledge the receipt of your letter dated 4th instant, with reference to our application No. 695, covering purchase price of site for the Westville public building from Acadia Coal Company for $2,000. Inclosed is full copy of local officer's report, also copy of metes and bounds and blue print of site. These documents have been prepared in the office of the chief architect in reply to your inquiries for further information. It is hoped you may be able to now authorize payment on this application.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secy.*

St. John Office : Typewriter bought from Engineer.

AUDIT OFFICE, OTTAWA, March 28, 1907.

SIR,—Attention is hereby called to voucher P—17098, dated January 22, 1907, being a payment to engineer J. K. Scammell, of St. John, N.B., as follows—

Smith Premier No. 4 typewriter, No. 47057.. .. .. $120 00

Copy-holder for S. P. typewriter.. .. .. 2 50

Attached is a sub-voucher with the same details, from J. Alfred Clarke, general agent, St. John, N.B., dated April 27, 1903, and receipted September 2, 1903.

As Mr. Scammell has been in the government employment since July 1, 1899, it may be inferred that he bought this typewriter in 1903, and has used it in his office since then.

To justify fully the payment of prime cost for a four-years old machine, there should be a certificate that practically all of the work which it has done has been for the government.

Please obtain from Mr. Scammell some such certificate, or a rebate on account of any other work which may have gone through the typewriter, if enough to be worth calculating.

These remarks are called for by the principle, and not by the amount.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

DEPT. OF PUBLIC WORKS, ST. JOHN, N.B., April 10, 1907.

SIR,—With reference to the file No. 301658, in which the Auditor General refers to a payment to me of one hundred and twenty-two dollars and fifty cents ($122.50), for the Smith Premier typewriter, and asking that a certificate be obtained that practically all the work, done on this machine, has been for the government, I would say that, practically all of the work that has been done on this machine has been for the government, and that any other work, which may have gone through this typewriter, is not enough to be given any consideration.

I am, sir, your obedient servant,

J. K. SCAMMELL, *Asst. Engr., D.P.W.*

E. T. P. SHEWEN, Esq., Resdt. Engr., St. John, N.B.

Ottawa Archives : Metal Book Shelving.

AUDIT OFFICE, OTTAWA, August 15, 1907.

SIR,—Let me acknowledge receipt of your application No. 277 for $6,500, in favour of the Eclipse Manufacturing Company, on account of their 'accepted tender' of $17,478, for metal book shelving, galleries, &c., for the Dominion Archives building.

Please let me have information as to the manner in which competition was invited. Also, there should be an order in council in approval: this is not found on our records.

There are several instances in previous correspondence, where you have been requested to instruct the accountant that no applications should be sent by him to this office until completed in the directions just mentioned. Please have him so instructed anew.

We would also like to have a detailed statement of materials and values, to show how the chief architect reached the conclusion that $17,478 is a fair and just price.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

DEPT. OF PUBLIC WORKS, OTTAWA, August 22, 1907.

SIR,—In reply to your memo. of the 16th intant, inclosing a letter from the Auditor General with regard to application No. 277, for $6,500 in favour of the Eclipse Manufacturing Company, of Ottawa.

The work of fitting up the offices in the Archives building was one of pressing emergency, and the Eclipse Manufacturing Company was asked to tender; it being in the public interest that there be no delay in having those metal fittings made and installed in the offices so that such could be occupied at earliest possible date.

I inclose herewith a copy of detailed estimate for this work, which estimate was prepared in this office prior to the awarding of the work. This estimate amounts to $17,567, and is in excess of the accepted tender herewith.

I am, sir, your obedient servant,

D. EWART, *Chief Architect.*

The Deputy Minister of Public Works.

ESTIMATED COST OF METALLIC FITTINGS FOR DOCUMENT ROOM NO. 1, DOMINION ARCHIVES.

Ground floor: adjustable uprights, 1,925 feet at $2.25; adjustable shelves, 462 feet at $1; plain panels, 84 feet at $1; sunken panels, 291 feet at $1.75; 3½ cornice, 470 feet at $1.25	$ 5,974 00
Steel floor: flooring frame, 1,200 square feet at $2.50; ½-inch matting, 1,200 square feet at 25 cents; ceiling panels, 1,200 square feet at $1.75; pipe railing, 78 feet at $4; stairs complete, 2 at $175	6,062 00
Mezzanine floor: adjustable uprights, 1,738 feet at $2.25; adjustable shelves, 474 feet at $1; plain panels, 74 feet at $1; sunken panels, 270 feet at $1.75, 3½-inch cornice, 480 feet at $1.25	5,531 00
	$17,567 00

PUBLIC WORKS DEPT., OTTAWA, September 16, 1907.

SIR,—With reference to your letter of August 15, concerning a payment to the Eclipse Manufacturing Company, for metal work at the Dominion Archives building, I beg to send you herewith copy of a memorandum made to me by the chief architect as regards the manner in which the said company's tender was obtained. The chief architect's report is also accompanied by a detailed estimate of the probable cost of the materials and work to be supplied, said estimate being, as stated by the chief architect, somewhat in excess of the tender received.

I am preparing for the signature of the Minister, as soon as he returns, a recommendation to council, which should possibly have been made at the time the tender of the company was accepted by the then acting minister.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, September 18, 1907.

SIR,—Let me acknowledge receipt of your communication of September 16, with reference to the Eclipse Manufacturing Company's contract of $17,487 for metal shelving, &c., at the Archives building.

I note that the chief architect's report of August 22 took until September 16 to get through the departmental routine; and that the order in council, asked for in my letter of August 15, has not yet reached the 'recommendation' stage.

Please explain to the Eclipse Manufacturing Company that the Audit Office is not responsible for either of these delays.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

(NOTE by Audtor General, October 22, 1907: On receipt of the order in council October 17, this payment was released.)

Ottawa Mint : Electric Wiring.

AUDIT OFFICE, OTTAWA, May 2, 1907.

SIR,—Let me acknowledge receipt of your application No. 712, for $3,000 in favour of Ahearn & Soper, on account of electric wiring for lighting and motors at the Ottawa Mint.

Copies of two agreements are attached, for the following amounts and services:—

Wiring for electric lighting	$4,840 00
Wiring for motors	2,663 56

There should be the usual certificates that the Minister thought it advisable to dispense with advertising for tenders, and that the prices are fair and just.

Was there any obstacle to prevent the grouping of the two services into one tender, to be advertised in the newspapers?

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *For A.G.*

AUDIT OFFICE, OTTAWA, May 15, 1907.

SIR,—Let me call your attention to my letter of May 2, 1907, asking for further information in connection with the account of Ahearn & Soper for electric wiring for lighting and motors at the Ottawa Mint.

No answer has yet been received to the letter in question.

As the fiscal year 1906-7 closes to-day, I return herewith application No. 712 for $3,000. Please change it to the year 1907-8.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, May 21, 1907.

DEAR SIR,—With reference to your letter of May 2, and your further one of the 15th, concerning an account of Messrs. Ahearn & Soper for electric wiring for light and motors at the mint in this city, I beg to inform you that it was not found possible

by the department to combine the supply of both kinds of wiring so that they could be performed at the same time. Prices were asked at two different dates and were received as submitted to you.

There was some urgency in going on with the work of lighting first, in order that other work, which the department had in hand might be proceeded with, and this part of the work was undertaken in a hurry before the plans for the other work could be ready.

As regards the amount of each contract, you will kindly notice that they are both below the value of the sum named in the law, and that, consequently, the Minister was legally justified in awarding the contract to the firm of Messrs. Ahearn & Soper, the more so as the work required to be done by experienced men in whom the department could have perfect confidence, and this is the reason why the firm above named was selected for the performance of the work.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

Ottawa, Rented Buildings : Overpayments for Heating.

AUDIT OFFICE, OTTAWA, July 17, 1907.

SIR,—I beg to call your attention to voucher 'R' No. 2580, in favour of Jas. W. Woods, for $1,672.44. The voucher reads:—

Heating 'Canadian Building' from Jan. 1 to May 1, 1906, at 4-10ths of a cent per cubic foot per annum as per the following measurements:—Main building, west side, 619,545 cu. ft.; annex, 34,299 cu. ft.; two flats, east side, 172,430 cu. ft.; annex, 9,947 cu. ft.; total, 836,221 cu. ft. at 4-10ths of a cent, $3,344.88.

Less—Allowance for time unoccupied by the department during construction and making of alterations for the department, $1,672.44.

The calculations should be: 836,221 cu. ft., January 1-May 1, 4 months at 4-10ths of a cent per cu. ft. per annum, $1,114.96. Less allowance for time occupied, &c., $557.48. Difference ($1,672.44—$557.48) to be refunded, $1,114.96, being the error caused by charging for twelve months instead of four.

Please make a cheque in favour of the Receiver General for this amount and charge it against Mr. Woods' current account.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

(Note by Auditor General, October 8, 1907: No answer has yet been received to this letter).

AUDIT OFFICE, OTTAWA, July 18, 1907.

SIR,—On the 17th inst. a letter was written to you, requesting a refund of $1,114.96 from J. W. Woods for an overcharge in his account for heating the Canadian building, Jan. 1-May 1, 1906. Let me call your attention to a similar overcharge in his account, No. R. 1658, for heating 'Woods Building,' May 1, 1905-May 1, 1906.

The account reads as follows:—

Heating Woods Building—Inside measurements, 914,760 cu. ft., from May 1, 1905, to May 1, 1906, at ⅓c. per cu. ft.	3,659 00
LESS: portion of half building, 457,380 cu. ft., to Dec. 31, 1906, at ⅓c., being one-third of year when occupied by Woods, Ltd., $1,829.30	609 83
	$3,049 17

Referring to the Auditor General's Report, Vol. 3, 1905-6, page V—117, I find that this second portion was occupied by the government from January 1, 1906, under lease No. 5694.

The account should therefore read:—

Heating Woods Building, May 1, 1905, to May 1, 1906, &c.	$3,659 00
LESS : portion of half building, 457,380 cu. ft., to Dec. 31, 1905, at ⅓c., being two-thirds of year, when occupied by Woods, Ltd.	1,219 66
	$2,439 34

Deduction should be made for two-thirds of a year instead of one-third.

The amount to be refunded on cheque R. 1658 will therefore be $609.83.

Please make your cheque in favour of the Receiver General, which you are charging against Mr. Woods' current account, of amount $1,724.79 ($1,114.96+ $609.83) instead of $1,114.96, as requested in my letter of 17th instant.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

(Note by Auditor General, Oct 8, 1907 : No answer has yet been received to this letter.)

Rideau Hall : Electric-light Bulbs.

SIR,—Let me acknowledge receipt of your application No. 556 for $24.17 in favour of Benson & Co. for electric light supplies at Rideau Hall. The items are as follows:—

16-c.p. 105-volt. clear incandescent lamps, 100	17 24
Lamp holders, 24	5 84
Case and packing	1 09
	$24 17

Electric light bulbs, on account of their frequent renewal, are to be classed rather under 'operation' than under 'outfitting'; and they are therefore more properly payable from the vote for 'Rideau Hall: Fuel and light allowance.'

The application is returned herewith for amendment in the direction indicated.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

GOVERNOR GENERAL'S SECRETARY'S OFFICE, OTTAWA, May 1, 1907.

SIR,—I beg to inclose you herewith a letter received from the Department of Public Works, covering an account for electric light fittings which it is stated you consider properly chargeable against the vote for Rideau Hall 'fuel and light allowance.'

I think, however, that if you further consider the matter you will agree that these fittings being permanent fixtures are not chargeable to the vote referred to, which is intended to cover the cost of actual lighting.

I have the honour to be, sir, your obedient servant,

The Auditor General. C. J. JONES, *for the Gov. Genl's. Secretary.*

AUDIT OFFICE, OTTAWA, May 7, 1907.

SIR,—Let me acknowledge receipt of your letter of May 1, 1907, on the subject of Benson & Company's account for '100 16-C.P. 105 volt clear incandescent Robertson lamps, $17.24.'

Electric light fittings which are permanent, and not subject to frequent renewal, are chargeable to the Public Works votes for maintenance of buildings.

Fittings which wear out frequently as a result of use, such as electric light bulbs, are payable from the funds for lighting.

This is the line of division which has been drawn between the votes for lighting and maintaining Dominion buildings; and it would be well, it is thought, to adhere to the same division for Rideau Hall.

I am, sir, your obedient servant,

C. J. JONES, Esq., I.S.O., for Gov. Genl's Sec. FREDERICK HAYTER, *for A.G.*

(NOTE by Auditor General, October 8., 1907: This payment has not yet been made.

Dalhousie Wharf : Extra Work.

AUDIT OFFICE, OTTAWA, April 23, 1907.

SIR,—Let me acknowledge receipt of your application No. 688 for $6,230, in favour of J. B. McManus, Limited, on account of extra work at Dalhousie (N.B.,) wharf.

Reference is made to an order in council of July 17, 1906, which has not yet reached this office.

It would be well to send a diagram of the work, showing the parts covered by the original contract, and by the first and second extensions.

Without further information of this nature, it does not at present seem that full compliance has been had with that section of the Public Works Act which requires public competition.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

AUDIT OFFICE, OTTAWA, May 14, 1907.

SIR,—Your department has just sent me, under date of May 11, the order in council of July 17, 1906, concerning Dalhousie wharf, and a copy of the plan, both as requested on April 23.

The original contract of $42,000 (No. 5154) was for an isolated block, 304 by 35 feet. Estimate No. 5 for $40,236.10 is dated August 25, 1906, which marks the approximate date of completion. The final estimate of $42,000 is dated October 22, 1906.

The letter which accompanies application No. 688 of April 22, for $6,230 (now under consideration) is as follows:—'O. C., July 17, 1906, authorizes the department to enter into a contract with J. B. McManus, Ltd., for an extension to the work previously done by him at Dalhousie under contract No. 5154—the value being fixed by the O. C. at $6,230. The plans were afterwards enlarged to cover work to the value of $17,200, and a further O. C. has been applied for, authorizing the increased expenditure. In the meantime the contractor is proceeding with the work, and the present application is made for payment of as much money as is authorized by O. C., July 17.'

Estimate No. 1 to March 20, 1907, is for 163,310 cub. ft. of cribwork at 8·2 cents, or $13,391.42, being part of the new extra work.

Section 2 of the order in council of July 17, 1906 (referred to above), reads thus: 'The minister states that it is now found necessary in the interest of the work to build a block at the eastern end of the structure, to join the old and the new wharfs. The construction of this block is an imperative and an immediate necessity, and as such, properly comes under the classification of urgent work which, under the Public Works Act amendment of 1903, may be given out to contract without calling for public tenders.'

A reference to the Act in question (1903, chap. 52) gives the following wording:—'The minister shall invite tenders by public advertisement, for the execution of all works, except in cases of pressing emergency in which delay would be injurious to the public interest——'.

The 'pressing emergency' of this section has always been construed as 'pressing unforeseen emergency,' such as disaster from changed natural forces, unexpected development of traffic, &c. The word 'emergency' is not applicable to a work whose necessity must have been apparent when the isolated block specification was drawn up; it must have been known that a connecting wharf was indispensable between the old and new piers, and it might have been included in the contract.

Unless, therefore, some unforeseen disturbing cause is shown as described above, I am unable to accept this extra work as coming within the scope of the exceptions allowed by chapter 52 of the statutes of 1903.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

Extract of Order in Council, July 17, 1906.

Public Works.—On a memo. dated June 29, 1906, from the Minister of Public Works, submitting that a contract was awarded Messrs. J. B. McManus, Ltd., in August, 1904, for the construction of a wharf at Dalhousie, N.B., for the sum of $42,000. It is being duly carried out and the work is at present well advanced.

The Minister states that it is now found necessary, in the interest of the work, to build a block at the eastern end of the structure to join the old and the new wharfs. The construction of this block is imperative and an immediate necessity, and as such

properly comes under the classification of urgent work which, under the Public Works Act Amendment, 1903, may be given out to contract without calling for public tenders.

The Minister further states that the resident engineer of the Department of Public Works has made an estimate of the cost of the proposed work, and places the same at $6,230, calculated as follows:—

Cribwork, 65,000 cub. ft. at 8·2 cts	$5,330
Covering spans and levelling old wharf, 15,000 ft. B.M., at $20.	300
Stringers and cap, 24,000 ft. B.M., at $25	600
	$6,230

He is of the opinion that it would be more advantageous for the Department of Public Works to have the work performed by the present contractor, Mr. J. B. McManus, than by an outside contractor, as in the latter case there would no doubt be interference and friction between the two in the execution of their respective contract to the possible detriment to the work itself.

The Minister recommends that the construction of the block at Dalhousie, N.B., be entrusted to Messrs. J. B. McManus, Ltd., for a sum not to exceed the amount of the resident engineer's estimate, $6,230, the said work to be an addition to the existing contract for the construction of the new wharf mentioned above, the expenditure to be defrayed out of the item of $11,500 for the further harbour improvements at Dalhousie, N.B., included in the supplementary estimates for 1906-7, now before parliament.

The committee submit the same for approval.

F. K. BENNETTS, *Asst. C.P.C.*

Extract of Order in Council, May 9, 1907.

Public Works.—On a memo. dated May 7, 1907, from the acting Minister of Public Works, stating that in the month of August, 1904, a contract was awarded to J. B. McManus, Ltd., for the construction of a wharf at Dalhousie, N.B., for the sum of $42,000, this work having been completed in the course of the year 1906. On July 17, 1906, it was found necessary in the interest of the work to build a block at the eastern end of the structure to join the old and the new wharfs, and as this work was considered to be one of great urgency, it was undertaken by the contractors for the main work, Messrs. McManus, Ltd., without public tenders being called for.

Subsequently, Mr. Resident Engineer Geoffrey Stead, under whose supervision these works were being carried on, reported to the Department of Public Works as follows:—

'The objection is raised that this block reduces the frontage of the old wharf without providing a new berth, and a request has been made for a work to fill the angle between the old and new wharfs and continue the outer face of the latter as far as the old wharf.

'This would provide (1) a straight frontage of about 545 feet in all for a deep water wharf; (2) space for additional railway sidings, and would allow of a reduction in the curvature of the present siding which is very sharp—a 25° curve; (3) additional space for teams and freight. It would thus considerably improve the facilities for shipping.'

The Minister states that in view of the above and to provide the additional proposed connection between the old and the new wharfs, parliament voted at its last

session a further amount of $11,000, which amount with the sum of $6,200 already voted, would cover the cost of the now proposed extension, made out in detail as follows:—

175,000 cu. ft. cribwork at 8·2 cents per cu. ft. (same rate as in former contract authorized by order in council of July 17, 1906)	$14,350
190 piles at $7, driven	1,330
Covering 32,000 F.B.M. at $20 per M	640
Stringers of span and to level old work, 23,000 F.B.M. at $25	575
Round timber to level old work, 1,400 lin. ft. at 10c	140
Removing old cap covering and mooring posts and replacing any damaged timbers in old work	165
Total	$17,200

And that the chief engineer of the Department of Public Works reports these prices are fair and reasonable.

The minister, in view of the foregoing, recommends that authority be given to enter into a contract with J. B. McManus, Ltd., for the additional extension of the block authorized by order in council of July 17, 1906, to connect the old and new wharfs at Dalhousie, N.B., the additional cost of $11,000 to be covered by the vote of a similar amount included in the estimates of last session.

The committee advise that the requisite authority be granted.

R. BOUDREAU, *C.P.C.*

Richibucto : Damages by Storm.

AUDIT OFFICE, OTTAWA, May 27, 1907.

SIR,—Let me acknowledge receipt of your application No. 71, for $2,226.40 in favour of Mr. John Jardine, contractor for north pier at Richibucto: being for 'losses in connection with his contract, owing to deterioration of material.'

Under the specification, Mr. Jardine was to use some brush which had previously been obtained by the department, and which was damaged by drying for some 18 months.

The first mattress went to pieces in a storm, whereupon the resident engineer condemned all the government brush; but the contractor made up a second mattress out of the condemned brush at his own risk. This mattress also separated.

The claim is made up of $1,064.80 for the first mattress, which appears to be a fair liability, and $1,161.60 for the second mattress, which is on a different footing, as the contractor took all the risk.

Any payment of this kind should, I think, be submitted to the Governor in Council. Papers returned herewith for that purpose.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

1—19½v

DEPT. OF PUBLIC WORKS, OTTAWA, August 10, 1907.

SIR,—With reference to your letter of May 27, concerning our application No. 71, in favour of Mr. John Jardine, I may say that I have directed the accountant to withdraw the application in question and divide it in two; one application being for $1,064.80 to be issued at once as the amount appears to be accepted by you as fairly due.

As regards the other part of the original application, the matter will have to be deferred until the return to Ottawa of the chief engineer who is at present absent.

I am, sir, your obedient servant,

A. GOBEIL, *D.M.*

The Auditor General.

(Note by the Auditor General, October 8, 1907: The $1,161.60 has not yet been paid.)

Montreal High Level Pier : Poupore & Malone.

AUDIT OFFICE, OTTAWA, August 10, 1907.

SIR,—Let me acknowledge receipt yesterday of your application No. 257 for $106,803.21 in favour of Poupore & Malone, being balance of final estimate for work on 'high level pier at Montreal harbour, lower division.'

The final estimate contains an award of $147,279.80 by the 'Departmental Board of Arbitrators,' for which sum an order in council should be obtained, if this has not already been done.

At page 2 of the award it is said: 'The resident engineer took no special measurement, during the execution of the work, of the different classes of materials which 'entered into it, nor of the amount of dredging or back-filling which was being performed by the contractor; his reason for not doing so, as stated by himself in his 'evidence, being that as the contract was for a bulk sum, his sole duty was to see that 'proper materials were used, the workmanship properly performed, and the whole of 'the work completed strictly in accordance with the plans and specifications.'

It may be inferred from this, that neither the engineer nor the contractors regarded these works as extras, at the time of their performance; and the contractors have lost their claim to payment, by not notifying the engineer from month to month that he had omitted these items from the estimates.

In Exhibit 4 of the contractors' statement occurs an error in reasoning. After calculating the probable cost of a cancelled work (the ice protection wall) at $14,789, they take 15 per cent off from this (for contractors' profits), reducing it to $12,570.65, to arrive at an amount which should be subtracted from the lump sum total of $631,031.33. Since they earned profits on the 'increased height of pier' which was substituted for this protection wall, the wall should have been subtracted at $14,789 instead of at $12,570.05—a difference of $2,218.35.

Another flaw in calculation is the taking of 15 per cent on 14,789, leaving $12,570.65 as the remaining 85 per cent. $14.789 should have been treated as 115 per cent, giving $12,860 as 100 per cent—a difference of $289.35.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

Extract from Order in Council of August 31, 1907.

On a memorandum, dated August 24, 1907, from the Acting Minister of Public Works, submitting that the contract entered into by Messrs. Poupore & Malone on July 25, 1900, for the construction of a high level pier in the lower section of the harbour of Montreal, at Maisonneuve, has just been completed, and that the final estimate, comprising all the works performed, has been rendered by the chief engineer amounting in the total to $921,793.21, upon which there is a balance to be paid amounting to $106,803.21.

That the final estimate in question covers the bulk sum of the contract as originally entered into as well as the additional works which were performed in the course of its execution, and that the value of part of said additional work has been arrived at upon a report of the Board of Departmental Arbitration and Awards, which board, under instructions of the Minister of Public Works, examined into the matter, made an investigation under oath and presented to the Minister a report.

That the vote granted by parliament at its last session for work in the lower division of the port of Montreal under contract to Poupore & Malone is more than sufficient to cover the balance due on said final estimate, and that although the item was passed without discussion at the time, still, had it been discussed, the explanation above referred to in reference to the arbitration held upon the additional work performed, would have been given, as is shown by the extract of the notes which were in the hands of the Minister during the discussion of the estimates.

That as regards the contention made by the Auditor General that the contractors have lost their claim to payment by not notifying the engineer from month to month that he had omitted the items for extra work out of his progress estimates, it may be stated that the contractors, on many occasions, urged the consideration of those claims, and that upon January 7, 1905, the then acting Minister informed the contractors that as the contract was nearing completion he proposed giving every possible consideration to the claims set forth when the final estimate for the work would be before the department.

That it was in pursuance of this decision given to the contractors that the matter was looked into before the issue of the final estimate, and that the amount awarded was so included in the final estimate rendered.

The Minister recommends that authority be given to pay the balance due on the final estimate as rendered by the Department of Public Works.

The committee submit the same for approval.

RODOLPHE BOUDREAU, *C.P.C.*

(Note by Auditor General, October 8, 1907: $104,584.86 was paid on the receipt of this order in council; and $2,218.35 was withheld as explained in the second last paragraph of the preceding letter. This sum of $2,218.35 has not yet been paid.)

Quebec Harbours : Materials not Used when Purchased.

AUDIT OFFICE, OTTAWA, March 21, 1907.

SIR,—Attention is hereby called to voucher B-11998 for $28 in favour of the Quebec Harbour Commissioners for 'storing 50 barrels oil from October 1, 1905, to December 31, 1906: 14 mos. at 2 per month, $28.'

Please give further information to enable this '50 barrels oil' to be traced up in the auditor's report for the year in which it was purchased. When was it bought, and to what vote was it charged?

As bearing directly on the rate charged for storage, it would be well to describe the nature of the shelter provided.

Also, there should be an explanation of the reasons for purchasing such a large supply so many months ahead of its consumption. When is it expected to be used? And does it run no risk of deterioration or leakage?

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

District Engineer's Office, Quebec, May 21, 1907.

Sir,—I beg to acknowledge the receipt of your letter No. 1512 with the inclosed file No. 301754, being a letter from the Auditor General, referring to a voucher for $28 in favour of the Quebec Harbour Commissioners for storing 50 barrels of oil from October 1, 1905, to December 31, 1906, and requesting further information.

These barrels contain carbolineum avenarius for the preservation of wood and were bought by the department from Mr. J. W. Maguire in October, 1905. It must have been charged to the vote harbours, Quebec.

They were stored in one of the storage sheds of the Quebec Harbour Commission, and the rate charged is the regular rate charged to everybody by the commission. Part of these barrels was used since January last for the dredging plant of the department, and the balance will be used during the season at St. Laurent, I.O. I have examined them this morning, they are in perfect order, and they do not run any risk of deterioration or leakage.

I have the honour to be, sir, your obedient servant,

The Chief Engineer, Ottawa, Ont. ALBERT DECARY, *Dis. Eng.*

River Godefroye : Overcasting.

(Following the discussion on page V—377 and V—378 of the A.G. Report of 1905-6.)

Public Works Dept., Ottawa, April 30, 1907.

Sir,—I beg to refer to your letters of August 10 and 31, concerning dredging performed by Mr. Antoine St. Pierre, at Rivière Godefroye.

In this connection I desire to again send you a letter of explanation written by Mr. Michaud, the engineer, which was sent to you as an explanatory reply to yours of August 10. According to that letter, it is plain that the department was, when awarding that contract, contemplating the fact that the depth of water would not permit of the necessary dredging being done immediately, and that it would be necessary to cast over the material of the first cut. This is shown by Mr. Godwin's letter to Mr. Michaud when the latter was informed that 75 per cent of the price for dredging would be paid for the casting over.

I need not repeat here that the condition of things was well known to the department, and that it could not be possible that the department would expect to have the two works done for the price of one. There appears to have existed a regular agreement on behalf of the department that both works, that is to say, the casting over and the

actual dredging, were to be paid for, and the said payment was fully contemplated, as shown by Mr. Godwin's letter to Mr. Michaud.

As regards the last paragraph of your letter of August 10, I may say that the two items of work which you add together, in order to bring them over the sum of $5,000, were absolutely separate, instructions being given at different times and being so that they should be and must be considered as separate undertakings.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, May 8, 1907.

SIR,—Let me acknowledge receipt of your letter of April 30, 1907, on the subject of dredging at River Godefroye, in answer to Mr. Fraser's letter of August 31, 1906, on the same subject.

It is to be wished that you could have replied at an earlier date.

Please send over the whole docket of record in this matter. It will include among other things, Mr. Michaud's letter of December 1, 1905, and the two specifications given to the contractor for the two separate works which we have erroneously added together.

The specifications will make clear the natural boundaries between the scopes of the two contracts, and the postponement of the second when the first was awarded.

If the 'invitation to the contractor' mentions the necessity for overcasting, there should be an explanation as to omitting a price for it.

But if the 'invitation' is silent on this point, and merely specifies 'dredging,' our previous objection holds good, that the contractor should know his locality, and takes the risk of his ignorance.

The discussion will be taken up again immediately on receipt of the correspondence now asked for: and it may be possible to dispose of it conclusively before May 15.

We have found some difficulty in verifying the calculation of the 10,880 yards. Please send information on this point.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

AUDIT OFFICE, OTTAWA, May 15, 1907.

SIR,—Let me call your attention to my letter of May 8, 1907, on the subject of overcasting by Antoine St. Pierre at River Godfroye.

No answer has yet been received to the letter in question.

As the fiscal year 1906-7 closes to-day, your application No. 32½ of that year will lapse; and it is returned herewith.

If you wish to maintain the claim, please send a new application dated 1907-8.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

(NOTE by Auditor General, October 8, 1907: This payment has not yet been made.)

Sorel, Deep Water Wharf : McAuliffe, Poupore, Malone & Weddell.

(Following the discussion on pages V—379 to V—381 of the Auditor General's Report of 1905-6.

AUDIT OFFICE, OTTAWA, January 2, 1907.

SIR,—Let me refer you to the correspondence shown at pages V—378 to V—380 of my Report for 1905-6, concerning the claim of McAuliffe, Poupore, Malone & Weddell, for $25,000, on account of a bill of $34,554.50 extras in addition to their contract at Sorel deep water wharf.

On December 1, 1906, I asked whether you had referred this matter to the Department of Justice.

Please inform me at an early date, as to what advance has been made in the direction indicated.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

DEPT. OF PUBLIC WORKS, OTTAWA, January 23, 1907.

SIR,—I beg to acknowledge the receipt of your letter of the 2nd instant respecting the claim of Messrs. McAuliffe, Poupore, Malone & Weddell for $25,000 on account of a bill of $34,554.50, extras in addition to their contract at the Sorel deep water wharf. I beg to inclose to you herewith a communication which I received from the Department of Justice on the subject which speaks for itself.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secretary.*

DEPT. OF JUSTICE, OTTAWA, December 27, 1906.

SIR,—Referring to your letter of the 10th instant, with regard to the claim of Messrs. Poupore, Weddell & McAuliffe in connection with works at Sorel, P.Q., I find that these papers are before the Minister of Justice, who has been considering them specially, and has had several interviews with Mr. Hyman upon the subject. In the absence of the Minister of Public Works, the Minister of Justice does not feel prepared to dispose of the matter, so that I am afraid that it will have to stand over for the present.

Yours very truly,

The Deputy Minister of Public Works. E. L. NEWCOMBE, *D.M.J.*

(NOTE by Auditor General, October 8, 1907: Nothing has yet been paid on this claim.)

Beaverton, Dredging : Brown & Aylmer.

AUDIT OFFICE, OTTAWA, May 4, 1907.

SIR,—Let me acknowledge receipt of your application No. 628 for $3,794.50 in favour of Brown & Aylmer, for dredging at Beaverton between October 1 and November 20, 1906.

The details of the calculation are as follows:—

Dredging (scow-measurement): 12,082 yards at 25c...	$3,020 50
Dredging and casting-over for wharf purposes: 3,096 yards at 25c...	774 00

The usual sheets are attached, showing the manner of arriving at the total of 12,082 yards of material dredged and scowed away; but no calculation is given for the 3,096 yards cast over.

Please send a copy of the written agreement with Messrs. Brown & Aylmer, showing that casting-over was contracted for at the same rate as excavation to be towed to a distance.

We would like to receive this information at an early date, to enable the application to be released before May 15. Papers returned.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

DEPT. OF PUBLIC WORKS, OTTAWA, May 14, 1907.

SIR,—Replying to your letter dated 4th instant to the Deputy Minister of Public Works, with reference to our application No. 628 for $3,794.50 in favour of Brown & Aylmer, for dredging at Beaverton between October 1 and November 20, 1906, I have the honour to state, in answer to your request for a copy of the written agreement *re* price at which casting-over was contracted for, that the chief engineer informs us that there was a verbal but no written agreement as to this casting-over. I return herewith the application bearing date April 5 and the papers accompanying it.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secretary.*

AUDIT OFFICE, OTTAWA, May 15, 1907.

SIR,—Let me acknowledge receipt of your letter of yesterday's date, on the subject of the claim of Brown & Aylmer for $774, for 'dredging and casting-over for wharf purposes, 3,096 yards at 25c,' in connection with their contract at Beaverton.

Your letter says: 'The chief engineer informs us that there was a verbal but no 'written agreement as to this casting-over.'

In the absence of any satisfactory reason for doing such important business orally instead of by written agreement, I cannot take the responsibility of passing the item, and the application is returned herewith.

If it is sanctioned by a special order in council, and if a definite understanding is arrived at that no more 'verbal' agreements are to be made, it will be possible to make the payment out of 1907-8 funds.

In other cases, 'casting-over' is allowed at three-quarters of dredging-rates.

I am, sir, your obedient servant,

The Department of Public Works. J. FRASER, *A.G.*

ENGINEER'S OFFICE, TORONTO, July 26, 1907.

SIR,—I have the honour to acknowledge the receipt of your letter of the 23rd inst., inclosing copies of letters from the Auditor General with reference to some dredging done at Beaverton by Messrs. Brown & Aylmer, with the request that I give you the information asked for by the Auditor General.

In reply, I would say, that the work at this place was transferred from Mr. Lamb to me on May 29, 1906. Previous to this, an agreement, dated May 25, 1906, was entered into between Messrs. Brown & Aylmer and the department, to perform the necessary dredging. (A copy of which is inclosed herewith.) A copy of this agreement was also forwarded to the chief engineer, dated June 1, 1906.

You will notice that the agreement provides that contractors are to be paid the same price, viz:—25c. per cubic yard for scow and place measurement; the latter means the overcasting, if ordered.

The 3,096 cubic yards at 25c. per yard, mentioned in the Auditor General's letter on May 15 last, was overcasting from the turning basin on the banks of the harbour for use as necessary filling at the rear of the proposed sheet piling to be driven to from a landing. A portion of this quantity was measured after being deposited on the bank, and is accounted for on the dredging returns for weeks ending November 17 and 24 last, and amounts to 1,616 cubic yards; the remaining 1,480 cubic yards were measured in place in the cut in the turning basin, and were afterwards overcast and levelled.

Trusting this information is what you desire,

I am, sir, your obedient servant,

The Deputy Minister Public Works. J. G. SING, *Engineer in charge.*

AUDIT OFFICE, OTTAWA, August 12, 1907.

SIR,—Let me acknowledge receipt of your letter of July 31, inclosing a report from Engineer Sing, dated July 26, on the subject of dredging at Beaverton by Messrs. Brown & Aylmer.

Mr. Sing begins by referring to a departmental letter, dated July 23, inclosing 'copies of letters from the Auditor General.' As my two letters were dated May 4 and May 15 respectively, there should be an explanation of the reasons for holding them in your department for two months and a half, before asking the resident engineer for a report.

To understand Mr. Sing's description of the circumstances, we will need to be supplied with the vouchers and dredging-returns, which were sent back to you on May 15; also with a diagram or plan of the harbour.

With reference to the whole arrangement being oral instead of written, my letter of May 15 went on to say: 'In the absence of any satisfactory reason for doing such 'important business orally instead of by written agreement, I cannot take the re-'sponsibility of passing the item, and the application is returned herewith. If it is 'sanctioned by a special order in council, and if a definite understanding is arrived at 'that no more *verbal* agreements are to be made, it will be possible to make the payment 'out of 1907-8 funds.'

The discussion does not appear to have been advanced by your department along the lines just indicated. Please take the necessary steps.

The agreement of May 25, 1907, now forwarded, will be accepted for work done after its own date.

I am, sir, your obedient servant,

The Department of Public Works. J. FRASER, *A.G.*

(Note by Auditor General, October 8, 1907: No answer has yet been received to this letter).

Kaministiquia River : Whalen & Bowman.

Audit Office, Ottawa, July 18, 1907.

Sir,—Let me call your attention to account B. 680 for $810, in favour of Whalen & Bowman, being for dredging in the Kaministiquia river, November 2 and 3, 1903, 27 hours, at $30.

The cheque for payment of this account has been endorsed as follows:—

'Whalen and Bowman,
Great Lakes Dredging Company,
Per Jas. Whalen.'

On reference to the Auditor General's Report, Vol. 1903-4, pages V—58 and V—59, it will be found that of the three firms dredging in River Kaministiquia, two, A. F. Bowman and the Great Lakes Dredging Company, were paid from fifteen to twenty-five cents per cu. yd., the third, N. McDonald, was paid at the rate of eight dollars per hour. At Port Arthur (V—58), C. S. Boone dredged by the hour, and was paid at the rates of $10 and $12 per hour. There is no mention of other work done, at this place by a dredging company of the name 'Whalen and Bowman.' However, compared with the rates paid to Mr. McDonald and Mr. Boone, an explanation of the $30 rate is desirable.

Please furnish me with a copy of the engineer's orders authorizing the work, and the rate to be paid for it, and also with the name of the dredge employed on these two days. Why has the account been so long delayed?

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

(Note by Auditor General, October 8, 1907: No answer has yet been received to this letter, and the payment has not been made).

Little Current and Collingwood : C. S. Boone.

Audit Office, Ottawa. May 3, 1907.

Sir,—Let me acknowledge receipt of applications Nos. 647 and 648 in favour of Mr. C. S. Boone, for dredging in 1906 as follows:—

Details of Calculations.

Little Current, Ont.: August 1 to November 15, 1906—
Dredging and removing rock *in situ* from ship channel: scow measurement, 60,026 yards, equivalent to 40,017⅓ yards rock *in situ*, at $2.60; total, $104,045.06; less $9,500 previously paid; difference, present estimate $94,545 06
Collingwood, Ont., August 1 to November 3, 1906—
Dredging in harbour: rock, 10,371 yards at $2.30; hardpan, 890 yards at $1.40; clay, sand, gravel, boulders, 11,710 yards at 34 cents; mud, 2,949 yards at 35 cents; total, $30,112.85; less $949.24 paid to Jos. Battle.... 29,163 61

Contracts of 1905 were extended to 1906.

The two estimates, Nos. 647 and 648, together with those previously paid to Mr. Boone, make the following totals of dredging during the season of 1906:—

Little Current: Channel..... $166,648 78
Collingwood: Harbour..... 73,590 23

This dredging in 1906 was done without any new call for tenders—the prices tendered for the season of 1905 having been extended to 1906 in each case.

In view of the magnitude of the work actually performed in 1906, does it not now appear to you that it would have been advisable to call for new tenders, in accordance with the general practice outlined in the Public Works Act?

Some Emergencies might have been foreseen.

Several cases came up during the season of 1906, where no public competition was invited, but where a price for 1906 dredging was agreed upon between some official of your department and the contractor who had been dredging at the same place in the season of 1905.

In each of these instances the application for payment was accompanied by a typewritten slip-form, stating that 'as the case was one of pressing emergency, in which delay would have been injurious to the public interest, the minister directed that the work should be executed without a call for tenders.'

It would generally be feasible for the engineering staff of one season to calculate what work remains to be done for the next year; and for the department to arrange its future policy in the early part of the winter. There would then be ample time to allow for public advertisement and tender, before dredging becomes possible in April or May.

Fiscal Year now begins Three Months Earlier.

Whatever difficulties have been caused in the past, by the late dates at which the votes of parliament were determined, will disappear under the new arrangement by which the fiscal year begins on April 1.

The money will now be voted several weeks or months before the opening of navigation; and there will always be sufficient time to invite tenders and award contracts, with the deliberation which is essential to such an important subject.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

AUDIT OFFICE, OTTAWA, July 16, 1907.

SIR,—Let me acknowledge receipt of your application No. 194, for $4,777.93 in favour of Mr. C. S. Boone, for dredging at Little Current between May 21 and 25, 1907, as follows:—

'Dredging and removing rock in *situ* from ship channel at Little Current, from May 21 to 25, 1907: Scow measurement, 2,756½ yards, equivalent to 1,837⅔ yards rock *in situ*, at $2.60, total, $4,777.93.'

Please describe any steps which were taken to obtain competition before awarding the work of 1907 to Mr. Boone at the same price as that paid for the seasons of 1905 and 1906. How much dredging is contemplated at Little Current for 1907?

You will find among your departmental correspondence a letter from this office, dated May 3, 1907, pointing out that $166,648.78 was paid to Mr. C. S. Boone for work in 1906, at the rate fixed by the 1905 contract, without a new call for tenders; and asking whether it did not appear to you at the end of the season, in view of the magnitude of that sum, that it would have been advisable to call for new tenders. No answer has yet been received to the letter in question. Please discuss it.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

CHIEF ENGINEER'S OFFICE, OTTAWA, August 19, 1907.

SIR,—I have the honour to give the following information in regard to the dredging at Little Current, as per request of the Auditor General, in a letter dated July 16, 1907, which is herewith returned to you.

1st. The application for payment for removal of rock *in situ* from May 21 to 25, 1907, as mentioned in the first paragraph of the letter referred to, is made within the terms of the contract which according to the time limit set, expired on May 25, 1907.

2nd. After May 25, as the work contemplated under this contract, viz., the blasting and dredging of a channel 300 feet wide by about 1,500 feet long, had not been completed, the contract was continued, this amounting simply to an extension of time for the completion of the work, as is frequently done for contractors on construction work.

It would have been unwise for the department to have delayed the work in its condition, by calling for new tenders, as the drilling this season commenced on the first of April, and there would have been a large quantity of rock loosened, ready to move, for which there would have been difficulty in arranging for payment had another contractor been awarded the balance of the work after May 25.

I am quite satisfied that the department could not have secured better terms than those on Mr. Boone's contract.

Had any delay been caused this spring, in the way of calling for tenders or otherwise, it would have been impossible for the contractor to complete the easterly portion of the channel, which is now nearing completion, and will, in a short time, be available for passage of vessels, and thus provide a new waterway which can be used during the time occupied in improving the existing channel and thereby cause no interruption to traffic.

Approximately at the beginning of the season 87,000 cubic yards of rock *in situ* remained to be removed to complete the contract.

It was absolutely necessary, in my opinion, that the contractor be allowed to proceed with the work of dredging this summer without interruption, as he had been re-

moving the rock that was blasted last fall and early this spring, and for that class of work Mr. Boone has one of the most, if not the most complete plant in the employ of the department. Then, also, the fact of the plant being on the ground enhanced the possibility of early completion of the work compared to what would have been done had any delay been caused by suspension of operations for any cause.

Mr. Boone added to his fleet last season a new and powerful steel drill boat operating three steam drills, and there are so few efficient plants with the equipment necessary to perform this kind of work, that I am quite justified in the statement already made that no better terms could have been secured by the re-letting of this work.

Another very important fact in connection with the prosecution of this work is the constant delay which the contractor has been subjected to, by the towing of immense rafts of logs through the channel, which of course, is unavoidable, and entitles the contractor to an extension of time.

As the matters stand, it has been ascertained that a sufficient amount of drilling has been performed to keep two dredges employed for 7 or 8 months in removing the material blasted, in fact the chief part of the drilling for the whole work at this place has been done.

I must say that the conditions at Little Current have been investigated very carefully, and I hope that the facts stated will satisfy the Auditor General in regard to all inquiries made by his letter of the 16th ultimo. I am convinced that it would not have been in the public interest to have called for new tenders in this case.

I am, sir, your obedient servant,

The Deputy Minister Public Works Dept. A. ST. LAURENT *Asst. Chief Eng.*

Owen Sound, C.P.R. Slip : C. S. Boone.

(Following the discussion on pages V—385 to V—387 of A.G. Report of 1905-6).

AUDIT OFFICE, OTTAWA, January 2, 1907.

SIR,—Let me call your attention to my letter of August 30, 1906, on the subject of Mr. A. F. Bowman's claim for $603.45 extra pay, for increased difficulty in dredging at the Canadian Pacific Railway slip, Owen Sound.

The letter referred to, and the previous correspondence, will be found at pages V—385 to V—387 of the Auditor General's Report for 1905-6.

My last question was: 'Have you had an opinion from the Justice Department on the subject?'

An early answer to this question would greatly oblige.

If such a legal opinion has been obtained, please let me have a copy of it.

I am, sir, your obedient servant,

The Deputy Minister of Public Works J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, May 15, 1907.

SIR,—Let me call your attention to my letter of August 30, 1906 (shown on pages V—386 and V—387 of the Report of 1905-6), concerning the claim of A. F. Bowman

for $603.45, for extra allowance on dredging in Canadian Pacific Railway slip at Owen Sound. We held the claim to be invalid.

The letter in question ended as follows: 'Have you had an opinion from the Justice Department on the subject?'

No answer has been received to this. As the fiscal year 1906-7 ends to-day, the application is returned herewith. If our liability is finally established, the payment can be made from the Owen Sound vote of 1907-8.

I notice an item in the last Supply Bill, which reads as follows: 'Owen Sound: Balance due Contractor A. F. Bowman, for dredging in November and December, 1905, according to special agreement, $603.45.' This vote is, however, not yet available, as it has not been proved that the money is due. Mr. Bowman having agreed to do the work for 14 cents a yard, the chief engineer had no power to make an agreement for 17 cents.

I am, sir, your obedient servant,

The Deputy Minister of Public Works J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, July 23, 1907.

DEAR SIR,—With reference to your letters of January 2 and May 15 last, concerning an application for a payment to Mr. A. F. Bowman of the sum of $603.45, for dredging at the Canadian Pacific Railway slip at Owen Sound, I beg to send herewith copy of my letter to Mr. Sing, the resident engineer as well as Mr. Sing's reply to me, together with a sketch indicating in red the part of the harbour which the contract for 14 cents covered, as well as, in blue, the part for which the bargain was made at 17 cents per yard.

I trust that the information, although somewhat delayed, will be found satisfactory, and that when a new application is made you will see your way to pass it.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

PUBLIC WORKS DEPT., OTTAWA, January 4, 1907.

DEAR MR. SING,—I am having some difficulty with the Auditor General with reference to the payment of $603.45 which was recommended in favour of Mr. A. F. Bowman for dredging at the Canadian Pacific Railway slip in the harbour of Owen Sound.

A certain agreement was made by Mr. Bowman to do work in the harbour at such places as would be shown by the chief engineer at 14 cents a yard, while on October 27, 1905, you received instructions from the chief engineer to make an agreement for dredging in the Canadian Pacific Railway slip, such agreement being made by you at 17 cents per yard.

The Auditor General claims that the contract entered into for 14 cents a yard covers all and any part of the harbour, and that consequently there is no authority nor reason to pay any more than 14 cents, the contractors taking their risk of making money where work is easy and less money where the same is more difficult.

I would like to have from you a sketch showing us in red where the 14 cents dredging was done, and showing in blue, let us say, where the 17 cent work was performed.

You might also give me some details for the edification of the Auditor General showing on account of what difficulty you could not persuade the Messrs. Bowman to do for 14 cents that which they agreed to do for 17 cents. It is evident that the 17-cent dredging was posterior to the other. It must also be evident that the contractors could not be compelled under their first contract to dredge the Canadian Pacific Railway slip for the price of their contract, because if such had been the case you could not have agreed to give them 17 cents.

Any details or information which will contribute to clear up this matter will be thankfully received by me.

Yours very truly,

J. G. Sing, Esq., Toronto. A. GOBEIL, *D.M.P.W.*

Engineer's Office, Toronto, January 8, 1907.

Dear Mr. Gobeil,—I beg respectfully to acknowledge the receipt of your letter, dated the 4th instant, referring to the payment of $603.45, which has been recommended. in favour of Mr. A. F. Bowman for dredging in the Canadian Pacific Railway slip at Owen Sound, and you ask me to send you a sketch-plan showing, in red, where the 14-cent dredging was done, and in blue where the 17-cent dredging was performed, and also to give any detailed information I may be in possession of to make the question clear to the Auditor General.

In reply, I beg to inclose herewith plan showing the dredging performed, that tinted red being in the harbour proper at 14 cents per yard, and that tinted blue being in the Canadian Pacific Railway slip at 17 cents per yard, by Mr. A. F. Bowman, and I also present the following remarks in the way of explanation:—

On October 27, 1905, the chief engineer wrote me as follows:—'You are hereby authorized to enter into an agreement with Bowman Bros. to perform the dredging required in the Canadian Pacific Railway slip, in the harbour of Owen Sound, at a cost not to exceed $3,500, in accordance with your report of the 26th inst.'

The foregoing instructions were duly complied with and I was successful in making an agreement, in writing, with Mr. Bowman to do the work at 17 cents per yard, which was 3 cents below the estimated cost. The reason the contractor was allowed 17 cents for the dredging in the slip for the Canadian Pacific Railway Company, instead of 14 cents per yard, which was the price for the dredging he was under contract to perform in the harbour proper, requires only a short explanation.

In the first place, the season was well advanced, and this was a special work and was urgently required in order that the Canadian Pacific Railway vessels might unload steel rails at their slip, and the contractor was called upon to expedite the work in every possible way. Secondly, the contractor well knew that he could not expect to work continuously on account of the various vessels entering and leaving the slip, thereby causing him to move and thus lose time. Thirdly, he was uncertain as to the character of the material in the slip, as no borings or tests had been made such as had been taken in the harbour proper. Consequently, he asked 20 cents per yard and positively refused to do the work for less than 17 cents per cubic yard.

The slip is the property of the Canadian Pacific Railway Company, as are also the wharfs on either side thereof, and before I would allow Mr. Bowman to proceed with the dredging, I had a letter from the superintendent of the Canadian Pacific Railway relieving the department of all liability for any damage that might occur to wharfs by dredging. I also insisted upon the company sending their own engineer to give instructions as to how close the dredging should approach the wharfs.

The work was well performed by the contractor in a reasonable time, for the sum of $3,419.55 which was some $80.45 less than the estimated cost. 20,115 cubic yards were removed.

I have a letter from general superintendent Mr. H. P. Timmerman, expressing satisfaction with the way the work was done.

I inclose you a copy of my report to the chief engineer, dated October 26, 1905. This was forwarded to him along with plan and estimate of cost after the survey had been made of the work required in the slip.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. G. SING, *Engineer in charge.*

Engineer's Office, Toronto, October 26, 1905.

Sir,—I beg to respectfully acknowledge the receipt of your letter No. 4393, dated the 19th instant, stating the hon. the minister is in receipt of a request from the Canadian Pacific Railway Steamship Company for dredging between sheds 3 and 4 at Owen Sound, and you request me to report on the nature and extent of the work and to inform you whether or not there is a dredge available to perform the work before the close of navigation.

In obedience to your instructions, I have had a survey and examination made, and, herewith, transmit to you my report, with plan and estimate, of the work required.

I find that there is only a narrow cut dredged down one side of the Canadian Pacific Railway slip. Owing to this being the case, the heavy draught boats experience great difficulty in going from the dredged area of the main channel to the Canadian Pacific Railway slip, and as several large cargoes of steel rails have been brought from the 'Soo' to this place, the railway company are experiencing great difficulty in getting these boats sufficiently close to their wharfs to enable them to transfer their heavy cargoes from the vessels to the flat cars on the sidings. Entry to the sidings on the north side of the slip is impossible owing to the shallow depth.

It is desired by the company that the whole of the slip, tinted pink on plan, should be dredged to a depth of 20 feet at low water level.

I estimate the cost of this work, as follows:—

17,500 cubic yards of dredging at 20c. per yard.. .. .. $3,500 00

The dredge *Frank*, owned by Bowman Bros., is now operating in the harbour, and would be available for this work.

I am, sir, your obedient servant,

The Chief Engineer of Public Works. J. G. SING, *Engineer in charge.*

Audit Office, Ottawa, September 12, 1907.

Sir,—Let me acknowledge receipt of your letter of July 23, 1907, in further discussion of the claim of Mr. A. F. Bowman for extra payment for dredging in the Canadian Pacific Railway slip at Owen Sound; that is to say, for 17 cents a yard instead of 14.

The papers now inclosed by you are: (1) A letter from the deputy minister to Engineer Sing, dated January 4, 1907; (2) Mr. Sing's letter to the deputy minister, dated January 8, 1907, and inclosing a map or diagram of Owen Sound harbour, marked: 'To accompany letter to deputy minister, dated January 8, 1907;' (3) Mr. Sing's letter of October 26, 1905, to Chief Engineer Lafleur, recommending the dredging of the Canadian Pacific Railway slip.

The original specification for dredging by Mr. Bowman reads: 'All the works required to deepen, &c., the harbour at Owen Sound.'

The difficulty experienced by this office in recognizing the payment is dependent entirely upon the meanings of the two words 'harbour' and 'slip.'

According to the action of the engineers in the present instance, they have taken the phrase 'harbour of Owen Sound' to cover only the central main line of communication between the front and the back of the port, and to be exclusive of the lateral branches or 'slips.'

The understanding in the Audit Office is, that the term 'harbour' covers all the works inside the entrance to the port, including any 'slips.'

Please let me know whether, in all the other contracts for dredging of harbours (as let by the Department of Public Works), the slips have been considered as being outside of the scope of the original specification, unless expressly mentioned.

Also, you might obtain from the Department of Marine, a description of their use of the term 'harbour' in this sense, namely: whether or not the jurisdiction of the harbour masters extends to the slips, without separate mention when appointed.

Is there any legal definition of the 'harbour of Owen Sound' which might settle the present difficulty?

It might throw some light on the probable understanding by the department when the original contract was let, if the statistics of navigation were analyzed to show what fraction of the traffic entering Owen Sound Harbour had proceeded to the Canadian Pacific Railway slip. It may be that this fraction is so large as to render unlikely any arrangement for dredging the central harbour without also dredging the Canadian Pacific Railway slip.

The whole discussion has arisen from the engineer's failure to provide the contractors with a diagram, showing fully the work under contemplation. Had this been done, the diagram would have either included or omitted the Canadian Pacific Railway slip, and there would have been no room for subsequent difference of opinion.

Previous correspondence on this subject will be found at pages V—385 to V—387 of the Auditor General's Report for 1905-6.

Allow me to make the comment, that the documents of January 4 and January 8, 1907, might have been forwarded to this office at an earlier date than July 23.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

(NOTE by the Auditor General, October 8, 1907: No answer has been received to this letter, and the claim has not yet been paid.)

AUDIT OFFICE, OTTAWA, October 16, 1907.

SIR,—In further discussion of the claim ofMr. A. F. Bowman for $603.45 for dredging in the C.P.R. slip at Owen Sound:

In Engineer Sing's letter occurs the expression 'The slip is the property of the Canadian Pacific Railway Company.'

It does not appear clear to me that the public money can be used to pay for work on private property, unless the transaction is fully described as such in the Supply Bill.

Please quote whatever authorities there are against this view.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

Port Arthur Harbour : Breaking Ice in 1902-03.

AUDIT OFFICE, OTTAWA, May 14, 1907.

SIR,—Let me call you attention to my letter of October 30, 1906, on the subject of a claim of $1,402.50 by the Great Lakes Dredging Company for breaking ice at Port Arthur harbour in the winter of 1902-3. The letter in question is shown at page V—392 of the report of 1905-6.

As the requisite information has not yet been supplied, and as the fiscal year 1906-7 is now closing, it will be necessary to cancel the application No. 313, which is among the papers at present with the Public Accounts Committee.

If it is decided to maintain the claim, a new application may be made in 1907-8.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

(NOTE by Auditor General, Oct. 8, 1907: This claim has not yet been paid.)

Port Colborne, Eastern Breakwater : M. J. Hogan.

ENGINEER'S OFFICE, PORT COLBORNE, July 20, 1906.

SIR,—The eastern breakwater is approaching completion, and, weather permitting, the contractor will be through with it at the end of this month.

It is a good, substantial piece of work, which will stand as a credit to the department.

The superstructure is built of concrete blocks, walls longitudinal and cross-ties, the spaces between all these members being absolutely filled with packed stones of small dimensions.

This concrete superstructure rests on cribwork solidly built of good timbers, strongly bolted together, but liable to be damaged by ice, particularly at the western end which faces the prevailing winds, and where the ice is likely to pile up from the bottom of the lake to the top of the structure.

To make this valuable work absolutely immune to ice, I want to suggest the placing of a talus of stone of large dimensions around the head block, and along the seaward side for a distance of 1,000 feet. This will require a quantity of 5,000 cubic yards of stone at $3.50, or say $16,250.

I know that it is the practice of the department to call for tenders for works which cost more than $5,000, but in this instance it may be possible to extend Mr. Hogan's contract, inasmuch as he is the only contractor in this neighbourhood who

has the required plant, and in this connection I wish to remind you that he was the only tenderer when the tenders were asked for the last delivery of 12,000 cubic yards, and that this lot of stones is costing the department 25 cents per yard more than under the arrangement made previously.

I am, sir, your obedient servant,

The Chief Engineer, Public Works Dept. LOUIS COSTE, *Resdt. Engr.*

CHIEF ENGINEER'S OFFICE, OTTAWA, September 28, 1906.

SIR,—I have the honour to transmit herewith a report received from Mr. Resident Engineer Ls. Coste, who asks that a further quantity of 5,000 cubic yards of stone be deposited around the head of the eastern breakwater, at Port Colborne, in order to insure its stability. Mr. Coste states that the present contractor, Mr. Hogan, has all the necessary plant on the site of the work for the execution of this additional rip-rapping over and above the 12,000 yards he has already supplied in connection with the harbour improvements at Port Colborne, upon a call for public tenders. The rate per yard of Mr. Hogan's contract was $3.25, which would bring the cost of the additional work to $16,250. Under the circumstances, I beg to recommend that Mr. Hogan be called upon under his contract to supply and place in position the additional 5,000 cubic yards required.

In conversation over the telephone with the Auditor General, Mr. Fraser, I was informed by him that he would be willing to waive the calling for new tenders, and the passing of an order in council, providing this additional expenditure was sanctioned by you.

I have the honour to be, sir, your obedient servant,

Hon. C. S. HYMAN, Minister of Public Works. EUGENE D. LAFLEUR, *Chief Eng.*

(Initialed: 'O.K., C.S.H.')

PUBLIC WORKS DEPT., OTTAWA, September 29, 1906.

DEAR SIR,—I am informed by the chief engineer that the Auditor General has consented to the extension of your contract No. 5748, for delivery of stone along the south faces of the breakwater, and I am authorized by him to enter into an agreement with you for the delivery in position of an additional 5,000 cubic yards of stone at the price of your former contract, $3.25 per cubic yard.

I expect to be in Port Colborne early next week when I shall give you all necessary instructions. In the meantime you might quarry some of the stone required, but you are not to deposit any of it, until we have agreed as to the method of depositing the same.

My intention is to protect the head block of the eastern breakwater and then further protect the exposed south face of the western breakwater.

I am further authorized to ask you to fill in the voids made in the rip-rapping along the western breakwater, by the recent storms, with the produce of your excavation in the harbour, and for this work you will receive 85 cents per cubic yard measured in the skips.

None of this work is to be done unless the stone is measured and received by Mr. John Young, the inspector to whom I have given full instructions.

The whole of this work is to be done before the end of the fiscal year, viz., March 30, 1907.

Yours obediently,

M. J. HOGAN, Esq., Contractor, Port Colborne, Ont. LOUIS COSTE. *Eng. in charge.*

I agree to the above terms: M. J. Hogan, Port Colborne, December 1, 1906.

AUDIT OFFICE, OTTAWA, May 7, 1907.

SIR,—Let me acknowledge receipt of your application No. 718 for $14,218.75 in favour of M. J. Hogan of Port Colborne, for 'stone delivered and placed in position, in accordance with 'extension of contract No. 5748, from September 29, 1906, to March 30, 1907; 4375 cub. yds. at the contract rate of $3.25 per yard.'

Authority for Extra Work.

Attached to the estimate is a letter to Mr. Hogan from Engineer Coste, which begins as follows: 'I am informed by the Chief Engineer that the Auditor General has consented to the extension of your contract No. 5748, for delivery of stone along the south faces of the breakwater; and I am authorized to enter into an agreement with you for the delivery in position of an additional 5,000 cub. yards of stone, at the price of your former contract, $3.25 per cubic yard.'

In the absence of Mr. Fraser, we have not yet been able to find a record of the arrangement mentioned. Please let us have a copy of whatever documents are in your possession, as a guide to the details of the proposition.

Was this extension of the contract submitted to council?

Estimate not sufficiently Descriptive.

At page V—42 of the Auditor General's Report for 1906-7, will be found two items of previous extras to the original $179,000 contract, namely:—

Rip-rap along western breakwater: 12,000 cu. yds. at $3.25	$39,000
Furnishing and placing large stones along south face of western breakwater: 3,000 cu. yds. at $3	9,000

Mr. Coste's letter of September 29, 1906, is not quite clear as to whether the third extra (now in question) is for riprap or for large stones; but the balance of probability seems in favour of the latter. If so, the price of $3 would be the more natural one to adopt.

Fuller information might be given on this point. Also, a diagram of the three extras would be acceptable, as well as the calculations by which the totals are determined.

Extras compared with Main Contract.

On the original contract of $179,000, the extras now amount to $62,218.75, or over one-third.

Had it been possible in 1904-5 to foresee these extras as a contingency of the near future, they might have been included as such in the specification, to give more inducement to contractors for low tenders.

Were the later disturbing causes entirely novel in their nature, or were they such as could have been anticipated?

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

PUBLIC WORKS DEPT., OTTAWA, May 14, 1907.

SIR,—I beg to acknowledge the receipt of your letter dated 7th instant, having reference to our application No. 718 for $14,218,75. in favour of M. J. Hogan, Port Colborne, for stone delivered and placed in position, in accordance with the extension of contract No. 5748, from September 29, 1906, to March 30, 1907. In reply to your inquiry as to whether the extension of contract was submitted to council, I beg to state no such reference was made to council. The additional information requested in your letter is fully covered by the attached correspondence exchanged between Louis Coste, resident engineer at Port Colborne, and the chief engineer of the department, all of which, as you will see, has been sanctioned by the Hon. the Minister.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secretary.*

AUDIT OFFICE, OTTAWA, May 15, 1907.

SIR,—Let me acknowledge receipt of your letter No. 163189 of May 14, covering a report by Resident Engineer Coste, dated July 20, 1906, and one by Chief Engineer Lafleur of September 28, 1906, on the subject of stone protection for Port Colborne breakwater, supplied by Mr. M. J. Hogan.

In Mr. Lafleur's letter (addressed to the minister) we find this paragraph: 'In conversation over the telephone with the Auditor General, Mr. Fraser, I was informed by him that he would be willing to waive the calling for new tenders, and the passing of an order in council, providing this additional expenditure was sanctioned by you.'

I have no recollection of the telephone conversation to which the chief engineer refers. Please ask him for a copy of any memoranda which he may have jotted down at the time, on account of the importance of the interview.

As the transaction now appears to me, I would not have authority to waive the requirements of calling for tenders and passing an order in council.

The application is returned herewith, to be replaced by one in 1907-8, as the fiscal year 1906-7 closes to-day.

Please discuss the preferable applicability of the $3 price, as suggested in my previous letter; and have plans drawn up to show the different extra works.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, May 20, 1907.

SIR,—With further reference to your two letters bearing date respectively the 7th and the 15th May instant, respecting our application No. 718, in favour of M. J. Hogan, of Port Colborne, for stone delivered and placed in position in accordance with the extension of contract No. 5748, and to follow up our conversation of this morning, I hereby inform you that the Department of Public Works will be willing to submit to council a recommendation that the amount of $14,218.75 owing to Contractor Hogan be paid out of the appropriation for improvements in the harbour of Port Colborne. This course is being adopted with a view to allow your department to issue early payment in favour of Contractor Hogan.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secretary.*

AUDIT OFFICE, OTTAWA, May 22, 1907.

SIR,—In further discussion of Mr. M. J. Hogan's account for stone protection for Port Colborne breakwater (4,375 c. y. at $3.25):—

Understanding now reached.

Since writing my letter of May 15, interviews have been had with Messrs. Lafleur and Coste, resulting as follows:

1. The chief engineer's report to the minister is accepted as being a memorandum of the telephonic conversation referred to by Mr. Lafleur.
2. Since it has been shown that the $3 rate belonged to an earlier payment for the same kind of work, no objection will now be maintained against the rate of $3.25.
3. It is understood that the department will ask for an order in council for the 4,375 yards at $3.25, now under discussion.
4. It is also understood that any further work contemplated will be advertised for public competition.

Original Plans insufficient.

The payments for the western breakwater at Port Colborne, made and proposed, are as follows:—

Hogan & Macdonell, $345,000 contract (1903-4, V—59)—		
Cribwork under water, 65,430 c. y. at $1.90	$ 124,317 00	
Cribwork above water, 34,900 c. y. at $2.80	97,720 00	
Rock in cribs and in rip-rapping, 90,000 c. y. at $1	90,000 00	
Concrete covering of outer 2,400 feet of breakwater, 4,120⅔ c. y. at $8	32,963 00	
Hogan & Macdonell, extras, $166,000 (1903-4, V—59)—		
Rock allowance under clauses 2 and 6 of supplementary contract: 25,000 c.y. at $2	$ 50,000 00	
Supplementary contract: widening outer 2,400 ft. of breakwater to 50 ft. (from 25 ft.)	100,000 00	
Heavy stone along outer face of breakwater: 3,566 c.y. at $3	10,698 00	

Concrete blocks in position along outer face: 186 c.y. at $7	1,302 00
Six-inch flooring on whole of breakwater, instead of three-inch	4,000 00
Hogan, M. J.: $38,075, addition to main contract (1903-4, V—59)—	
Concrete wall around head block: 1,132 c.y. at $7.50.	8,490 00
Concrete slope and covering on outer portion of breakwater: 2,985 c.y. at $8	23,880 00
Concrete covering on inner portion of breakwater: 815 c.y. at $7	5,705 00
Hogan, M. J.: large stone furnished and placed along outer face of breakwater: 10,000 c.y. at $2.50 (1903-4, V—59)	25,000 00
Hogan, M. J., for western breakwater: (1903-6, V—42)—	
Furnishing and placing large stones along south face: 3,000 c.y. at $3	9,000 00
Contract complete for rip-rap (large stone): 12,000 c.y. at $3.25	39,000 00
Hogan, M. J.: account now in hand—	
Large stone on outer face: 4,375 c.y. at $3.25	14,218 75
Tenders to be called for in 1907-8—	
Large stone on outer face; 20,000 c.y. at (say) $3.25.	65,000 00
	$701,293 75

In other words the original plan called for an expenditure of $345,000; and the additions and extras will amount to some $355,000.

Mr. Coste has supplied a diagram of the extra stone protection, with the following note: 'The force of the waves during the storm of January 20, 1907, has considerably flattened out the slope; and an additional quantity of at least 20,000 cubic yards is (in my opinion) required, to save the breakwater from ultimate destruction.'

Please let me know what engineer prepared the original plan of the breakwater.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

Extract of Order in Council of August 21, 1907.

Public Works:—On a memo dated August 10, 1907, from the Acting Minister of Public Works, submitting that in answer to advertisement calling for tenders for improvements in the harbour of Port Colborne, in the shape of stone and concrete blocks, only one offer was received, from Michael Joseph Hogan, for the following prices:—

Stone in position	$1 20 per cubic yard
Concrete blocks in position	6 75 " "

That the prices above quoted are considered fair and reasonable by the chief engineer of the Department of Public Works.

The minister, therefore, recommends that authority be given to enter into contract with Michael Joseph Hogan for the supply of:—

5,000 cubic yards of stone in place.. .. .. $1 20 per cubic yard
6,000 cubic yards of concrete blocks in place.. 6 75 " "

for the tender price of $46,500, to be covered by the amount of $47,100, appropriated by parliament during its last session for improvements in harbour of Port Colborne.

The committee submit the same for approval.

R. BOUDREAU, *C.P.C.*

AUDIT OFFICE, OTTAWA, October 16, 1907.

SIR,—I would like to call your attention to my letter of May 22, 1907, on the subject of 'Port Colborne breakwater,' which ends with the request: 'Please let me know what engineer prepared the original plan.'

I do not find that this letter has yet been answered. Please supply the omission.

The price of '$3.25 in the last item of the $701,293.75 calculation of May 22 (large stone on outer face, 20,000 c. y. at say $3.25)' was obtained from Engineer Coste, in an argument against the advisability of advertising; he claiming that, as the price had advanced every year, we would have to pay more than this rate in 1907-8, if the work were put up to public tender.

The order in council of August 21, 1907, quotes and accepts a tender received from Mr. M. J. Hogan, the former contractor, offering to supply stone for $1.20 per cubic yard. As the specification has not yet been sent to this office, I would like to be informed whether this is not the same service for which $3.25 a yard was paid before competition was invited.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

St. Andrew's Rapids : Tests for Cement.

AUDIT OFFICE, OTTAWA, July 18, 1907.

SIR,—Let me acknowledge receipt of your application No. 193 for $10,219.07 in favour of the Owen Sound Portland Cement Company, Ltd., for cement delivered at St. Andrew's Rapids.

Clause four of the specifications states: A sample for testing is to be taken from every tenth barrel or every fortieth bag or otherwise at the option of the engineer.

Clauses 5-12 state definitely the methods of testing the cement, for fineness, specific gravity, colour, soundness, setting, tensile strength and crushing, giving the standards required in each test. Clause five states that cement may be rejected in case it fails to meet any of these requirements.

Please send a certificate from the engineer who made these tests, stating that the tests have all been made, and that the cement is of the required standard in every respect.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

Steamer "Speedy": New Furniture.

AUDIT OFFICE, OTTAWA, March 25, 1907.

SIR,—Let me call your attention to voucher B—92104, from John Kay, Son & Co., of Toronto, dated December 18, 1905, for furniture for the steamer *Speedy*, as follows:—

Mahogany table	$100 00
Mahogany dining-room chairs: 11 at $12	132 00
Mahonany arm-chair: 1 at $16	16 00

The certificates are: 'Goods received; Narcisse Joly'; 'Prices fair and just; James Howden'; and 'U. Valiquet, for Chief Engineer.' The payment is charged to 'New Dredge Plant.'

For supplies of this nature, whose quality exceeds the economical requirements of the regular permanent working staff, it would be well to have the approval of the Deputy Minister on the voucher, to show that the purchase was made with his cognizance.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, April 6, 1907.

SIR,—I have received your letter of March 25, covering voucher B—92104 from Messrs. John Kay, Son & Co., for furniture for ss. *Speedy*.

Such goods were paid for in December, 1905, some 18 months ago. I do not suppose that my initials upon that voucher could affect its proper authorization. It would be a different thing, I believe, if this account were audited before payment, but as the cheque for it was issued a long time ago, I can only take your remark as a guide for the future, and have notified the chief engineer accordingly.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

PUBLIC WORKS DEPT., OTTAWA, April 25, 1907.

SIR,—With reference to your letter of the 25th ultimo in regard to our voucher B—92104 from John Kay, Son & Co., of Toronto, for furniture for the steamer *Speedy*, I beg to inclose herewith, in reply to your inquiry, copy of a memorandum from the general superintendent of dredging, in which it is stated that the furniture in question was ordered under instructions received from the Hon. Mr. Hyman, Minister of Public Works.

I am, sir, your obedient servant,

The Auditor General. FRED GELINAS, *Secretary.*

OFFICE OF THE SUPT. OF DREDGING, OTTAWA, April 12, 1907.

DEAR SIR,—I beg to acknowledge yours of the 10th inst., with letter attached, from the Deputy Minister, asking for vouchers approved of by him, for the mahogany table and chairs purchased for steamer *Speedy*, to replace those which were destroyed in a storm encountered off the coast of Cape Breton on our way from New York to Halifax. The cause of their destruction was the piano, which broke loose from its fastenings and destroyed everything it came in contact with, without damaging itself.

The table and chairs were ordered by instructions received from Mr. Hyman, the honourable the Minister of Public Works, and are not nearly so expensive as the ones which they replaced.

I am, sir, your obedient servant,

The Chief Engineer, Public Works. JAMES HOWDEN, *Gen'l Supt.*

New Tug 'Petrel' for Fraser River : $7,949.43 Extras.

AUDIT OFFICE, OTTAWA, December 14, 1906.

SIR,—Let me acknowledge receipt of your application No. 460 for $9,779.43 in favour of the Victoria Machinery Depot Company, being balance of final estimate for new steel tug for Fraser River, B.C.:—

The final estimate is summarized as follows:—

Original contract	$24,750 00
Extras, 35 items	7,949 43

Please send, as usual, copies of the engineer's orders for extras, fixing the prices before the works were begun.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

ENGINEER'S OFFICE, NEW WESTMINSTER, March 1, 1907.

SIR,—I beg to acknowledge the receipt of your letter No. 497, of 14th ultimo, inclosing file 297,865, being a letter from the Auditor General asking to be supplied with copies of engineer's orders for extras, amounting to $9,779.43, in the final estimate in favour of the Victoria Machinery Depot, for the construction of the steel tug *Petrel*, and also inclosing duplicate of final estimate with the items—1 to 6, inclusive, and 10—authorized from Ottawa, checked off in red. In explanation of the remaining items—7 to 9 and 11 to 35, inclusive, amounting to $4,434.43—I am sending you herewith a tabulated statement of the different items covering this amount and the reasons for which they were allowed, and beg to report as follows:—

In submitting to you the plan and specification for this vessel, the requirements of size of hull and details of machinery were little more than outlined. Upon them, however, the contract was let and consequently there was nothing to cover such improvements and additions as were decided to be necessary in the opinion of Lloyd's inspector, our own, and myself. To have referred these numerous items, occurring at different times during the construction, to Ottawa, would have so unduly delayed the

work that I felt justified in authorizing them—having first received the written offer of the Victoria Machinery Depot, checked by our own inspector. Copies of these offers are herewith inclosed. I would respectfully ask you to endorse these items as absolutely essential to the proper construction of such a boat and the service demanded.

The original contract price of $24,750 was entirely inadequate for such a boat as we required. My estimate had always been $30,000 to $35,000. The actual cost practically splits the difference between these amounts, or $32,699.43, with the result that we have a first-class boat, passing inspection as the specification demands 'as equal to Lloyd's highest class for this class of service,' as well as the Canadian Marine Board's requirements, which, without the various alterations enumerated in the list, she would not have done.

The only possible mistake in the matter was my not referring these numerous items to Ottawa, but they were, in most cases, for small amounts and occurred at such short intervals that it was practically impossible to do so and at the same time carry on the work of construction continuously. I assume that your endorsation will remove any objection of the Auditor General, which in view of the circumstances above explained and the unquestioned economy in construction, I would respectfully ask you kindly to accord.

Yours obediently,

The Chief Engineer of Public Works. G. A. KEEFER, *Resdt. Engr.*

AUDIT OFFICE, OTTAWA, March 25, 1907.

SIR,—Let me acknowledge receipt of your 162274 of March 18, inclosing Engineer Keefer's report of March 1, on the subject of the steel tug *Petrel,* recently constructed by the Victoria Machinery Depot Company.

Delay in Handling Correspondence.

The following dates appear on the different letters which compose this file:—

Final estimate passed by Mr. Keefer, October 6, 1906.

Passed by chief engineer's office, November 29, 1906.

Application for payment, December 14, 1906.

Auditor's letter asking for written orders, December 14, 1906.

Acknowledgment by department, ending 'I have referred your communication 'to the chief engineer, with instructions that it receive immediate attention,' December 21, 1906.

Chief engineer's letter to Engineer Keefer, February 14, 1907.

Engineer Keefer's report to chief engineer, March 1, 1907.

Secretary's letter to Auditor, with Mr. Keefer's report, March 18, 1907.

There should be an explanation of the delay between December 21 and February 14, during which period the papers appear to have been waiting in the chief engineer's office.

No Written Orders attached to Mr. Keefer's Letter.

Engineer Keefer, after referring to items 1 to 6, and 10, as having been authorized from Ottawa, goes on to say: 'In explanation of the remaining items 7 to 9, and 11 'to 35 inclusive, amounting to $4,434.43, I am sending you herewith a tabulated state-'ment of the different items covering this amount, and the reasons for which they 'were allowed.'

No copy of this tabulated statement accompanied the correspondence recently transmitted. Please have the omission rectified at an early date.

Also, the Audit Office might be supplied with copies of the written departmental orders for items 1 to 16 and 10.

Plans Completed by Contractor.

On page 9 of the specification, there is the following paragraph: 'The plans exhibited, and these specifications, give the principal dimensions and the general dimension lines to which the tow-boat is to be built. The contractor will work out and submit detail plans for approval, for all parts of the built machinery and housing of the tow-boat.'

In view of its bearing on the general theory of contracts, I would like to be informed (for publication in the annual report) of any satisfactory results which have been obtained by allowing the contractors to prepare portions of the specifications after tender—instead of your following the usual practice of prescribing closely detailed specifications to the contractors before tender.

Engineer's Explanation Inconsistent.

Mr. Keefer says: 'We have a first-class boat, passing inspection (as the specification demands) as equal to Lloyd's highest class for this class of service, as well as the Canadian Marine Board's requirements, which, without the various alterations enumerated in the list, she would not have done.'

The tug has to come up to specification, to earn her bulk-sum contract price. Mr. Keefer certifies that she would not have come up to specification, if the alterations had not been made. How then can he certify the alterations as 'extras,' to be paid for in addition to the bulk sum contract price?

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, May 14, 1907.

SIR,—Let me call your attention to my letter of March 25, 1907, asking for further information concerning bills of extras on the steel tug *Petret,* recently constructed by the Victoria Machinery Depot Company.

No answer has yet been received to the letter in question.

As the fiscal year 1906-7 will close to-morrow, the application No. 460 A for $7,949.43 is returned herewith.

Please replace it by an application of 1907-8, and send at an early date the information previously requested.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, May 27, 1907.

DEAR MR. TEMPLEMAN,—In reply to your letter of 20th instant *re* Victoria Machinery Depot account, I beg to inclose herewith copies of my letters to the Public Works Department in connection therewith.

From these you will see that there has been very great delay on the part of the Public Works in replying to our letters, and when the last fiscal year closed we were obliged to return the application to be cancelled, as the appropriations for that year had lapsed.

At the same time we asked that a new application, chargeable to the present year, be sent us, but up to the present nothing further has been heard of the matter.

Yours very truly,

Hon. Mr. TEMPLEMAN, Minister of Inland Revenue. J. FRASER, *A.G.*

CHIEF ENGINEER'S OFFICE, OTTAWA, May 18, 1907.

SIR,—With reference to your remarks in file No. 301,617, regarding further explanations required in connection with the extra expenditure incurred in the construction of the new steel tug *Petrel,* for British Columbia, I have to say that I referred all the papers again to Mr. G. A. Keefer, resident engineer, for the desired information.

I now have the honour to transmit Mr. Keefer's report, stating that he can hardly add any more to the explanations already given by him; that had the alterations not been made during construction, they would have had to be made after completion at a very much greater expense, and that it was only with regard to the smaller items that he did not consider written permission necessary.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. EUGENE D. LAFLEUR, *Chief Eng.*

ENGINEER'S OFFICE, NEW WESTMINSTER, May 10, 1907.

SIR,—I have to acknowledge the receipt of your letter No. 1353, of 18th ultimo, inclosing four files Nos. 297397, 297865, 300918, and301617, in reference to the extras incurred in the construction of the new steel tug *Petrel,* in which the Auditor General asks for further information regarding these extras. In reply I beg to state that, in my letter to you of March 1 last, I endeavoured to set forth, as succinctly as possible, the necessity and reasons for the different alterations entailed in the construction of this vessel. I really cannot see where I can add much to the explanations already given.

Had these alterations not been made during construction they would have to have been made after completion—at a very much greater expense. There is no inconsistency in my explanation. The inconsistency was rather in the specification which was not sufficiently definite in covering the different items in such a manner as to admit the vessel passing, as demanded, Lloyd's highest class for this class of service. It was only after full discussion on all these points with our own inspector and Mr. Mitchell, Lloyd's inspector, that I authorized the alterations or additions being made at a time when it could most economically be done—which was during construction.

As I stated in my former letter of explanation, of March 1 last, I did not consider these many small items of sufficient importance to justify me in submitting them to Ottawa for approval before the work was done. By such a course the delay, which had already exceeded the contract time by eighteen months, would have been indefinitely prolonged. Any practical machinist will see the justice of this contention.

I can only express my regret if I have unintentionally exceeded what I considered to be my jurisdiction in this matter. No material departure was made from the specification without permission from Ottawa. It was only in the smaller items that I did not consider written permission necessary. Occurring, as they did, so frequently and representing comparatively small amounts, it would have entailed a delay that I did not think justified to have referred them all to Ottawa. These alterations and additions would have to have been made in any case—either before or after completion—in the interest of the service. I chose the most economical course.

Yours obediently,

The Chief Engineer, Public Works. G. A. KEEFER, *Resident Engineer.*

AUDIT OFFICE, OTTAWA, May 30, 1907.

SIR,—Let me acknowledge receipt of your letter of May 29, inclosing reports by Engineers Keefer and Lafleur on the subject of $7,949.43 extras on the $24,750 contract for steel tug *Petrel,* recently constructed by the Victoria Machinery Depot Co.

Neither report discusses the subject mentioned in the concluding paragraphs of my letter of March 25, namely, the fact that the contract price of $24,750 covers all the work now billed as extras, and amounting to $7,949.43.

The specification reads: 'Vessel to be built to the satisfaction of inspector 'appointed by owners; and construction of hull to be equal to Lloyds' highest class 'for this class of service; and machinery and equipment to be equal to Canadian 'Marine Board requirements.'

Mr. Keefer says: 'We have a first-class boat, passing inspection (as the specifica- 'tion demands) as equal to Lloyds' highest class for this class of service, as well as 'the Canadian Marine Board's requirements; which, without the various alterations 'enumerated in the list, she would not have done.'

The tug has to come up to specification to earn her bulk sum contract price. Mr. Keefer certifies that she would not have come up to specification if the alterations had not been made. How then can he certify the alterations as 'extras,' to be paid for in addition to the bulk sum contract price?

The application is returned herewith; and I regret my inability to pass it, on the ground that 'the money is not justly due.' This objection is taken under chapter 24 of the Revised Statutes of 1906, section 43.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, June 28, 1907.

SIR,—With reference to your letter of May 30, concerning a payment to the Victoria Machinery Depot Co., for the construction of the steam tug *Petrel,* I fancy that when that letter was written you had not before you Mr. Keefer's further letter of May 10, giving explanations in reference to the additional amount to be paid.

In your letter of May 30, returning the application for $7,949.43, you state that according to your understanding of the matter, Mr. Keefer reports that the tug would not have come up to the specification if the alterations had not been made, and you, therefore, take the ground that the money is not justly due.

If you will kindly read Mr. Keefer's letter, you will see that it is the specification which did not come up to Lloyds' requirements, and not the work which did not come up to the requirements of the specification.

The work appears to have been done as specified, but although done as specified it would not satisfy Lloyds' standard. Consequently, work had to be done beyond what was called for by the contract in order to reach that standard.

For that work which was not included in the contract, the contracting company appears to me to fully deserve payment. Under those circumstances I think that you will not see any further objection to the amount being paid.

I beg to inclose copy of Mr. Keefer's letter for your perusal.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, July 4, 1907.

SIR,—Let me acknowledge receipt of your letter of June 28, concerning the claim of the Victoria Machinery Depot Company for extras on the steel tug *Petrel.*

Mr. Keefer's report of May 10 was before me when my letter of May 30 was written. Permit me, however, to observe that your last letter must have been prepared at some distance from the specification.

As quoted in my letter of May 30, the specification reads: 'Vessel to be built to the satisfaction of inspector appointed by owners; and construction of hull to be equal to Lloyd's highest class for this class of service; and machinery and equipment to be equal to Canadian Marine Board requirements.'

This is as plain a specification as ever emanated from the Public Works Department. The contract price is to ensure three things: Lloyds' standard for the hull, Canadian Marine Board standard for the machinery, and the inspector's satisfaction with everything (including, of course, his certificate that Lloyds' and the Marine Board's standards have been obtained). In default of any one of these three the full contract price would not be earned.

Mr. Keefer certifies that $7,949.43 of additional work had to be added to the $24,750 of work proposed by the Victoria Machinery Company before the two standards were reached. Therefore also before he could certify his satisfaction.

If the additional work had not been done, the amount earned would have been $24,750, less $7,949.43, or only $16,800.57.

With these facts all previously on the records, I do not see how you were able to release the third and fourth paragraphs of your last letter, in which you say, 'If 'you will kindly read Mr. Keefer's letter, you will see that it is the specification which 'did not come up to Lloyds' requirements, and not the work which did not come up 'to the requirements of the specification. The work appears to have been done as 'specified; but although done as specified, it would not satisfy Lloyds' standard. 'Consequently, work had to be done beyond what was called for by the contract, in 'order to reach that standard.'

A reference to the quoted clause of the specification will now, however, convince you, I think, that Lloyds' requirements are an essential part of that document; and that the tug *Petrel* would have fallen short of both of them if the $7,949.43 of additional work had not been performed.

Since the $7,949.43 of additional work was necessary to earn the contract price of $24,750, a separate and extra payment of $7,949.43 is 'not justly due.'

Have you obtained an opinion on this subject from the Department of Justice? If so, please send me a copy.

As for the specification now claimed to be defective, its preparation would not (as a general principle) have been entrusted to an engineer who was unfamiliar with the various standard requirements. Who was the specifier, and does he now admit any defect in his work? Does he not hold, as we do, that the 'Lloyds' clause brought all the rest of the specification up to standard?

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

VICTORIA, B.C., August 13, 1907.

DEAR SIR,—We understand that our account of extras is being held because of some misunderstanding as to whether same should not have been taken in by the original specification and the original price.

The main items in our extra account have nothing to do with Lloyds or Dominion inspection, but are simply additions ordered by the government, and the balance which are small items are pure refinements and not called for in specifications either Lloyds or Dominion inspection rules, and were put in by instructions of the government and asked for by inspectors of whom we had three to satisfy. The items were not necessary for passing either inspection, but were more in keeping with a government vessel. The item for decking is the difference between Australian beechwood and Douglas fir, the Australian beechwood certainly makes a better finish, but is not called for in any rules, but Douglas fir is generally used. In the present case the Australian wood was ordered by the government for this job and handed over to us to put in with the arrangement that we should charge the difference of price.

We might go down the list of items and plainly show where many are simply refinements and not absolutely necessary. It is hardly expected of a builder to refuse to make alterations on instructions of the government or their agents when it is clearly understood that they shall be extras to the original contract and are not called for in any rules laid down, but are simply as stated matters of alteration from the general specifications of such vessels as the *Petrel.*

We consider that our account is fair and just in every particular, especially as we did nothing without direct orders, and we feel we are having a hardship thrust upon us through no fault of our own, and would therefore ask you to try to close the matter at an early date.

We have now been over a year out of our money. Thanking you in anticipation.

Yours truly,

VICTORIA MACHINERY DEPOT CO., LTD.,

The Auditor General. Per C. J. V. SPRATT.

AUDIT OFFICE, OTTAWA, August 21, 1907.

SIR,—Inclosed please find a copy of a letter dated August 13 from the president of the Victoria Machinery Depot Company, concerning their claim for extras on the tug *Petrel.*

Engineer Keefer says in his report of March 1, and subsequently, that without these extras the tug would not have come up to Lloyds' and Canadian Marine Board requirements, as demanded by specification.

President Spratt now says: 'The main items in our extra account have nothing to do with Lloyds or Dominion inspection, but are simply additions ordered by the government.'

This is a clear issue, which should be easy to settle, if the Lloyds and Dominion requirements are printed, as they probably are.

Please obtain the printed regulations, if they exist; and ask Engineer Keefer to report anew, giving references to them by sections, in support of his view that the extras are necessary to satisfy them.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

Dept. of Public Works, Ottawa, September 19, 1907.

Dear Sir,—I beg to send you herewith copy of a lengthy report received from Mr. Engineer Keefer in further reference to the extras on the tug *Petrel.*

The information contained in that report, which is quite clear and which appears to me to be conclusive, was asked by yours of August 21.

I trust that the explanations given by Mr. Keefer will be found satisfactory and will move you to pay the claim of the company which constructed the tug in question.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

Engineer's Office, New Westminster, September 11, 1907.

Sir,—I beg to acknowledge the receipt of your letter No. 3155, of July 27 last, in reference to the bill of extras claimed in connection with the construction of the steel tug *Petrel,* of Victoria, B.C., inclosing copy of a letter from the Auditor General stating that he is not satisfied with the explanations given by me of the various items claimed as extras, inclosing also some twelve departmental files relating to this matter, and asking fuller explanation than that contained in my letters of March 1 and May 10 last.

In reply I beg to state that the contention of the Auditor General that the following clause in the specification: 'Vessel to be built to the satisfaction of the inspector 'appointed by owners and construction of hull to be equal to Lloyd's highest class for 'this class of service, and machinery and equipment to be equal to Canadian Marine 'Board's requirements,' covers all the items referred to in the bill of extras, will be qualified by the explanations attached. At the same time my statement that these alterations and additions were necessary to bring the boat up to Lloyd's and the Canadian Marine Board's requirements is also misleading, as I find, on further investigation, that in most every case they are either in excess of or entirely distinct from these requirements—as I am assured is the case with nearly every boat in commission on this coast. This departure was considered warranted, for the reasons given in the list of items. It was with due consideration and on the advice of our own inspector and

Mr. Mitchell, Lloyd's surveyor, together with that of Mr. Newman, engineer for the Machinery Depot, that this additional expense was incurred, and I am assured that it was economy to do so, as adding materially to, and possibly doubling, the life of the boat.

I also beg respectfully to take exception to the statement of the Auditor General that the specification is 'as plain a one as ever emanated from the Public Works Department.' On the contrary, apart from the covering clause referring to Lloyd's and the Canadian Marine Board's requirements, it is little more than a mere outline of what is required, particularly in the machinery. It was never intended, in submitting for approval a sketch plan of the tug with the general requirements as to dimensions, speed, &c., and outlining generally the boiler, engines and machinery, that the contract would be let on what was practically but little more than a memorandum of what we required.

However, in reply to your letter, I may state that I have again gone into the matter item by item with Mr. Mitchell, Lloyd's surveyor, with the result given below in my explanations of the several items, upon which I trust the Auditor General will feel justified in giving his assent to the payment of the account of the Victoria Machine Depot Company, Ltd., as rendered.

With this rather lengthy preface, I beg to again submit the list of extras, with such information and explanations as, after a full discussion with our own and Lloyd's inspectors, I am able to give.

The following are the items classed as extras:—

1. *Enlarged boiler, with Morrison furnaces, $2,500.*—The enlargement of the boiler was decided as necessary by our own, Lloyd's, and the Victoria Machinery Depot's inspectors to attain the speed called for in the specification of from 10 to 10½ knots per hour. Drawings were made, with an estimate of cost, and submitted to Ottawa, and instructions were received to proceed with the work. Lloyd's and Canadian Marine Board's requirements have no application in this case.

2. *Two trimming tanks, $500.*—This item was the construction of two large galvanized iron tanks, located aft under the cabin floor, for the purpose of trimming the boat, to counteract those in the bow and the coal bunkers forward of amidships and prevent them from putting her down by the head as the after bunkers were emptied. These tanks are connected with those forward so that water can be pumped to either end for the purpose mentioned, and in case of emergency they can be filled with sea water. These were quite outside of Lloyd's or Canadian Marine Board's requirements, and were not mentioned in the specification. They were, however, a very necessary addition to the security of the vessel, and also enable her to carry a sufficient supply of fresh water for an extended cruise.

3. *One steam windlass, $485.*—This item is not covered by the specification, and a hand windlass would have met the Marine Board's requirements. The additional cost of a steam windlass was, I considered, justified, and its installation was authorized.

4. *Water tight flat, with man-hole, &c., $575.*—This is practically a readjustment of the water tight bulk-heads aft of the engine-room, and consisted of an air tight flooring under cabin extending from after bulk-head in rear of engine-room to stern-post, making the cabin secure from the flooding from any injury to the hull below the water line. A man-hole was necessary to give access to propeller shaft, &c. This change was authorized from Ottawa upon receipt of drawing and estimate of cost. Lloyd's and Marine Board's requirements do not apply here, as it was an authorized diversion from original plans and in excess of their requirements.

5. *Enlarge pump, extra heavy pipes and valves, $435.*—A larger pump than that specified was found necessary, recommended, and authorized from Ottawa. The pipe connections were specified as best quality 'standard iron pipe' and malleable fittings. On the advice of the inspectors, as, in many cases, these pipes were subject to the ac-

tion of salt water and very difficult of access, extra heavy iron pipes were recommended and adopted as doubling the time in which they would require renewal. In England these pipes are invariably of copper which resists corrosion for a much longer period than iron. While the ordinary Standard pipe would have met the requirements of the Marine Board, it was considered economy to substitute a heavier pipe, which we were authorized to do.

6. *Modification of joinery plan, $175.*—This additional expense was caused by some necessary alterations to the upper works and a departure from the sketch plan upon which the work was let. I consider it a legitimate charge on the part of the contractor, as the accommodation necessary is not specified by either Lloyds or the Canadian Marine Board. These alterations and additions were submitted to and authorized by the department at Ottawa. Only the extra expense is charged.

7. *Air casing, for smoke-stack, $250.*—The specification calls for an air casing below decks. This additional charge was for casing the entire smoke-stack to assist draft in smoke-stack and improve ventilation of stoke hold. It was an improvement in excess of and not called for by Lloyds or Marine Board requirements, but recommended by the inspectors and allowed.

8. *Modification of towing bitts, including lockers, $350.*—Instead of the large wooden knees supporting these bitts and cumbering the quarter deck, steel knees were substituted and a steel frame was put round the bitts as being stronger, and lockers, for convenience in storing supplies, &c., inclosing them were put in. This was an extra in excess of the specification and of Lloyds' or Marine Board requirements.

9. *Tinning condenser tubes, $90.20.*—This tinning is not insisted on by Lloyds, but, as it prevents galvanic action and increases life of boiler, it was considered a justifiable expenditure. It is now being generally adopted in all steamers, the advantage being considered much in excess of the extra cost.

10. *Bilge keels, $675.*—These are neither specified nor called for by either Lloyds' or Marine Board rules, but, in view of the service required from this tug on the west coast of Vancouver island, where very rough weather is prevalent, it was deemed a necessary precautionary measure. The matter was duly represented and explained to the department and the addition was authorized from Ottawa at the cost above given.

11. *Extra cost of beech wood decking, instead of fir, $332.83.*—This was a departure from the specification. Fir decking is a constant source of trouble and expense from shrinkage, &c., and consequent leaking which necessitates recaulking. The Australian white beech is a wood that neither shrinks nor warps under any alterations of heat and wet. It is much more durable and, although the first cost is greater, will prove more economical than fir. Lloyds' or Marine Board rules make no reference to the material to be used. I consider the result more than justifies the increased cost.

12. *Addition injector piping, duplex pump to condenser, $220.*—Lloyds rules do not call for an injector, and this item is in excess of requirements. It was put in in case the pump should break down, and piping was put in to connect the duplex pump with the condenser in case the main circulating pump should break down. As can be seen, for a sea-going vessel it was a necessary precautionary measure and should be allowed.

13. *Brass and nickel hand-rail for cabin, $60.40.*—This was not called for in specification, but was necessary for safety in rough weather. It is made of brass and nickel-plated for ease in keeping clean. It was a necessary addition, but not provided for, and may properly be considered as an extra and allowed.

19. *Steam piping and tray for electric light engine, $215.*—This piping is for the steam connection of electric light engines and tray to hold same. This installation of electric light was authorized from Ottawa on tender by the Hinton Electric Co., and was not contemplated in the original plan, but was found necessary for the proper

equipment of the boat. Neither specification nor Lloyds rules have any connection with this item.

27. *Ash chute and port cut in bulwarks, $67.50.*—There was no provision made for this item, but it was found to be a necessary convenience as the bulwarks were too high to lift ash barrels over, and also avoids having ashes carried by wind over the boat, a very necessary addition and should be included in any future specification.

29. *Extra work and material, cementing entire vessel, $397.*—Although the specification calls for a certain amount of cement in the bottom of the vessel, a large additional amount, to the extent of several tons, was, at the suggestion of Lloyds inspector, put in, although not called for by their rules. In the absence, however, of a double bottom, it was deemed advisable, as acting not only as a preventative, but as an additional security in case of injury to her bottom, and also giving steadiness to the boat by acting as ballast. It is in every way a desirable and necessary addition, and in excess of Lloyds requirements.

30. *Extra work laying deck and caulking cabin floor, $165.*—In placing the water-tight flat under cabin it was found that a wooden deck was also required in addition, which was laid in Australian white beech.

31. *Puttying cabin floor, &c., $58.*—Putty was used in cabin and poop deck, being easier to remove when re-caulking may be required and having a much better appearance than pitch. The above amount represents the difference in cost between the two methods.

34. *Brass work for towing bitts, $100.*—These brass castings were substituted on towing bitts in place of cast-iron as being more serviceable and sightly, to prevent chafing. The above amount represents the difference in cost.

(NOTE by Auditor General: Explanations of 16 items under $50 each are omitted in printing this letter.)

This completes the different items constituting the claim for extras in the construction of the steel tug *Petrel,* and I have endeavoured to explain why the additional expense was incurred. I trust, therefore, that the Auditor General will feel justified, in view of the above explanations, in making an early settlement with the Victoria Machinery Depot. It is rather a hardship that they should remain so long unpaid, wherever the fault lies. Mr. Spratt is correct in saying that 'the main items in our extra account have nothing to do with Lloyds or Dominion inspection, but are simply additions ordered by the government,' as he received his orders from me, based either on authority from Ottawa or upon my own responsibility, governed in all cases by a previously written agreement that such additions and improvements would be done for a stipulated sum. I might also add that in the construction of the hull some additional work was done which was not called for by Lloyds rules, and for which no extra charge was made—notably in the case of a stringer of angle iron extending round the after portion of hull midway between water-tight floor and main deck, giving great additional strength and stiffness to this portion of the hull.

Although it has no material bearing on the case, I am speaking advisedly in stating that the *Petrel* could not be duplicated to-day under $40,000, and were the Dominion government desirous of selling, I am assured the full contract price, including extras, could be obtained for her. I only mention this to show that in her construction the additions, &c., enumerated were true economy, and enhance her present value as a staunch and seaworthy boat.

I trust the above explanation and remarks may be conclusive and to the satisfaction of the Auditor General.

I am, sir, your obedient servant,

The Auditor General. G. A. KEEFER, *Resident Engineer.*

AUDIT OFFICE, OTTAWA, September 24, 1907.

SIR,—Let me acknowledge receipt of your letter of September 19, 1907, inclosing a copy of Engineer Keefer's report of September 11, concerning extras on the tug *Petrel*.

The discussion appears to be now much nearer a satisfactory conclusion, since Mr. Keefer has withdrawn his statement that the changes were necessary to bring the vessel up to Lloyds standard.

It was this part of the specification, namely, the paragraph relating to Lloyds and the Canadian Board, which my letter of July 4 characterized as 'as plain a specification as ever emanated from the Department of Public Works':—not the whole specification, as Mr. Keefer erroneously supposes, and against which he strenuously remonstrates.

The only difficulty which I now find, is an idea which perhaps should have occurred before, but which has been brought out by the discussion now in progress. It is, that a civil engineer, even of the highest qualification and prominence, is not necessarily an expert in vessel construction.

It would be preferable to have certificates from the two authorities mentioned in the specification, that is to say, Lloyds and the Canadian Marine Board.

These certificates should cover two facts: 1st. That the vessel is up to standard; and 2nd. That the vessel would have been up to standard without the extras. Any extras which cannot be so certified will need to be deducted.

Since officers of these two boards were frequently present while construction was going on, they will not take long to report. Perhaps this part of the business can be arranged by telegraph.

In the meantime, the application for $7,949.43 is not now with us, but with the Department of Public Works. If you make an application for say $5,000 on account, it will be passed without delay, as there is doubtless that sum due to the company. The balance of $2,949.43 will be released when satisfactory certificates are produced as indicated above.

While Mr. Keefer's error of March 4, in stating that the alterations were necessary for Lloyds standard, was pardonable in one who lacks experience in vessel construction, I do not understand how he came to persist in that error, by upholding it in his letter of May 10. He should then have made the investigation which resulted in his subsequent conversion of September 11.

Neither do I understand how Mr. Keefer and the department were able to contend that the extras, if necessary for Lloyds' standard, should be paid as an addition to the contract-price.

I am, sir, your obedient servant,

The Department of Public Works. J. FRASER, *A.G.*

(NOTE by Auditor General, October 8, 1907: The sum of $2,949.43 has not yet been paid.)

Telegraph to P.E.I.: Anglo-American Telegraph Co.

AUDIT OFFICE, OTTAWA, January 12, 1907.

SIR,—Let me call your attention to page 1294 of Unrevised *Hansard* of January 11, 1907, where Mr. Martin (of Queen's, P.E.I.), stated that the Anglo-American telegraph cable between Prince Edward Island and the mainland has been out of order for some time.

This company draws an annual subsidy of $1,946.66 from the Dominion government, for the maintenance of communication across Northumberland strait.

The dates of hiatus in through communication should be ascertained and recorded; and a proportionate part should be deducted from the subsidy when payment becomes due.

You will find this subject discussed at pages C—395 to C—398 of the Auditor General's Report for 1892-3.

I am, sir, your obedient servant,

The Department of Public Works. J. FRASER, *A.G.*

DEPT. OF PUBLIC WORKS, OTTAWA, January 25, 1907.

DEAR SIR,—I have to acknowledge the receipt of your letter of the 12th instant in reference to the subsidy payable to the Anglo-American Telegraph Company, Limited, for the maintenance of telegraphic communication between Prince Edward Island and the mainland.

The subsidy now drawn by the company, under a new agreement made in 1904, is $7,000 per annum and not $2,000, as was the case for many years past.

The matter of the withdrawal of any part of the subsidy is now engaging the attention of the department.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

H. E. Vautelet : Plans for St. Andrew's Dam.

CHIEF ENGINEER'S OFFICE, OTTAWA, April 2, 1907.

SIR,—I have to inform you that the plans of the superstructure of the proposed dam at St. Andrews have been completed by Mr. Vautelet, and delivered to me here. Mr. Vautelet is therefore entitled to a further payment on account of his services for the making of these plans, at the rate of 5 per cent agreed upon and sanctioned by the Hon. the Minister. The estimated cost of the work is placed at about $300,000, and Mr. Vautelet will therefore be entitled to $15,000 for his work. Out of this sum, Mr. Vautelet has already received $5,000, and I now beg to recommend that a further payment of $5,000 be made to him, leaving a balance of $5,000 still due him, but which will only be paid to him upon the receipt of the tenders.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. EUGENE D. LAFLEUR, *C.E.*

AUDIT OFFICE, OTTAWA, April 6, 1907.

SIR,—Let me acknowledge receipt of your application No. 626 for $5,000 in favour of Mr. H. E. Vautelet of Montreal, being a third payment on account of $15,000 for

plans of a $300,000 superstructure for the St. Andrews Dam. (The first two payments were made by your departmental cheques.)

There should (I think) be an order in council for an arrangement of this magnitude. If one has already been obtained, please have a copy furnished to this office.

In making a large payment outside of the department, for services similar to those generally performed by the departmental officials, it would be well to give an explicit statement of the reasons for so doing—whether lack of time in the department, or extra technicality in the work under discussion.

The rate of 5 per cent should be certified by the Chief Engineer as 'fair and just.'

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

(NOTE by Auditor General: This sum of $5,000 was paid April 9, 1907, on account of this and the following service.)

H. E. Vautelet : Plans for Quebec Harbour Shed.

CHIEF ENGINEER'S OFFICE, OTTAWA, April 2, 1907.

SIR,—I have to inform you that the plans for the proposed Quebec shed have been completed by Mr. Vautelet and delivered to me here. Mr. Vautelet is therefore entitled to a further payment on account of his services for the making of these plans, at the rate of 3½ per cent agreed upon and sanctioned by the Hon. the Minister. The estimated cost of the work is placed at about $350,000, and Mr. Vautelet will therefore be entitled to $12,250 for his work. Out of this sum, Mr. Vautelet has *already received* $3,000, leaving a balance of $9,250 still due him, and I would beg to recommend that a further sum of $5,000 be paid to him, leaving a balance of $4,250, which will be paid to him upon the receipt of the tenders.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. EUGENE D. LAFLEUR, *C.E.*

AUDIT OFFICE, OTTAWA, April 6, 1907.

SIR,—Let me acknowledge receipt of your application No. 627 for $5,000 in favour of Mr. H. E. Vautelet, of Montreal, being a second payment on account of $12,250 for plans of a $350,000 shed at Quebec harbour. (The first payment was made by your departmental cheque.)

There should, I think, be an order in council for an arrangement of this magnitude. If one has already been obtained, please have a copy furnished to this office.

In making a large payment outside of the department, for services similar to those generally performed by the departmental officials, it would be well to give an explicit statement of the reason for so doing—whether lack of time in the department, or extra technicality in the work under discussion.

The rate of 3½ per cent should be certified by the chief engineer as 'fair and just.'

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

AUDIT OFFICE, OTTAWA, May 14, 1907.

SIR,—Let me call your attention to my letter of April 6, on the subject of application No. 627, for $5,000 in favour of H. E. Vautelet, chargeable to 'Quebec harbour, capital.'

No reply has been received to the letter in question.

Since the fiscal year 1906-7 will be closed to-morrow, the application is returned to you herewith, to be replaced by an equivalent one for 1907-8.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, July 23, 1907.

SIR,—In reference to your letter of April 6, concerning an application for $5,000 in favour of Mr. H. E. Vautelet, I beg to state that the reason why no answer was sent to that and your previous letter was because the matter was taken into consideration by the acting minister and that no decision was arrived at.

The matter is still pending for further consideration owing to the absence of the Minister.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

(NOTE by the Auditor General, Oct. 8, 1907: This sum of $5,000 has not yet been paid.)

Emile Lacas : Omitted from Pay-list.

AUDIT OFFICE, OTTAWA, July 9, 1907.

SIR,—Let me acknowledge receipt of a voucher for $129.16 in favour of Emile Lacas, for services as clerk during the month of June, at $1,550 a year.

Please explain why his name was omitted from the regular pay-list.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, July 10, 1907.

SIR,—In reply to your letter of the 9th, concerning the omission from the regular pay-list of the name of Mr. Emile Lacas, for the month of June, I beg to inform you that for some months previous, Mr. Lacas was absent on leave *without pay,* and his salary cheque was, therefore, not issued to him for those months.

When the list for the month of June was presented to me, as I had not been made aware of the return of Mr. Lacas to his duties, I suspended the payment until I would be better informed, the pay-list, meanwhile, going to be approved in order not to retard the other employees. Subsequently, I ascertained that Mr. Lacas had been at his work during the month of June, and his account was, therefore, certified and allowed to go in for payment.

Yours very truly,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, September 11, 1907.

SIR,—Let me acknowledge receipt of your letter concerning the June pay of Mr. Emile Lacas.

Mr. Lacas, who draws $1,550 a year, is, I understand, at the head of one of the Photographic Branches of the Public Works Department.

I am obliged to understand from your letter that, in practice, a responsible officer of this grade can come and go without informing his Deputy Minister; this impression being probably erroneous, and not intended to be conveyed by you.

I would like to be able to publish, along with your letter, if left on record, a description of the evidence by which you ascertained in July that Mr. Lacas had been at his work all through June.

It would probably simplify the question if Mr. Lacas' attendance-book were forwarded to this office.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, September 16, 1907.

SIR,—With reference to your letter of the 12th instant, concerning the June pay to Mr. Emile Lacas, I beg to state that I certainly did not express myself properly if my letter gave you to understand that I was not aware of Mr. Lacas' absence on leave without pay until July. An application was made for that leave under the endorsation of the chief engineer, for whose office Mr. Lacas especially works, and that is the reason why for some months no salary cheque was issued to Mr. Lacas.

I was somewhat absent from the office on duty on several occasions during the months of June and July, and as, otherwise, the departmental work engaged all my attention, I did not follow, and I suppose I am not expected to follow, as closely as I would otherwise, the date of the return of employees on leave. Before ordering the issue of a certificate in favour of Mr. Lacas, however, I made inquiries in the department and from the chief engineer, and found that Mr. Lacas had been in the office and at work during the time for which his salary was certified.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, September 18, 1907.

SIR,—Let me acknowledge receipt of your communication of September 16, *re* Mr. Emile Lacas.

As suggested in my letter of September 11, I would like to see Mr. Lacas' attendance-book.

This book, being kept as prescribed by section 105 of the Civil Service Act (Revised Statutes, 1906, chapter 16), is the natural reference on the subject of daily attendance.

The evidence of the chief engineer, whom you consulted, is subject to the two difficulties mentioned in your own case, namely, pressure of more important affairs, and frequent absence from Ottawa.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

(NOTE by Auditor General, October 8, 1907: Mr. Lacas' time-book has not yet been received, and the payment is still withheld).

F. X. R. Saucier : Translating Specifications.

AUDIT OFFICE, OTTAWA, March 26, 1907.

SIR,—Attention is hereby called to recent payments to Mr. F. X. R. Saucier, as follows:—

P—16989: Translating specification, combined breakwater and wharf at North Head, Grand Manan, N.B.: 11·09 pages, at $1.50	$16 63
P—17028: Translating specification, extension to eastern breakwater at Mispec, N.B.: 7·26 pages, at $1.50	10 89

When piece-work is given outside of the department, there should be a certificate that the existing departmental staff is unable to perform it, either from lack of qualifications or from lack of time.

The regulations prescribing orders in council and audit before payment for all clerical services connected with the department, do not make an exception when remuneration is by piece-work instead of by time. It would be better to have these accounts conform to the usual practice.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

Winnipeg Post Office: Change in Stone.

AUDIT OFFICE, OTTAWA, October 16, 1907.

SIR,—Let me acknowledge receipt of your application No. 484 for $41,630 in favour of Kelly Bros. & Co., being estimate No. 8 on Winnipeg post office.

There is a new bill of extras for $23,325 on account of 'changing stone from 'Selkirk to Ohio stone,' in support of which the following offer from Kelly Bros. & Co. is attached:—

Cleveland stone: 25,000 cub. ft., at $1.05	$26,250	
Profit of 10 per cent	2,625	
		$28,875
Tyndall stone: 25,000 ft., at 27 cents	$ 6,750	
Profit, 10 per cent	675	
		7,425
		$21,450
Tyndall stone cut at present: 1,500 ft., at $2.50		3,750
		$25,200

Since the main contract for $529,485 was sanctioned by order in council, there should be the same authority for such an important alteration.

What change was made in the calculation of $25,200 to reduce it to $23,325?

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

Re **Telegraph Revenue.**

PUBLIC WORKS DEPT., OTTAWA, December 13, 1906.

SIR,—I have caused the officers of the telegraph branch of this department to look into the matters contained in your letter of December 1, concerning the telegraph revenue.

As regards the first paragraph of your letter, I beg to state that we hope that when the accounts come to be closed next year, all the revenue for the preceding year shall have been brought to account. I am now informed that shortly after September 15 last, most of the deposits came to hand for all the offices which had not sent them.

With reference to paragraph No. 2, I am informed that of the $500 of the revenue on North Shore E. B. accrued to June,, $325 of deposit and transfer have since come to hand, leaving a balance of $165 which, I understand, is to be more than covered by transfer entries to pay for salaries, &c.

Re paragraph No. 3, the arrears on the Yukon line, amounting to $2,598.90, were deposited and received here in July and August last. Please see on that account July statements. The sum of $1,167, C.P.R. telegraph transfers, were collected and deposited by the Northwest and British Columbia lines.

As regards the fourth paragraph, I am informed that the sum of $87.82 was really deposited on May 2, 1906, under Winnipeg receipt No. 1536, which amounted to a total of $727.07, made up of two sums of $639.25 and $87.82.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, January 23, 1907.

SIR,—In your letter of October 8 last you stated that the re-arrangement that had been made in the duties of the telegraph branch will cause the work to go in the future quite satisfactorily.

I now beg to submit a memo. showing the returns and cash received from the several lines to date, which I cannot say is quite satisfactory.

I would call particular attention to Kamloops, Nicola and Penticton and North Shore W.B., from which lines neither returns nor cash have been received; and from Escuminac and Quarantine, from which returns for three months have been received, but no cash; also North Shore E. B., from which no returns, and but $114.98 in cash have come to hand. From the Northwest lines cash for only two months has been received and no returns; and from the Yukon lines $37,986.94 has been received, but no returns.

One of the most important points in connection with the management of any revenue is to watch closely that the several officials promptly deposit their receipts. Seemingly some of the officials employed on telegraph business are not doing so.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, March 9, 1907.

SIR,—In a letter from this office, dated February 24, 1904, your attention was called to an amount of $610.27 standing against the Department of Interior in the Atlin-Dawson division of Yukon telegraph lines. You were again written to, on

August 8, 1904. In your reply you stated that Mr. Rochester had been written to and requested to arrange the matter with the officials at Dawson. This amount is still outstanding. A clerk from this office who was in Dawson last summer, was informed that the account was in connection with the election of J. J. Ross in 1902.

Some action should be taken, without delay, to have this account liquidated.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, March 9, 1907.

SIR,—The responsibility of checking and adjusting the returns from the different telegraph offices rests with your department.

Mr. Phelan, the district superintendent of Yukon telegraphs at Ashcroft, informed a clerk from this office that the returns from the various offices in each division are checked with one another in his office, but the returns from the offices in one division are not checked with the returns from the other divisions.

I understand that no such check is made in the department.

It is most essential that this work should be done, not only for the Yukon lines, but also for all telegraph returns.

It rests with you to determine whether it should be done in your department or in the offices of the district superintendents.

Your early attention is requested.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, June 22, 1907.

SIR,—In your letter of December 13 last, you stated that you hoped when the accounts came to be closed next year, all the revenue for the preceding year would have been brought to account.

The accounts for the fiscal year ended March 31 last, have now been closed, and quite a large amount of the revenue accrued has not been brought to account.

The following offices are in arrears:—

Magdalen Islands, last month accounted for October.
Kamloops, Nicola and Penticton, last month accounted for December.
Anticosti, last month accounted for December.
North Shore, W.B., last month accounted for January.
Alberni and Cape Beale, last month accounted for February.
Alberni and Clayoquot, last month accounted for February.
Golden and Windermere, last month accounted for February.
Nanaimo and Comox, last month accounted for February.
Vancouver and Salt Springs, last month accounted for February.
Victoria and Cape Beale, last month accounted for February.

No returns have been received from the offices on North Shore, E.B., which report directly to your department. The revenue accrued from these offices in 1905-6 amounted to $1,412.63. Proportionally for the 9 months of 1906-7 the revenue should

be over $3,000. The total amount that has come to account was $1,814.01, of which $582.17 was outstanding from the previous year, leaving $1,231.84 accounted for out of a probable revenue of $3,000.

The returns from the Yukon for March have not been received. When they come to hand, I may have occasion to write you in reference to them.

It seems to call for some explanation why all the revenue accrued previous to March 31 last has not yet been brought to account, especially from the four first named offices and from North Shore, E.B.

Owing to the unsatisfactory condition of this revenue account, I consider it my duty to refer the matter to the Treasury Board.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

Re Telegraph Revenue, North Shore, W. B.

AUDIT OFFICE, OTTAWA, June 22, 1907.

SIR,—The last return from the superintendent of the telegraph offices on the north shore of the St. Lawrence, west of Bersimis, accounted for is that for January last.

I have written you in separate letter about this and other offices in arrears.

The return for the month of November last amounted to $339.21. In acquittance the following statement is made:—

Amount to be retained by department in remitting to cover the maintenance accounts.

For Quarantine, October, 1906	$156 20
For North Shore, November, 1906	183 01

The latter amount has come to account, the former has not.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, October 2, 1907.

SIR,—I regret to state that the accounts in reference to telegraph revenue are still in a most unsatisfactory condition.

The accounts for 1906-7, which ended on March 31, were closed on June 20. The returns show that when the books were closed there was $6,321.47 of the revenue accrued previous to March 31, which had not come to account. Of this amount there has since been received and credited to current fiscal year $5,568.75, leaving $752.72 still outstanding, as follows:—

Golden & Windermere	$ 45 23
North Shore, E. B.	389 43
North Shore, W. B.	235 56
Northwest Lines	82 50
	$752 72

From Godbout one of the offices of the North Shore, E. B., no returns were received since December last, and no deposits came to account during the year.

From Magpie only returns to end of February were received.

I would call particular attention to the following offices of the North Shore, E. B., in addition to the above:—

Mingan	$44 80	still in arrears.
Moisie East	16 97	"
Pentecost	76 70	"
Seven Islands	103 68	"

There is a district superintendent for the North Shore W. B., yet the accounts are not satisfactorily handled. I understand he is also engaged with another telegraph company.

There is no district superintendent for the offices east of Bersemis.

If you had a competent superintendent for all the offices on the North Shore, who would devote all his time to his duties, it would no doubt be more satisfactory.

I may add that no returns appertaining to the current year have yet been received.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, June 22, 1907.

SIR,—For years past there has been considerable delay in bringing to account the receipts from telegraph revenue.

When the accounts of 1905-6 were closed there was outstanding $10,168.38 of the revenue accrued previous to June 30, 1906.

Returns have not yet been received from all the offices to March 31 last, and I am unable to state the amount in arrears.

I inclose herewith copy of a letter to the Deputy Minister of Public Works which indicates that there is a large amount of the revenue accured previous to March 31 last still outstanding. The deputy minister has been written to from time to time for years past as to the unsatisfactory condition of this account.

Under the circumstances, I deem it proper to report the matter to the Treasury Board.

I am, sir, your obedient servant,

The Secretary, Treasury Board. J. FRASER, *A.G.*

FINANCE DEPT., OTTAWA, July 11, 1907.

SIR,—I have the honour to acknowledge the receipt of your communication of the 22nd ultimo, in reference to above, addressed to the secretary of the Treasury Board.

At a meeting of the Board held on the 9th instant, your communication was read, and by direction of the Board the Department of Public Works was communicated with to-day in reference thereto. I inclose a copy of the letter referred to.

I am, sir your obedient servant,

The Auditor General. HENRY T. ROSS, *Acting Secy. of Treasury Board.*

FINANCE DEPT., OTTAWA, July 11, 1907.

SIR,—By direction of the Honourable the Treasury Board, I am requested to direct your attention to the matter of the delay in bringing to account the receipts from telegraph revenue. In pursuance of his intimation to you of the 22nd ultimo, the Auditor

General has reported the matter to the Treasury Board. The Board would be glad to be advised that steps will be taken to remedy the condition of things to which the Auditor refers.

I am, sir your obedient servant,

Deputy Minister of Public Works. HENRY T. ROSS, *Actg. Sec., Treas. Board.*

PUBLIC WORKS DEPT., OTTAWA, July 18, 1907.

SIR,—I beg to acknowledge receipt of your letter of July 11, concerning the receipts from our telegraph revenue.

Will it be possible for you to send me a copy of the reference for the Auditor General, in order that I may see to what section of our telegraph system he particularly refers?

With regard to one part of our British Columbia line, where the returns are somewhat in an unsatisfactory state, I am sending our accountant there at once to look into the matter, and I trust that before many weeks have elapsed, the whole returns shall have been brought to a satisfactory state.

Believe me, sir, yours very truly,

HENRY T. ROSS, Esq., Act. Secy., Treasury Board. A. GOBEIL, *D.M.P.W.*

FINANCE DEPT., OTTAWA, July 19, 1907.

DEAR SIR,—Referring to yours of yesterday's date, respecting telegraph revenue account, I am inclosing you herewith copy of a communication of the 22nd ultimo of the Auditor General to the Treasury Board. The copy of the letter to yourself referred to by the Auditor General, bears date June 22, 1907, and as you already have that letter, a further copy of it is unnecessary.

I shall be glad to report to the Treasury Board the action taken in reference to the British Columbia lines.

I am, yours sincerely,

Deputy Minister of Public Works. HENRY T. ROSS, *Actg. Sec., Treas. Board.*

Re **Wharfs and Piers.**

AUDIT OFFICE, OTTAWA, June 7, 1907.

SIR,—I have again to call your attention to the delay in transferring to the control of the Department of Marine and Fisheries, the wharfs constructed by your department.

While these wharfs remain untransferred, no revenue is collected from them, at least none comes to account.

I have to ask for a statement of all wharfs completed and not transferred, showing the year in which constructed, and an explanation of the delay in transferring.

I also desire to know what action you purpose taking in reference thereto.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

Sorel Deep Water Wharf—McAuliffe, Poupore, Malone and Weddell.

(Received too late for publication at page V—296.)

Extract of Order in Council, October 25, 1907, Public Works.—On a memo. dated October 23, 1907, from the Minister of Public Works, submitting that he has had under consideration a claim of Messrs. McAuliffe, Poupore, Malone and Weddell, for extra dredging at Sorel in connection with the construction of a dock at the mouth of the Richelieu river opposite the city of Sorel, under contract between the claimants and His Majesty, dated June 25, 1901.

The minister states that by the specifications the contractors were to dredge over the whole of the area shown on the plan to a depth of thirty feet at extreme low water. The contract provided for payment of a lump sum of $255,632.43 for the entire work.

It appears from the report of the Chief Engineer of the Department of Public Works, dated April 1, 1905, that the quantity of dredging in situ when the estimate for this work was prepared by Mr. Arthur St. Laurent, for the Department of Public Works, was found to be 506,650 cubic yards, the slopes being assumed to be two horizontal to one vertical. When the work was performed, however, the slopes were found to be four horizontal to one vertical, necessitating extra dredging to the amount of 27,652 cubic yards in situ, and payment of this amount is recommended by the chief engineer in the report referred to at the rate of 25 cents per cubic yard, making $6,913.

The second item of the claim, payment of which is also recommended by the chief engineer, is for an additional depth of nine inches in the dredging performed, being 47,400 cubic yards in situ, at 25 cents per cubic yard, making $11,850.

The recommendation of the chief engineer for payment of this amount is based on the fact that according to soundings taken by the resident engineer, Mr. L. G. Papineau, after the work was completed, it was ascertained that an average additional depth of 18 inches below grade had been made over the whole area. The chief engineer states in his report that it is always understood that a certain allowance must be made by the contractors for dredging to a greater depth than that required when the work is completed, in order to provide for any silting-in that might occur during the progress of the work; but he also says that an additional depth of 18 inches over the whole work is more than the contractors would have had to make, in order to leave the finished work at the required depth of 30 feet at extreme low water. He is, therefore, of opinion that half the additional depth made by the contractors, namely, 9 inches, might be fairly allowed to them as additional dredging, as it would prevent the dredged area from requiring to be further dredged for a certain time, it being proved that silting-in occurred during the progress of the work.

One-half of the total dredging below the required depth of 30 feet is estimated by the chief engineer at the above quantity of 47,400 cubic yards.

The third item of the claim, payment of which is also recommended by the chief engineer, is additional quantity due to silting-in of the dredged area—63,166 cubic yards, at 25 cents per cubic yard—$15,791.50.

From the report of the resident engineer it appears that the estimated quantity of material in situ, as per plans, to be dredged being 574,400 cubic yards, and the quantity actually dredged, as represented by the contractors, being 806,320 cubic yards, the difference is 231,920 cubic yards, which at 25 cents per cubic yard, would amount to $57,980, and this would be the value of the dredging actually performed beyond the estimate made by Mr. St. Laurent for the Department of Public Works before the commencement of the work.

From the papers on file in the Department of Public Works, it appears that the late Minister of Public Works in 1906 decided to act upon the recommendation of the Chief Engineer, and made application to the Auditor General for payment of $25,000

on account of the $34,554.50. The Auditor General, in a communication of January 13, 1906, stated that against the payments for extra slopes and depths he was not at the present prepared to make any objection; but that unless the contract time was greatly extended to suit the Government, and not the Contractor, the silting might have been foreseen by all the tenderers, and that it would not be a matter for additional compensation.

Subsequently the said claim was referred by the then Minister of Public Works to the Minister of Justice for consideration, but no action was taken thereon by the Minister of Justice, who has now returned the papers bearing on the claim to the Department of Public Works, stating that in his opinion it is a matter for the Department of Public Works to deal with.

The Minister concurs in the opinion of the Chief Engineer that it would be proper to make payment of the first two amounts of $6,913 and $11,850, making together the sum of $18,763.

As to the third item of $15,791.50, however, being the cost of dredging the material which silted in during the progress of the work, the undersigned is unable, as at present advised, to adopt the view of the chief engineer as to this being a claim which can properly be recognized.

Every contractor for dredging-work must anticipate that there will be a certain quantity of silt washed into the excavated area, and unless some extraordinary circumstances have occurred to cause a silting-in to an extent which could not reasonably have been foreseen, the Minister of Public Works is inclined to the opinion that the risk in respect to re-dredging caused by accumulation of silt is assumed by a contractor who undertakes to dredge a specified area to a specified depth for a lump sum.

The first two items stand in a different position. The slope of 4 to 1 instead of 2 to 1, as shown in plan, necessitated extra dredging, and the additional depth below the 30 feet was work beneficial to the public, and would result in saving the necessity for so much dredging subsequently, by reason of the silting-in, which, as the chief engineer observes, undoubtedly occurs at the site of this work.

The Minister therefore recommends payment to the said contractors of the said sum of $18,763.

The Minister submits copies of the reports and correspondence bearing on the whole claim, for the information of the Committee of the Privy Council.

The committee submit the same for approval.

R. BOUDREAU, *C.P.C.*

AUDIT OFFICE, OTTAWA, November 4, 1907.

SIR,—I have just received a copy of the order in council of October 25, 1907, concerning the claim of McAuliffe, Poupore, Malone & Weddell for extra work on the Sorel deep water wharf.

The Minister's recommendation quotes the chief engineer's allowance of $15,791.50 for silting, and the objections by the Audit Office to the payment of the same.

The Minister then goes on to say: 'As to the third item of $15,791.50, being the cost of dredging the material which silted-in during the progress of the work, the undersigned is unable, as at present advised, to adopt the view of the chief engineer as to this being a claim which can properly be recognized.' The reason given by the Minister for disallowing the claim is, that all the tenderers could have foreseen silting; and therefore that the risk is assumed by a contractor who undertakes to dredge a specified area to a specified depth for a lump sum.

It might be well to evolve from this a general rule for the interpretation of specifications, and ask the chief engineer to enter it into his Book of Precedents.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

Cement: Quantity in Barrel not mentioned.

AUDIT OFFICE, OTTAWA, March 7, 1907.

SIR,—In the expenditure for 'St. Ours lock,' in 1906-7, there is a payment (No. 5372) of $1,142.40 to W. McNally & Co., for 560 barrels of Johnson's Portland cement, at $2.04, delivered in bags.

No information is given on the face of the voucher, as to the quantity contained in each barrel or bag; and this has been a usual defect in the past.

Since each brand has probably a standard-sized barrel, the name of the brand may be a sufficient guide to experts; but for audit purposes it would be preferable to have the number of pounds explicitly stated.

Please see that all future cement vouchers contain this information.

Also, in closing up each work, there should be a statement accounting for the empty bags. These appear to be generally valued at ten cents each when undamaged.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. FRASER, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, March 14, 1907.

SIR,—In reply to your letter of the 7th March instant, *re* cement purchased for St. Ours lock in 1906-7, from W. McNally & Co., I am, by direction, to say that according to the departmental standard specification for Portland cement, all barrels must contain at least 350 pounds, or 87½ pounds per bag.

Canal officers will be instructed to see that the weights of the barrels are marked on all invoices in future.

With reference to the return of empty bags, 'credit notes' are sent in for all undamaged bags so returned, and these are placed to the credit of the respective works.

I am, sir, your obedient servant,

The Auditor General. L. K. JONES, *Secretary.*

Cement-testing by Public Works Official.

AUDIT OFFICE, OTTAWA, September 6, 1907.

SIR,—Let me call your attention to your cheque No. 6992 of 1906-7 in favour of Geo. E. Perley, of the Cement-testing Laboratory in the Public Works Department.

The bill is for cement-tests between October 30, 1905, and December 10, 1906, on materials to be used by the Railways and Canals Department.

The time of Mr. Perley and his staff is fully paid for by the Public Works Department; and his machinery has probably all been bought by that department, as well as the materials used up in testing.

It seems, therefore, an unavoidable inference that the cheque for $142 should have been drawn in favour of the Receiver General, instead of in favour of Mr. Perley.

Please see that future similar transactions are handled in this manner.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, October 10, 1907.

SIR,—In further discussion of my letter of September 6 concerning payments by your department to a Public Works official for cement testing:—

Mr. Geo. E. Perley, the official in question, has made me an oral explanation of some aspects of the case, which he considered essential for its proper understanding.

Mr. Perley states that the canal cement is all tested outside of his regular office hours, and that he pays his assistants for all their overtime.

He also explains that when tests are needed at the same time by both departments the canal work is dropped at the beginning of the official day and resumed at its close.

I am, of course, not expected to know or say whether this latter feature of the arrangement is favourable to the quality of the work done. My objections are confined to the accounting side.

The Public Works machinery is used without compensation, and probably other government materials are consumed. Also, the testing is carried on in a government office. If the same procedure is to be continued in future, it should be made plain on the vouchers that the prices are lower than outside prices, by a difference enough to compensate for these perquisites.

Moreover, there should be a written permission from the Public Works Department, allowing Mr. Perley to dispose in this manner of his surplus time and energy. At page 354 of the Auditor General's Report for 1883-4 will be found the remark: 'The controlling principle of all past legislation on the subject of extra pay has been 'that continuous work after regular hours impairs the efficiency of an officer at the 'work for which is paid in the first instance.' At page B—337 of the Auditor General's Report for 1889-90 it is shown that while a $1,440 engineer was earning $1,550 of extra pay by translating for another department, a large defalcation occurred in the portion of the public service which was under his supervision—a defalcation which might have been prevented by him 'if his acumen had not been diverted.'

Allow me to make the suggestion that, if Mr. Perley and his assistants are to test the cement used by all the depaartments, it would be better to have this scope of the cement branch explicityly recognized, even if it involved an increase of the regular staff and a readjustment of salaries. The testers' services would then be fully compensated by their regular pay, and extra remuneration would not be necessary. And all work going through the branch could then be performed continuously, with no fear of interruption by the clock.

I am, sir, your obedient servant,

The Deputy Minister, Rys. and Canals. J. FRASER, *A.G.*

Protection Appliances for Lock Gates.

AUDIT OFFICE, OTTAWA, September 20, 1907.

SIR,—Let me acknowledge receipt, for audit before payment, of a voucher for $4,500 in favour of E. A. Manny, of Beauharnois, for 'lock-gate protection appliances for five locks, at $900,' to be charged to the vote for 'Lachine canal, income: Manny's gate-protection bars, $7,500.'

Please give a list of the different gates on the Lachine canal to which these protection-bars are to be attached; and mention also how far the work of attachment has proceeded, and how much it will cost.

Ten sets of the Manny protection-appliances, at $900 each, were purchased for the Lachine canal in 1903-4 : See page W—14 of that year, under the heading 'Lachine canal, capital: Lock-gate protection.' Several letters on this subject will

be found at pages W—347 and W—348 of the same report. Our correspondence with the department was closed on June 17, 1904, by a telephonic statement from Mr. Schreiber, that the appliances had not yet been attached, but that the employees were then in the act of attaching them.

I would like to have a list of the different gates on the Lachine canal to which the ten sets of bars (bought in 1904) were fastened, as stated by Mr. Schreiber.

In view of the change of chief engineer, there should be a certificate from the present occupant of the position, that the gate-bars are (in his judgment) protective, before they can be charged to the vote for 'protection bars.'

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. FRASER, *A.G.*

MONTREAL, September 27, 1907.

SIR,—In answer to your letter of the 25th instant, with respect to the account amounting to $4,500, in favour of Mr. E. A. Manny, for lock-gate protection appliances for five locks in the Lachine canal.

I have the honour to state that, out of the ten sets of protection bars ordered in 1904, five sets were attached to the locks on the Carillon and Grenville canals, and the five remaining sets are still in store on the Lachine canal.

The reasons why the bars ordered for the latter canal have not so far been utilized is because shortly after they were ordered it was decided to install electric appliances for the operation of the lock-gates here, and it was not thought advisable to proceed with the placing of the bars before the operating machinery was in position.

This electric machinery is now practically completed, and the placing of the protection bars may be gone on with as soon as navigation closes.

The work of attachment will cost about $500 per lock, this amount being provided for in the appropriation for the current year.

The protection bars attached to the Carillon and Grenville canals locks are giving very good satisfaction.

I am, sir, your obedient servant,

The Secretary, Rys. and Canals. ERNEST MARCEAU, *Sup. Eng. Que. Canals.*

AUDIT OFFICE, OTTAWA, October 10, 1907.

SIR,—Let me acknowledge receipt of your letter No. 1452, inclosing a copy of Superintending Engineer Marceau's report concerning the Manny lock-gate protection bars.

There should be an explanation of the origin of the mistake made in June, 1904, when Mr. Schreiber informed this office that the Lachine canal employees were then in the act of attaching the protection bars. The payment of 1904 was delayed until that assurance was received.

Mr. Marceau has overlooked the second paragraph of my letter, which asked for a list of the different gates on the Lachine canal, to which the bars are to be attached. Please have this information supplied.

There appears to be a difficulty in the way of charging 'Lachine canal' with the five protection appliances now in question, when it has already been charged with the previous ten. This difficulty would not have arisen if the ten bars had been used in the manner described in the voucher on which they were paid.

As explained in the last paragraph of my letter of September 20, I would like a certificate from the present chief engineer that these protection appliances are (in his judgment) protective, and therefore properly chargeable against the vote so worded.

I am, sir, your obedient servant,

The Deputy Minister of Rys. and Canals J. FRASER, *A.G.*

Soulanges Canal: Manning & Macdonald: Filling Behind Walls.

(Continued from Page W—332 of 1905-6).

Report to the Treasury Board under section 43, Consolidated Revenue and Audit Act, by the Auditor General and Deputy Minister of Finance, in reference to the refusal of the Auditor General to certify that a cheque of the Minister of Finance may issue for $14,271 in favour of Messrs. Macdonald & Manning, contractors, section 13, Soulanges canal.

1. The contract is dated September 24, 1892.

The parties are Randolph Macdonald, contractor, and Her late Majesty, represented therein by the Minister of Railways and Canals. By an order in council of date April 3, 1897, the transfer of an interest in the contract by the contractor to one Alexander Manning, and the status of the latter in respect thereof were recognized.

2. This claim, *inter alia,* was presented by the contractors June 4. 1902, as claim No. 17, and was in the terms following:—

Stone filling behind walls as provided by paragraph 74 of specification:

Total quantity	63.067	c. yds.
Less returned in estimate	18,972	"
	44,075	"

at 50 cts., amount of claim $22.037.50.

Annexed hereto as exhibit 'A' are the reasons advanced by the contractors for the payment when the claim was presented.

3. Paragraph 74 of the specification is as follows:—

'The filling in behind all masonry walls or other structures shall be executed with 'broken stone, quarry waste, or other selected material arising from the excavations, 'placed in layers and well rammed or otherwise compacted from bottom to top, and to 'the entire satisfaction of the inspector or person in charge. The refuse or stone for 'the purpose shall be taken from any part of section 13, which may be pointed out. 'No claim for extra haul on this account will be allowed.'

And paragraph 24 of the contract is as follows:—

'And Her Majesty, in consideration of the premises, hereby covenants with the 'contractor, that he will be paid for and in respect of the works hereby contracted for, 'and in the manner set out in the next clause hereof the several prices of same follow-'ing, viz.:

23. Stone filling behind walls (paragraph 74), per cubic yard, 50 cts.

4. Paragraph 8 of the contract is as follows:—

'That the engineer shall be the sole judge of work and material in respect of 'both quantity and quality, and his decision on all questions in dispute with regard 'to work or material, or as to the meaning or intention of this contract, and the plans, 'specifications and drawings shall be final, and no works or extra or additional works 'or changes shall be deemed by him to have been executed, nor shall the contractor 'be entitled to payment for the same, unless the same shall have been executed to the

'satisfaction of the engineer, as evidenced by his certificate in writing, which certi-
'ficate shall be a condition precedent to the right of the contractor to be paid therefor.'

By section 1 of the contract the engineer is defined as follows:—

'The word 'engineer' shall mean the chief engineer for the time being having 'control over the work, and shall extend to and include any of his assistants acting 'under his instructions, and all instructions and directions, or certificates given, or 'decisions made by any one acting for the chief engineer, shall be subject to his 'approval, and may be cancelled, altered, modified and changed, as to him may seem 'fit.'

A. J. Grant was the assistant engineer for the government, and the work was performed under his immediate direction.

C. Schreiber was chief engineer.

Mr. Grant reported adversely upon the claim, except 2,212 cubic yards thereof, August, 1903. Exhibit 'B' is a copy of his report.

5. The stone filling behind walls was done during the years 1897, 1898, 1899, and was completed in the latter named year.

The work under the whole contract was completed in 1900. (Pinhey's sketch of the progress of the work.)

Sections 26 and 27 of the contract provide that if the contractor considers he has claims which are not included in the progress estimates he shall make and repeat such claims in writing within 14 days after progress certificates are issued to him.

6. No claim in respect of the amount in dispute was made from time to time as required by these sections, and September 20, 1904, an order in council was passed waiving in this behalf the provisions of the sections hereinbefore set out. (See page W—338, Auditor General's Report, 1903-4.)

7. Subsequently in December, 1903, Mr. Schreiber instructed Mr. Grant to allow certain parts, specifying them, of the filling comprised in the total of 44,075 cubic yards in the original claim.

On January 7, 1904, Mr. Grant made the necessary calculations on the basis of the instructions, and allowed the claim at net 28,542 cubic yards, which at 50 cents per yard is $14,271, the amount now in issue.

8. August 8, 1904, the chief engineer (Mr. Schreiber) made application to the Auditor General, No. 728, in favour of Messrs. Manning & Macdonald for payment of this $14,271.

9. On June 23, 1905, Mr. Grant certifies as follows:—

OTTAWA, ONT., June 23, 1905.

Soulanges Canal—Section 13—Memorandum of Contractors' claim taken exception to by Auditor General.

* * * * * *

Item 17. Selected material behind walls.

From 2 to 4 feet of dry stone was placed behind the retaining walls, the balance of the selected material on completion of the lock-walls was taken in cars from the bottom of the canal, being a mixture of boulder clay and rock excavation in a wet condition, which caused it when dropped from the cars to consolidate and form a compact mass from top to bottom as called for by the specification, paragraph 74.

* * * * * * *

As previously stated, I consider the claims fairly established and the price allowed is fair and just.

(Sgd.) ALEX. J. GRANT.

10. July 27, 1905, the late Auditor General refused, after an examination of Mr. Grant, to certify that a cheque might issue for this $14,271. (See Auditor General's Report, 1904-5, p. W—379, inw hich the Auditor gives reasons for refusal.)

11. August 5, 1905, the present Auditor General referred the matter in dispute to C. E. Keefer, C.E., for opinion. Mr. Keefer, August 17, 1905, gave it as his opinion that the contractors were entitled to some remuneration, but not on the basis claimed. Mr. Grant disagreed with Mr. Keefer's conclusions, holding to the opinion as expressed in paragraph 9. (See Auditor General's Report, 1904-5, pp. W—380-381.)

12. On October 22 and 27, 1906, M. J. Butler, Deputy Minister of Railways and Canals, addressed the Auditor General urging payment of the claim on the grounds stated in his communications. (See Auditor General's Report, 1906, pp. W—330-331.)

13. Attached hereto as exhibit 'C' is a copy of Mr. Grant's letter of November 23, 1906, giving a history of the case, which on November 26, 1906, was forwarded to the Auditor General.

14. Under date of December 20, 1906, a precis of the case, addressed to the Auditor General, was made by Mr. Hayter of the Auditor General's office. The same is attached hereto and marked exhibit 'D.'

15. Under the same date a letter was written by the Auditor General to the Deputy Minister of Railways and Canals, which, among other things, invited Mr. Butler's judgment as chief engineer, upon this issue, instead of relying upon the certificate of his predecessor. Exhibit 'E.'

16. Annexed hereto marked exhibit 'F,' is Mr. Butler's reply of December 22, declining to reopen the question, on the ground that it had been disposed of by his predecessor.

17. On December 29, 1906, the Auditor General further discusses the claim in a letter to the Deputy Minister of Railways and Canals, and concludes, inasmuch as the latter declines to take the question up *de novo*, to revert to the decision of his predecessor; and he refuses to certify accordingly. Letter marked exhibit 'G.'

18. On March 19, 1907, the Department of Railways and Canals referred the matter in issue to the determination of the Treasury Board.

T. C. BOVILLE,

Deputy Minister of Finance.

FREDERICK HAYTER,

For Auditor General

Exhibit 'A.'—Contractors' Reasons for Claiming Payment.

The reason for claim No. 17 is that all filling behind walls or other structures as provided for by paragraph 74 of specifications should have been included in the item (No. 23 of the contract) for stone filling behind walls. This has not been done by the department.

Paragraph 74 of specifications is as follows:—

'The filling in behind all masonry walls or other structures shall be executed with broken stone, quarry waste, or other selected material arising from the excavations placed in layers and well rammed or otherwise compacted from bottom to top and to the entire satisfaction of the inspector or person in charge. The refuse or stone for the purpose shall be taken from any part of section 13 which may be pointed out. No claim for extra haul on this account will be allowed.'

This paragraph described a certain work to be done, stating the various classes of material that may be used in the work, the manner of work, and that such filling is to be done to the satisfaction of the inspector or person in charge.

Paragraph 23 of specification further described the filling in rear of concrete walls on top of the cribs as follows: Above which the earth on top of them and in

rear of the concrete wall described hereafter shall be laid on in thin layers and solidly rammed up to the level of 161 feet above datum.

All such filling in behind masonry walls and other structures was carried on under the orders of the engineer in charge and to his satisfaction.

The total quantity of such filling in behind walls, &c., is 63,067 cubic yards.

Our price, 50 cents per cubic yard, for said item 23 is for all such filling in behind masonry, &c., as described in paragraph 74, to which paragraph this item refers.

We, therefore, claim that we should be paid for this amount of 63,067 cubic yards at our contract rate of 50 cents per cubic yard, for stone filling behind walls, less what has already been allowed. This claim amounts to the sum of $22,037.50.

Exhibit 'B.'—Mr. Grant's Report, August, 1903, Adverse to Claim.

Claim No. 17. Stone filling behind walls, as provided for by paragraph 74 of specifications. . . . . $22,037.50.

Under this item the contractors claim that the whole of the filling between the back of all the masonry walls and the excavation slopes of their foundations should have been paid for under item 23 of the schedule attached to their contract, and furthermore that all filling on top of the cribwork of the entrance piers in rear of the concrete walls should also be paid for under item 23, see clauses 74 and 23 of the specifications.

The stone filling and other selected material paid for under item 23 of the schedule attached to the contract is for the purpose of explanation divided into three parts.

1st. All the filling not otherwise paid for in rear of the south wall of the lock and its extension walls for bridges.

2nd. The stone filling varying from 2 to 4 feet in width placed in rear of the retaining walls forming the entrance pier, and splay walls leading up to the end of the lock.

3rd. A small cross-section of 54 square feet area of selected material placed in layers in rear of the concrete walls on the cribwork of the entrance piers.

All other filling in rear of the masonry walls is composed of all classes of material arising from the excavation on the section and was dumped in place from cars, wagons or carts, without any other labour spent on levelling it down, other than what would be necessary to keep the tip end of any high bank flattened out. Payment for this large quantity is now demanded at the contract schedule rate of 50 cents per cubic yard, no work on which was carried out according to paragraph 74 and 23 of the specifications. The claim should, therefore, not be entertained.

Exemption to this ruling might be allowed for 2,212 cubic yards forming part of the lower filling in rear of the retaining wall, south side of entrance, stations 749 to 752, which was placed in layers by carts up to about elevation 150·0. Great care had to be exercised in placing the filling in rear of the wall between these points, on account of the wet and dangerous tendency of the clay to slip, which went down in slides when the foundation of the wall was dug out.

Exhibit 'C.'—Answer of Mr. Alex. J. Grant to the Auditor General, dated November 23, 1906.

M. J. Butler, Esq., Trent Canal, Peterboro, Nov. 23, 1906.
Deputy Minister and Chief Engineer,
Ottawa, Ont.

Dear Sir,—In reply to your letter of the 9th instant, relative to Manning & Macdonald's claim for filling in rear of walls, section 13, Soulanges canal:—

The history of the case is as follows: On completion of the works the contractors filed a list of claims, No. 17 of which was for filling in rear of walls, which quantity of filling they claim under item 23 of the contract should amount to 63,067 cubic yards, at 50 cents = $31,533.50. At the date the list of claims was filed with the department, they had been returned in the progress estimates 18,992 cubic yards, at 50 cents = $9,496, leaving a balance of 44,075 cubic yards, at 50 cents = $22,037.50, which they claim was due them at that date.

Under sections Nos. 23 and 74 of the specifications they claim payment for the whole of the above quantity, 63,067 cubic yards. Section 23 refers to the filling in rear of the concrete walls on top of the cribs forming the entrance piers of the canal (see diagram No. 1), and reads as follows: 'Above which the earth on top of them and in rear of the concrete walls described hereafter shall be laid on in thin layers and solidly rammed up to the level of 161 above datum.'

Section 74 refers to the filling in rear of masonry walls (see diagrams Nos. 2 and 3), and reads as follows: 'The filling in behind all masonry walls or other structures shall be executed with broken stone, quarry waste, or other selected material arising from the excavations, placed in layers and well rammed or *otherwise compacted* from bottom to top, and to the entire satisfaction of the inspector or person in charge. The refuse or stone for the purpose shall be taken from any part of section 13, which may be pointed out. No claim for extra haul on this account will be allowed.'

After the death of Mr. Monro, Mr. Schreiber requested me to go into the matter of these claims, and after I had done so, he would go over them with me, which he did on August 11, 1903. At this hearing of the case by him, item 23 was increased by 2,212 cubic yards, as recommended in my report (page 119) on these claims (files 512 and 235½), which made a total quantity of 23,103 cubic yards paid for in estimate No. 78, dated August 18, 1903.

The contractors were not present, nor were they represented at the hearing of these claims before Mr. Schreiber on August 11, 1903.

The case was again taken up by the chief engineer on December 16, 1903, at which hearing Messrs. McDonald, Aylmer, Belcourt, Anglin and myself were present. When item 23 came up for discussion the contractors stated that the material in question, although not placed in layers and rammed, was otherwise compacted, by the drop from the cars, carts, rain and its wet condition, which made a solid compact mass in rear of the walls.

This statement by the contractors in reference to the filling being a solid compact mass was sustained by me, and as it consisted of boulder clay and rock excavation taken from the section, Mr. Schreiber considered the contractors' claim well founded, and allowed the item.

For the purpose of calculation, where not otherwise provided for, a slope of 1 to 1 was taken as being the average excavation slope in rear of the masonry walls. On this basis the total quantity of filling in rear of the walls was found to be 51,645 cubic yards, which was returned in estimate No. 79, dated January 11, 1904. This made a difference between the quantity returned in estimates 79 and 78 (51,645 — 23,103) of 28,542 cubic yards, at 50 cents = $14,271, or the amount held by the Audit Office.

Diagrams Nos. 1, 2 and 3, referred to above, are shown on the attached sheet.

I am, sir, your obedient servant,

ALEX. J. GRANT.

NOTE by Mr. Butler in covering letter: 'It' (referring to the foregoing) 'seems to me quite clear and covers all the points at issue.'

Exhibit 'D.'—Precis of the Case by Mr. Hayter.

AUDIT OFFICE, OTTAWA, December 20, 1906.

SIR,—The following letter is in support of the opinion held by myself against the claim of Messrs. Manning & Macdonald, for $14,271 on account of 'filling behind walls on section 13 of the Soulanges canal.'

Claim is one of Interpretation only.

At no part of the preceding correspondence is there to be found any record that, at the time the wet clay and stone were in process of dumping, anyone supposed they were either 'selected material' or 'compacted.'

On this point see Mr. Grant's evidence at the foot of page W—341 of the Auditor General's Report for 1903-4:—

'All other filling in rear of masonry walls is composed of all classes of material 'arising from the excavation on the section, and was dumped in place from cars, 'wagons or carts, without any other labour spent in levelling it down, other than what 'would be necessary to keep the tip-end of any high bank flattened out. Payment for 'this large quantity is now demanded at the contract schedule rate of 50 cents per 'cubic yard, no work on which was carried out according to paragraphs 74 and 23 of 'the specifications. The claims should, therefore, not be allowed.'

The 28,542 cubic yards now under discussion was part of the quantity handled as related above; and Mr. Grant has never withdrawn his description of the method of handling.

The case is, therefore, not one of Original Merit, but lapses into the class of Subsequent Straining of Specifications.

Questions now at Issue.

The specification phrases now attacked by Messrs. Manning & Macdonald are: 'Selected material' and 'otherwise compacted.'

Selected Material.

After excavating most of the canal prism, the engineers anticipated a difficulty in finding enough material to fill behind the walls at a later date. They, therefore, requested the contractor to leave enough material in the bed of the prism to serve for this purpose when the walls were built. There is no statement from anyone that this reserved material was picked out and left on account of its quality, but only on account of its position. In fact, Mr. Grant mentions specifically that it was 'composed of all classes of material from the excavation on the section.'

As described in Mr. Grant's own words (at page 4 of Mr. McDougall's investigation, of July 28, 1905): 'I compelled them in the early part of the work to leave 'enough material in the bottom of the canal, instead of taking it to the river at the 'dump where they had been taking it, and they had to move their tracks to the other 'side. That was the only material they had, and they took it indiscriminately.'

(In passing, the previous correspondence shows a recommendation by Mr. Keefer, accepted by the Audit Office, that a slight increase of excavation rate should be allowed on this material for pick-work instead of steam shovel-work.)

The contractors, however, claim that since the prism material was reserved or withheld for subsequent use behind the walls, this reserving or withholding constitutes a 'selection,' and that they should be paid for 'selected material.'

It is held by the present writer that, although the material may be of 'select' intrinsic quality, the contractors did not make (and were not called upon to make) any effort of 'selection;' and it is only for their efforts, and not for their results, that they are to be paid. (This argument will be expanded at a later page.) The material was, therefore, not 'selected.'

Otherwise Compacted.

At page 2 of Mr. Grant's last letter (of November 23, 1906), he says: 'The contractors state that the material in question, although not placed in layers and 'rammed,' was otherwise compacted by the drop from the cars, carts, rain, and its 'wet condition, which made it a solid compact mass in rear of walls. This statement 'by the contractors in reference to the filling being a solid compact mass, was sustained 'by me; and as it consisted of boulder clay and rock excavation taken from the sec-'tion, Mr. Schreiber considered the contractors' claim well founded, and allowed the 'item.'

This may be summarized into a statement that the filling is now 'compact,' a fact which has been admitted from the first; but Mr. Grant does not (himself) say that it is 'compacted' by any effort of the contractors, nor were they ordered to make any such effort.

As with the 'selected material,' it is the commanded effort which earns the money, and not the fortunate unforeseen spontaneous accident.

Hypothesis of Variation.

Setting aside any question as to its comparative engineering probability, I would like to propound for consideration the following hypothetical case:—

The evident intent of the whole specification clause now under discussion was, to obtain a water-tight filling behind the walls.

First, suppose that orders had been given explicitly by the engineer, for careful selection of material, and for laboriously spreading and ramming it; and that these orders had been carried out by the contractors, as provided by the specification.

Second, suppose that from some unanticipated cause, these operations failed to produce a water-tight filling, and the whole work had to be taken down and rebuilt on another plan.

Would the contractors be paid for materials 'selected, spread and rammed,' on account of having performed the operations directed by the engineer? Or would they get nothing, as a result of the engineer's failure to obtain water-tightness?

Evidently they would be paid for the work, as the fault would not be theirs.

They cannot, therefore, claim pay for water-tightness which they took no part in obtaining.

Forces of Nature.

Reference is made in some parts of the correspondence to the results produced by the 'forces of nature.' It may be safely assumed, in all works of this kind, that the benefit of the operation of the forces of nature must always enure to the owner instead of to the agent, unless otherwise explicitly provided by the contract.

In the present instance the wet material, after the contractors dumped and abandoned it, hardened into puddle; and, in Mr. Grant's words, 'no work was carried out on it according to paragraph 74 and 23 of the specifications.' The owner, or government, should get the benefit of this, not the agent or contractor.

Present Chief Engineer's Certificate Necessary.

The payment, if made at all, will be charged in 1906-7, on an application from the present deputy minister and chief engineer.

It would be well, therefore, for Mr. Butler now to examine the question from the beginning, setting aside any previous over-rulings based on engineering judgment which may have been different from his own. It is always the present occupant who is responsible for present action.

Other Clauses of Contract.

If the discussion is to be settled by analyzing the strict wording of the contract and specification, without reference to the merits of the case, such literal construing should operate in both directions, and not in one direction only.

Under clause 5 of the contract, all changes, additions and extra work are to be ordered and priced in writing before the work is begun, and this is a condition precedent to the contractors' right to be paid therefor.

Under clauses 26 and 27 of the contract, all omitted allowances are to be claimed repeatedly by the contractors, or they shall be forever shut out.

It may be that, in the early stages of this work, the progress estimates were not given to the contractors; but a reference to Mr. Schreiber's letter of October 4, 1899 (at page R—301 of the Audit Report for 1898-9) will show that all the superintending engineers were re-notified at that date to observe these provisions of the contract. Estimates 74, 75 and 76, for October, 1899, August, 1900, and January, 1901, respectively, omitted the allowance now in dispute; and the contractors lost their claim, if they did not maintain it after each of these estimates.

Item 23 of Schedule.

The schedule item invoked in support of the present application is as follows:—

23: Stone filling behind walls, sec. 74, per cubic yard, 50 cents.

The material used for the filling was, as Mr. Grant says, 'All classes of material.' As far as item 23 provides any payment at all, it can only be for 'stone.' Had earth been intended, item 23 would have read 'stone or other filling.'

Thanking you for this opportunity to formulate my views,

I remain, sir, yours respectfully,

The Auditor General. FREDERICK HAYTER.

Exhibit 'E.'—Auditor General to Chief Engineer.

AUDIT OFFICE, OTTAWA, December 20, 1906.

SIR,—On August 9, 1904, an application was received from the Department of Railways and Canals for a payment of $14,271 to Manning & Macdonald for work done on section 13 of the Soulanges canal.

23: Selected material behind walls, 28,542 cubic yards, at 50 cents, $14,271.

This application became a subject of correspondence between my predecessor, Mr. McDougall, and the then Deputy Minister of Railways and Canals, Mr. Schreiber. See pages W—341, 342 and 343, of the Auditor General's Report, 1903-4, and W—379, Auditor General's Report, 1904-5, when payment was refused by Mr. McDougall on the ground that the money was not justly due to the contractors.

In August, 1905, the matter was brought to my attention, as the Deputy Minister of Railways and Canals, Mr. Schreiber, did not agree with the conclusion arrived at by Mr. McDougall. Since the matter was one with whose details I was not familiar, and as it appeared to me at that time the question was more of an engineering one than of audit, I deemed it advisable to refer the whole matter to an engineer not associated with either the government or the contractors, and selected Mr. Charles H. Keefer, C.E., a man well qualified to give an unbiased judgment which would be of great value in determining what action I should take in the matter.

On August 5, 1905, I wrote Mr. Keefer (see page W—380, Auditor General's Report, 1905), and received a reply (see also same page), in which Mr. Keefer practically came to the same conclusions as Mr. McDougall, with the exception that he stated that the contractors were entitled to some compensation for additional labour that they had performed. Mr. Grant, the engineer who had charge of the work, was

asked to state what, in his opinion, would be a reasonable amount for this purpose, but he replied that it was impossible for him to form any opinion on the subject. See pages W—381 and 382 of Auditor General's Report, 1905.

Since your appointment as Deputy Minister of Railways and Canals we have had some informal conversations on the subject, and on November 26, last, I received your letter inclosing one dated November 23, from Engineer A. J. Grant, which does not appear to me to throw much additional light on the subject.

I am very anxious to have the matter settled, and if the contractors are entitled to the amount claimed I do not desire to cause any further delay. On the other hand, if they are not entitled to payment, I want to be in a position to say so as soon as possible; and if my decision is not in accord with your judgment I wish to be able to say so, and give your department an opportunity to refer the matter to the Treasury Board. In the event of the contractors not being satisfied with the action of the government, they might be given an opportunity to take the case to the Exchequer Court.

I have given very careful consideration to both the opinions of Mr. McDougall and Mr. Schreiber, and will state the case as I understand it.

There are two clauses of the contract bearing on the matter: No. 10 and No. 74. No. 10 reads as follows: 'The prices bid for dredging and earth excavation must 'include the cost of hauling any proportion of the excavation from any part of sec- 'tion 13 to any other part thereof, either for the purpose of filling at the entrance, 'throwing the stuff to spoil, or for any other object connected with the works.' (This is to be paid for at 20 cents per cubic yard.)

No. 74 reads as follows:—'The filling in behind all masonry walls or other struc- 'tures shall be executed with broken stone, quarry waste, or other selected material 'arising from the excavations, placed in layers and well rammed or otherwise com- 'pacted from bottom to top and to the entire satisfaction of the inspector or person 'in charge. The refuse or stone for the purpose shall be taken from any part of sec- 'tion 13 which may be pointed out. No claim for extra haul on this account will be 'allowed.'

(Item 23 of the schedule fixes the price for this work at 50 cents per cubic yard).

While the work of excavation on section 13 was in progress, Mr. Grant, in the early part of the work, compelled the contractors to leave enough material in the bottom of the canal instead of taking it to the river at the dump where they had been taking it, and they had to move their tracks to the other side. This was the material he reserved for filling in behind the walls, and was composed of all classes of material arising from the excavation on the section.

When this material was removed and placed behind the walls it was in a wet condition, and was dumped in place from cars, wagons or carts, without any other labour spent in levelling it down, other than what would be necessary to keep the tip-end of any high bank flattened out, and owing to its wet condition no labour was necessary to compact it.

Mr. Grant treated this work as coming under clause 10 of the specifications, and the contractors were paid at the rate of 20 cents per cubic yard.

The contractors claim in effect that this work was carried out under clauses 74 and 23 of the specifications, as they are asking for the prices mentioned in clause 23.

Mr. Grant declined to treat it as such, because there was no labour spent in levelling it down or ramming it.

Mr. McDougall, after hearing Mr. Grant, decided, first that the material was not *selected,* and second that it was not *spread* or *rammed* or *otherwise compacted* by any special effort of the contractors, and, therefore, did not come under clause 74.

On examination, Mr. Grant said that the material was *selected,* as he had compelled the contractors to leave it for this purpose; and that when placed behind the walls, owing to its wet condition, it became a compact mass and to his entire satisfaction, but had it been dry it would have had to be spread and rammed as required in clause 74.

I think this is a fair summary of what has taken place, and covers the points of difference.

Now as to the conclusions.

1st. Was the material selected?

I think it was. Mr. Grant selected or chose this material when he compelled the contractors to leave it behind for the express purpose of filling behind the walls. There is nothing to show that any special kind of material was to be used except that it was to be selected, and the contractors could not fill in with any materials that they chose. The choice was in the hands of the inspector, and he did make a choice of this material, and, therefore, in my opinion, selected it. It appears to me then that the selecting brought it under clause 74.

2nd. Were the other requirements of clause 74 fulfilled? If they were acts to be performed by the contractors it is doubtful. If results to the satisfaction of the inspector, I think they were fulfilled. At any rate it appears to me that the work must come under clause 74. Clause 10 is general, applying to the whole section. Clause 74 is special, applying only to the filling in behind walls, and the contractor has a right, I think, to claim that the work, if done at all, must be done under clause 74, unless the inspector acting under some clause in the contract empowering him to make changes in the specifications, gave the contractors notice in writing that he would depart from the specifications for filling behind walls, and then (acting under clause 10) ordered the contractors to cart the material arising from the excavations and dump it behind the walls, as he had power to do under clause 10. He does not appear to have done this, and, therefore, I think he has placed the matter under clause 74. It then became his duty to see that the requirements of this clause were complied with; but finding that the material in its wet condition spread and compacted itself, he evidently did not ask the contractors (so far as I can see) to perform any other work than dump it from the carts and then accepted the work as being to his entire satisfaction.

It appears to me now to be, not a question of engineering, but one of law.

Assuming that the contentions of Mr. McDougall were correct, viz.: That the material was not selected and that the contractors did not by their own efforts perform the work in the manner described by clause 74, did Mr. Grant, by his acceptance of the work, and Mr. Schreiber, by his concurrence, give the contractors a claim for $14,271 under clauses 74 and 23, which could be enforced by law?

I have, therefore, to request that you will submit the whole case to the Department of Justice for a legal opinion on the matter.

Mr. Hayter, the chief examiner of expenditure, went very thoroughly into this matter with Mr. McDougall, and agreed with him in the conclusions arrived at. He still adheres very strongly to those views, and I thought it advisable to give him an opportunity to place the case, as it appears to him, before you for your consideration.

I have asked him to place his views in writing, a copy of which I inclose herewith.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. FRASER, *A.G.*

Exhibit 'F.'—Letter from Mr. M. J. Butler to the Auditor General, dated December 22, 1906.

RAILWAYS AND CANALS DEPT., OTTAWA, Dec. 22, 1906.

SIR,—Let me acknowledge your letter of the 20th instant, *re* Manning & Macdonald's claim for work on section No. 13 on the Soulanges canal. 'Item 23,' selected material behind walls 28,542 cubic yards at 50 cents, $14,271. On October 27, last,

I wrote you fully on the matter, and have nothing to add to what is therein stated. I have read over the memorandum submitted by you, which has been prepared by Mr. Hayter. Mr. Hayter is not an engineer, and under the contract it is provided 'that the engineer shall be the sole judge of work and material in respect of both 'quality and quantity, and his decision on all questions in dispute with regard to work 'or materials, or as to the meaning or intention of this contract and the plans, speci-'fications and drawings shall be final, and no works or extra or additional works or 'changes shall be deemed to have been executed, nor shall the contractor be entitled 'to payment for the same, unless the same shall have *been executed to the satisfaction 'of the engineer, as evidenced* by his certificate in writing, which certificate shall be a 'condition precedent to the right of the contractor to be paid therefor.' (Section 8.)

I have read the contract with care and can find no provisions in it that the Audit Office shall interpret the meaning of the contract, or how it shall be carried out.

This matter was, as I stated in my former letter, one that was handled entirely by my predecessor; and I do not feel called upon to re-open questions that were disposed of by him, and of which I can have no personal knowledge. If, under the circumstances, you see fit to refuse payment, the contractors will, I presume, have their remedy at law by action against the government for the amount with interest, from the date the certificate was sent to your office.

In the face of the reports on file, and the evidence which naturally would be offered by the then chief engineer and chief assistant engineer, I see very little chance of the government being able to resist the claim.

I am, sir, your obedient servant,

The Auditor General. M. J. BUTLER, *D.M. & C.E.*

Exhibit 'G.'—Letter by Auditor General.

AUDIT OFFICE, OTTAWA, December 29, 1906.

SIR,—I have to acknowledge receipt of your letter of 22nd instant, *re* Manning & Macdonald's claim for work on section 13 on the Soulanges canal.

You state that under the contract it is provided that the engineer shall be the sole judge of the work and material in respect of both quality and quantity, and his decisions on all questions in dispute with regard to work or material, or as to the meaning or intention of this contract and the plans, specifications and drawings shall be final, &c., &c.

I take it that this only applies between the department and the contractor where the engineer stands as the representative of the department to see that the terms of the contract are carried out. If, in the exercise of discretionary powers given to the engineer, he may wilfully or in error misinterpret the contract, this office is not bound to accept his interpretation. One of the reasons for the existence of this office is to see that the contract is properly interpreted and to refuse payment of any money not justly earned.

You also state that you have read the contract with care and can find no provision in it that the Audit Office shall interpret the meaning of the contract, or how it shall be carried. No doubt this is true, but the Consolidated Revenue and Audit Act provides, inferentially, if not specifically, that the Auditor General shall examine all accounts, and if he finds that the money proposed to be paid is not justly due, or that the necessary certificates are not provided, he shall refuse to issue his certificate for payment. How then can he ascertain this if he is not to interpret contracts?

You point out that Mr. Hayter is not an engineer, and the inference is that he is, therefore, not competent to perform this important task. It is true he is not an engineer and would not be selected to plan or supervise a work of construction, but he has had a large experience with contracts, and part of his duties is to examine the same. The records will show that he has had occasion frequently to differ with engineers, and in a good many instances the results justified his contentions.

Section 33 of the Consolidated Revenue and Audit Act reads: 'No payments 'shall be authorized by the Auditor General in respect of work performed, or material 'supplied by any person in connection with any part of the public service of Canada, 'unless in addition to any other voucher or certificate which is required in that behalf, 'the officer under whose special charge such part of the public service is, certifies that '*such work has been performed,* or such materials supplied, as the case may be, and 'that the price charged is according to contract, or if not covered by a contract, is 'fair and just.'

In the case at issue, Mr. Grant, the officer in charge, has never, so far as I am aware, either in substance or in spirit, given this certificate. On the other hand, Mr. Grand has stated: 'Payment for this large quantity is now demanded at the contract 'schedule rate of 50 cents per cubic yard, no work on which was carried out according 'to paragraphs 74 and 23 of the specifications. The claims should, therefore, not be 'allowed.'

Mr. Grant appears to adhere to this statement, as he only certifies to results in his last letter, November 23, 1906, in which he states: 'This statement by the con- 'tractors in reference to the filling being a compact mass, was sustained by me, and as 'it consisted of boulder clay and rock excavation taken from the section, *Mr. Schreiber* '*considered the contractors' claim well founded* and allowed the item.' He does not say that he (Mr. Grant) considered it well founded.

You state that this matter is one that was handled entirely by your predecessor; and you do not feel called upon to re-open questions that were disposed of by him and of which you can have no personal knowledge. I might say the same thing with reference to myself, but that would not dispose of the matter. I could have saved myself a good deal of labour and anxiety by leaving the case as I found it, and let it be referred to the Treasury Board for decision, but on examining it more closely, I concluded that it had a legal aspect which had been overlooked by Mr. McDougall, and, therefore, suggested that it be referred to the Department of Justice for an opinion on this aspect of the case. However, if you think it is only a question of administration, and rests on the certificate of the engineer and the action of your predecessor, I shall revert to the decision of Mr. McDougall, in which he declined to certify that a cheque of the Minister of Finance and Receiver General may issue, on the ground that the money is not justly due. This action is taken under section 32 (*c*) of the Consolidated Revenue and Audit Act.

In my last letter I stated that apart from the interpretation of the contract, Mr. Grant, by his acceptance of the work as being to his satisfaction, and Mr. Schreiber by his concurrence, may have legally committed the government to the payment of the claim, and suggested that the case be submitted to the Department of Justice for a legal opinion. In making this suggestion, I had in view the same idea expressed in the last paragraph of your letter, when you state: 'In the face of the reports on 'file, and the evidence which would naturally be offered by the then chief engineer 'and the chief assistant engineer, I see very little chance of the government being 'able to resist the claim.'

I still hope you may see your way clear to comply with my request, and we may, perhaps, arrive at a solution of the difficulty without a reference to the Treasury Board.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. FRASER, *A.G.*

Intercolonial Railway, Halifax: Legal Services, R. T. MacIlreith.

AUDIT OFFICE, OTTAWA, February 7, 1907.

SIR,—With this please find vouchers amounting to $4,115.41 in favour of R. T. MacIlreith, for legal services charged to 'Intercolonial Railway: increased accommodation at Halifax.'

In most cases, the copy carrying your itemized deductions and certificate has been retained at Moncton, contrary to the arrangement previously had with the railway authorities.

To enable me to get these vouchers before the Public Accounts Committee (as called for) at the earliest possible date, please append memoranda showing the items of the deductions; and make duplicate certificates.

In future, please annotate and certify both copies of Intercolonial vouchers, so that one of them can reach this office.

I am, sir, your obedient servant,

The Deputy Minister of Justice. J. FRASER, *A.G.*

DEPT. OF JUSTICE, OTTAWA, February 8, 1907.

SIR,—I have the honour to acknowledge the receipt of your letter of the 7th instant, with which was inclosed certain vouchers for legal services rendered by Mr. R. T. MacIlreith, barrister, of Halifax, N.S., in connection with the lands acquired for the purposes of the Intercolonial Railway at Halifax, and asking me to append memoranda showing the items of the deductions and to make duplicate certificates. In reply, I beg to say that there is no copy of these accounts in this department. The accounts were sent here by the railway authorities at Moncton for examination and approval, and were returned to them after they were examined, taxed and certified. I, therefore, suggest that you wire the railway officials at Moncton to furnish you with the certified copies, or request the Department of Railways and Canals to supply them.

You also ask that I should in future annotate and certify both copies of Intercolonial vouchers. Permit me to point out that the order in council, April 12, 1879, governing this matter, requires the departments of the government to submit such accounts to this department merely 'for examination and approval,' and that the certificates endorsed on the accounts by this department indicate that the amounts contained in the certificates are approved by the department. This is all the department is required to do in connection with such accounts, and it is not called upon to note the deductions in the margin, nor to certify more than one copy. As a matter of fact, frequently a lump sum is deducted from the charges made in the accounts, and these deductions are not noted in the margins, and where deductions are noted against separate items the total of these frequently does not correspond with the aggregate deduction. In fact the practice is to regard these separate items of deduction merely as notes to assist the taxing officer in estimating what the total should be, and for the purpose of reconsideration. I do not wish to be bound by them, as I never was so originally bound. They are as a rule no real part of the taxation. It seems to me that your office is only concerned in the total allowed.

I am, sir, your obedient servant,

The Auditor General. E. L. NEWCOMBE, *D.M.J.*

Intercolonial Railway: New Telegraph Wire between Moncton and Ottawa.

AUDIT OFFICE, OTTAWA, September 24, 1907.

SIR,—The Intercolonial authorities at Moncton have just forwarded, for audit before payment, a voucher for $22,000 in favour of the Great North Western Telegraph Company, for 'construction, erection and provision of a telegraph wire between Montreal and Ottawa, as per agreement dated November 5, 1906.'

Old Line Assigned to Intercolonial Railway Service.

Section two of the agreement reads: 'The company shall construct, erect and provide a wire from Moncton to Montreal and thence to Ottawa.'

Inspector Murphy, in his report of August 26, 1907, says: 'The telegraph company seems to have erected a wire between Moncton and Montreal, and to have turned 'over for the use of the government one of their regular wires between Montreal and 'Ottawa. . . . . In my opinion it is immaterial to the government whether a portion of the Moncton-Ottawa line is new or not, so long as it is in good condition, 'and is so maintained by the telegraph company.'

The inspector is, of course, the proper person to say whether the service can be equally well performed by the old wire; but the responsibility of sanctioning such a deviation from the specification should be taken explicitly by the chief engineer.

If a contract has been approved by council this change would need the same authority.

Agreement of 1870 not Carried out.

Mr. Pottinger, in his letter of April 22, 1906, says: 'It might be well to have the 'question of the agreement (of 1870) with the Montreal Telegraph Company looked 'into. . . . . The agreement provides that the Telegraph Company shall build 'the telegraph line and work it. The latter part, that is, the working of it, they have 'never done, except partially. The railway provides all the telegraph operators in all 'the stations. . . . . .'

Under date of June 24, Supt. Pope, of the Great North Western Company, says: 'Clause 3 of the 1870 contract provides for the free transmission over the general 'system of the company's wires, of messages connected with the working of the railway; but I fail to see how this general arrangement can be read as an obligation on 'the part of the company to *work* the railway wires provided by clause 2.'

No mention of Mr. Pottinger's claim appears in subsequent correspondence. If we have not been getting our rights under the contract of 1870, the matter should be investigated without delay; and any arrears due by the company should be calculated, and offset against the present payment.

Payment of $125 a month at Quebec.

Another question, also still apparently unsettled, was raised by Mr. Pottinger in his letter of May 29, 1907, as follows: 'The decision was that the payment of $125 'a month for repeating messages at Quebec was to cease on the completion of the 'new wire between Moncton and Ottawa. Mr. Pope . . . . . takes exception to this.'

Please inform we whether it has been definitely ruled that the payment of $125 a month at Quebec is to cease.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. FRASER, *A.G.*

(NOTE.—No answer has yet been received to this letter, and the payment has not been made—Oct. 5, 1907—J. F.).

Intercolonial Railway: E. A. Wallberg: Work certified before completion.

INTERCOLONIAL RY., MONCTON, N.B., January 22, 1907.

DEAR SIR,—You telegraphed to Mr. Shannon, inquiring about three cheques in payment of work done by E. A. Wallberg, and asked why they were outstanding. One cheque, No. 16900 for $3,540, for two water tanks, one at Truro and one at Rivière du Loup. This cheque is retained in the custody of the treasurer of the railway, and has not been issued to Wallberg, because although all the work for these tanks has been completed, yet the testing of them, which has to be done by the railway, has not yet been done. The railway had to put in the water pipes connecting with the tanks, and these have not yet been put in, so that the testing could not be carried out.

With regard to cheque No. 16901, amount $2,441 for addition to the engine-house at Stellarton. This cheque was sent to the Imperial Bank on December 24, 1906, this bank having a power of attorney from Wallberg, and the work of the addition to the engine-house having been completed.

Cheque No. 16895, for $1,590.75. This is for estimate No. 5 on seven tanks, and the cheque is retained in the custody of the treasurer of the railway because the work is not entirely completed.

Yours truly,

The Auditor General. D. POTTINGER.

AUDIT OFFICE, OTTAWA, January 25, 1907.

SIR,—Let me acknowledge receipt of your letter of January 22, in answer to my telegram of same date, concerning an outstanding cheque for $3,540 in favour of E. A. Wallberg, for final estimate on tanks at Truro and Rivière du Loup.

The final estimate in question, dated June 30, was received at this office July 7; and it was approved and returned to Moncton July 9. The cheque for $3,540 is still outstanding, and my telegram of January 22 asked for an explanation.

Your answer is: 'This cheque is retained in the custody of the treasurer of the 'railway, and has not been issued to Wallberg; because, although all the work for 'these tanks has been completed, yet the testing of them, which has to be done by the 'railway, has not yet been done. The railway had to put in the water pipes connecting 'with the tanks, and these have not been put in; so that the testing could not be 'carried out.'

The local engineer should not have certified that the work was completed until he knew that it was satisfactory. In similar cases, a deduction is usually made, to cover any expense which may arise from possible unsatisfactory work, and the balance is paid as a further progress estimate.

This may still be done in the present instance, by replacing the existing cheque No. 16900 for $3.540 by two others, say Nos. 16900 A and No. 16900 B, the first being for money clearly earned by Mr. Wallberg, and the second for whatever sum the engineers think proper to hold, as provision for any possible defects in workmanship to be discovered by the test of actual service.

This procedure will keep the accounts of 1905-6 straight. Cheque No. 16900 A will then be cashed by Mr. Wallberg, and No. 16900 B will be deposited immediately to the credit of the Receiver General in 1906-7.

Please inform your engineers that in future their certificates should not anticipate their knowledge.

I am, sir, your obedient servant,

The Gen. Mgr. Govt. Rys., Moncton, N.B. J. FRASER, *A.G.*

1—24w

INTERCOLONIAL RY., MONCTON, N.B., March 4, 1907.

DEAR SIR,—Your letter dated January 25, with regard to an outstanding cheque for $3,540 in favour of E. A. Wallberg, for final estimate on tanks at Truro and Rivière du Loup, was duly received, and the arrangements mentioned in your letter have been carried out. The cheque then existing, No. 16900 for $3,540, has been replaced by two others No. 16900 A, and 16900 B. 16900 A being for $3,340, which is being paid to thte Imperial Bank for E. A. Wallberg. The second cheque, No. 16900 B, for $200, has been deposited to the credit of the Receiver General in 1906-7.

I inclose you the first voucher No. 22032 for $3,540 properly cancelled; also the first cheque No. 16900 for $3,540, also cancelled.

Yours truly,

The Auditor General. D. POTTINGER.

AUDIT OFFICE, OTTAWA, January 26, 1907.

SIR,—Let me acknowledge receipt of your letter of January 22, in answer to a telegram concerning Mr. E. A. Wallberg's cheque of $2,441 for final estimate on 'addition to Intercolonial railway engine-house at Stellarton.'

The final estimate in question was dated June 30, 1906; it reached the Audit Office on July 7, and was approved and returned to Moncton on the same day. The cheque in payment is still carried on the list of 'outstanding cheques.' My telegram of January 22 asked for an explanation.

Your answer is: 'With regard to cheque No. 16901, amount $2,441, for addition 'to the engine-house at Stellarton: This cheque was sent to the Imperial Bank on 'December 24, 1906, this bank having a power of attorney from Wallberg, and the 'work of the addition to the engine-house having been completed.'

This means, I suppose, that the work was not completed until shortly before December 24, 1906, the date when the cheque was released. If this supposition is erroneous, please send the correct date.

If completion was not had until December, 1906, the certificate on the voucher of June 30 is not correct, which reads: 'I certify that the work described in the within 'account, amounting to $2,441, has been performed. (Signed.) A. C. Selig, assist-'ant engineer.'

If Mr. Selig has certified to the performance of work which had not been done, he should give a full explanation of his reasons for doing so. Please obtain such an explanation from him, and furnish me with a copy.

This office has to assume, in general, that the statements of certifying-officers are correct; and we, therefore, must take special notice of exceptions. Since Mr. Selig has erred in the case of the Stellarton engine-house, he may have done the same at Charlottetown machine shop, for which a voucher has just been received, bearing his signature. This voucher is returned to you herewith, to be re-certified by him with a later date than his explanation described above.

I am, sir, your obedient servant,

The Gen. Mgr. Govt. Rys., Moncton, N.B. J. FRASER, *A.G.*

Intercolonial Railway: Outstanding Land Cheques of 1904-5.

AUDIT OFFICE, OTTAWA, January 28, 1907.

SIR,—Let me call your attention to 16 cheques issued by the Intercolonial railway in 1904-5 for the purchase of land, all of which cheques are shown as outstanding, and still uncashed on January 1, 1907:—

Halifax: Increased accommodation: 7 cheques: 15980, J. Greenaway, $1,100; 15994, Stairs, Son & Morrow, $6,000; 16009, T. & J. Flynn, $5,000; 16019, Miss Mary O'Brien, $2,700; 16024, H. McInnis, $2,300; 16025, Levi Hart, $7,500; 16026, H. McInnis, $3,200..	$27,800
Halifax, double tracking: 2476, Margt. Appleton, $100; 2478, W. Cunard, $250; 2480, W. N. Jones, $100..	450
Halifax Co., double tracking: 14350, G. C. Eckersly.. ..	150
Mitchell: 14352, I. Laplante..	50
River Louison: 1566, John Miller, damages..	200
Shenacadie: 12682, Mrs. J. McNeil, damages..	20
Stellarton: 15849, D. B. Rogers..	750
St. Pierre: 13741, P. Letourneau..	125
	$29,545

Please communicate with the different agents of the Justice Department who have these affairs in charge, and ask them to have settlement expedited at the earliest possible date.

There should, I think, be a limiting period fixed, at the end of which time all outstanding cheques would be called in. Otherwise, the practical effect is to keep each fiscal year indefinitely open.

I would like to have an explanation from you as to the delay in each of the cases mentioned above, and the prospect of closing.

I am, sir, your obedient servant,

The Gen. Mgr. Govt. Rys., Moncton, N.B. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, October 3, 1907.

SIR,—Let me call your attention to my letter of January 28, 1907, asking for explanations concerning sixteen Intercolonial Railway cheques of 1904-5, for purchase of land, all of which cheques are still outstanding and uncashed. It is not found that any answer has yet been received to the letter in question.

Of the list of cheques then given, amounting to $29,545, the following five have since been presented:—

15980: J. Greenaway..	$1,100
16019: Miss Mary O'Brien..	2,700
2476: Margt. Appleton..	100
2478: W. Cunard..	250
2480: W. N. Jones..	100
	$4,250

The remaining eleven cheques, amounting to $25,295, which were all drawn prior to August 15, 1905, are yet unpaid.

The remarks in my letter of January 28 are still valid, and their pertinence is enhanced by the seven months which have since elapsed.

The eleven cheques now outstanding should be cancelled without further delay, if they are still in the hands of the Intercolonial Railway officials or legal agents.

If the existing land-purchase methods of the railway cannot be made to give more favourable results, they should be changed at an early date.

I am, sir, your obedient servant,

The Gen. Mgr. Govt. Rys., Moncton, N.B. J. FRASER, *A.G.*

Intercolonial Railway: Outstanding Land Cheques of 1905-6.

AUDIT OFFICE, OTTAWA, January 26, 1907.

SIR,—Let me call your attention to 40 cheques issued by the Intercolonial Railway in 1905-6 for the purchase of land, all of which cheques are shown as outstanding, and still uncashed, on January 1, 1907:—

Bedford: 5 cheques issued about July 17, 1906: ,17035, H. M. Clarke, $50; 17163, G. B. Ternan, $50; 17164, Jas. Ennis, $500; 17166, W. M. Gray, $50; John Gray, $40 (17167).. .. .. .

Trois Pistoles: 1 cheque issued about Feb. 22, 1906: Jules Langlois (10287)	1 00
Upper Cross Creek: 1 cheque issued about Apl. 30, 1906: 12922, Humble & Turnbull	300 00
	$23,690 86

Please communicate with the different agents of the Justice Department who have these affairs in charge, and ask them to have settlement expedited at the earliest possible date.

There should be, I think, be a limiting period fixed, at the end of which time all outstanding cheques would be called in. Otherwise, the practical effect is, to keep each fiscal year indefinitely open.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, October 3, 1907.

SIR,—Let me call your attention to my letter of January 26, 1907, asking for explanations concerning 40 Intercolonial Railway cheques of 1905-6 for purchase of land, all of which cheques were outstanding and uncashed on January 1, 1907. It is not found that any answer has yet been received to the letter in question.

Of the 40 cheques there listed, amounting to $23,690.86, the following 27 have not yet been presented for payment:—

Bedford, 17166, W. M. Gray, $50; 17167, John Gray, $40.	90 00
Birch Cove: 17168, T. S. Donaldson	3,631 00
East Mines: 17034, A. E. Morrison	250 00
Fort Lawrence: 3575, Douglas, Rhodes & Pipes	305 20
Halifax: 1613, C. E. Rogers, $6,000; 1614, J. A. Thompson, $3,500; 14990, A. Nicholson, $650	10,150 00
Sydney Mines: 16792, Mrs. A. Carr, $140; 16793, Luke Day, $1,400; 16794, Jas. Day, $300; 16795, J. W. Francis, $750; 16796, Pius Gannon, $500; 16797, M. J. Gannon, $600; 16798, W. J. Grace, $5; 16799, M. Cashen, $100; 16800, A. G. Hamilton, $1,200; 16802, Mrs. M. Matheson, $100; 16805, Murdoch McDonald, $225; 16807, Alex. McKay, $50; 16808, Alex. McKay, $200; 16809, Alex. McKay, $185; 16810, Chas. McPhee, $400; 16811, Jas. McNeil, $700; 16812, Wm. Perro, $160.	7,015 00
Trois Pistoles: 10287, Jules Langlois	1 00
Upper Cross Creek: 10922, Humble & Turnbull	100 00
	$21,542 20

Please communicate with the different agents of the Justice Department who have these affairs in charge, and ask them to have settlement expedited at the earliest possible date.

There should, I think, be a limiting period fixed, at the end of which time all outstanding cheques would be called in. Otherwise, the practical effect is, to keep each fiscal year indefinitely open.

I would like to have an explanation from you as to the delay in each of the cases mentioned above, and the prospect of closing.

I am, sir, your obedient servant,

The Gen. Mgr. Govt. Rys., Moncton, N.B. J. FRASER, *A.G.*

Intercolonial Railway: Outstanding Cheques of 1905-6 for Rolling Stock.

AUDIT OFFICE, OTTAWA, January 25, 1907.

SIR,—In the list of 1905-6 cheques of the Intercolonial Railway outstanding and uncashed on December 31, 1906, I find the following 12 cheques in favour of Rhodes, Curry & Co., for rolling stock, as follows:—

16905: Snow-ploughs, 72-76: 5 at $3,550	$ 17,750
16910: Box-cars, 60716-25: 10 at $900	9,000
16911: Box-cars, 60726-35: 10 at $900	9,000
16912: Box-cars, 60736-45: 10 at $900	9,000
16913: Box-cars, 60746-55: 10 at $900	9,000
16914: Box-cars, 60756-65: 10 at $900	9,000
16915: Box-cars, 60766-75: 10 at $900	9,000
16917: Dump-cars, 40060-70: 11 at $995	10,945
16920: Dump-cars, 40091-100: 10 at $995	9,950
16921: Dump-cars, 40101-10: 10 at $995	9,950
16922: Dump-cars, 40111-20: 10 at $995	9,950
16923: Dump-cars, 40121-30: 10 at $995	9,950
	$122,495

These 12 vouchers, certified by Mechanical Accountant J. J. Walker, 'The materials have been supplied,' were received at this office July 9, 1906; and they were approved and returned to Moncton on the same day.

Please explain why the cheques are still outstanding, if the cars were all delivered.

I am, sir, your obedient servant,

The Gen. Mgr. Govt. Rys., Moncton, N.B. J. FRASER, *A.G.*

Intercolonial Railway: Details of Travelling Expenses.

AUDIT OFFICE, OTTAWA, June 3, 1907.

DEAR MR. PRICE,—Owing to a pressure of business I neglected writing you as I promised to do in reference to 'miscellaneous travelling expenses.'

This matter was before the Public Accounts Committee last session and a certain amount of criticism was made in reference to the travelling expenses of Intercolonial Railway officials. Under the circumstances it was thought necessary to have fuller details of 'other expenses.' Of course, I can readily understand that the higher officials and such as come in contact with officials of other roads are necessarily under

larger outlay for 'other expenses' than those who only travel on the Intercolonial Railway on ordinary business, and if the Comptroller can see his way clear to make an exception of such accounts as yours and a reasonable amount of details is given, I think this office will be able to accept the vouchers.

I inclose the papers you left with me and hope this will be satisfactory.

Yours truly,

H. A. PRICE, Esq., Asst. Gen'l Pass. Agt., I.C.R., Montreal. J. FRASER, *A.G.*

Transcontinental Railway: Cap Rouge Viaduct.

AUDIT OFFICE, OTTAWA, January 3, 1907.

SIR,—Let me call your attention to the contract of the Dominion Bridge Company for the steel viaduct at Cap Rouge.

Under section 2 of the contract, which gives a general description of the work, is inserted a penalty of $5,000 for each month which may elapse after the first day of October, 1906.

As the time in which the contract was to have been completed has elapsed, and as the work has not been finished, I would like to be informed if an extension of time has been granted by order in council, and if not, what steps are being taken to enforce the penalty clause for non-completion which appears in the contract.

I am, sir, your obedient servant,

The Secretary, N. T. R. Comm., Ottawa. J. FRASER, *A.G.*

TRANSCONTINENTAL RY., OTTAWA, January 7, 1907.

DEAR SIR,—I have the honour by direction of the board to acknowledge the receipt of your letter of the 3rd inst., having regard to the contract between the commissioners and the Dominion Bridge Company for the construction and erection of the Cap Rouge viaduct.

I am to say in reply that the matter of enforcing the penalty clause in the contract is within the discretionary powers vested in the commissioners, and that they are of the opinion that the circumstances which would warrant its enforcement do not exist in the case referred to as yet.

I am, sir, your obedient servant,

The Auditor General. P. E. RYAN, *Secretary.*

AUDIT OFFICE, OTTAWA, January 10, 1907.

SIR,—I beg to acknowledge receipt of your letter of 7th inst. dealing with the contract between the commissioners and the Dominion Bridge Company for the construction and erection of the Cap Rouge viaduct.

In my letter of 3rd inst. I asked if an extension of time had been granted by order in council. The original contract was passed by order in council, dated April 17, 1906, and any deviation from or changes made in it should first receive the sanction of the Governor in Council.

If this order has not been received, I would like to be informed as to the steps that are being or have been taken to enforce the penalty clause.

I am, sir, your obedient servant,

The Secretary, N. T. R. Comm., Ottawa. J. FRASER, *A.G.*

TRANSCONTINENTAL RAILWAY, OTTAWA, January 11, 1907.

DEAR SIR,—I have the honour to acknowledge the receipt of your favour of the 10th instant having further reference to the contract between the Commissioners and the Dominion Bridge Company for the construction and erection of the Cap Rouge viaduct, and to say in reply that the order in council of April 17, 1906, sanctions the acceptance of the tender of the Dominion Bridge Company, but does not pass on the conditions of the contract, which, subject to section 17 of the National Transcontinental Railway Act, chap. 71, 3 Edw. VII., are, as stated in my letter of the 7th instant, within the discretionary powers vested in the Commissioners.

I am, sir, your obedient servant,

The Auditor General. P. E. RYAN, *Secretary.*

AUDIT OFFICE, OTTAWA, January 15, 1907.

SIR,—I beg to acknowledge receipt of your letter of 11th instant, having further reference to the contract of the Dominion Bridge Company for the construction of the Cap Rouge viaduct.

I have noted carefully your reference to section 17 of the National Transcontinental Railway Act, and must say that I am unable to discover wherein the said section grants any exceptional or discretionary powers to the commissioners. Section 17 has reference only to security for the performance of contract.

This contract was passed by order in council of April 17, 1906, and the latter part of section 2 sets forth that the structure will be handed to the commissioners on or before the first day of October, 1906, and in default the contractors shall pay to the commissioners by way of liquidated damages the sum of $5,000 for each month which may elapse after the said date.

This office does not claim that the penalty clause should be enforced, as there might be reasons favourable to the government why it should not, but the Governor in Council has passed on the different items of this contract and before the commissioners can waive such an important clause as the one in question an order in council should be obtained sanctioning the extension of time for this work.

Kindly obtain this necessary order and furnish this office with a copy.

I am, sir, your obedient servant,

The Secretary N. T. Ry. Commn., Ottawa. J. FRASER, *A.G.*

TRANSCONTINENTAL RAILWAY, OTTAWA, January 17, 1907.

SIR,—I have the honour by direction to acknowledge the receipt of your letter of the 15th instant, subject: 'Contract between the commissioners and the Dominion Bridge Company for the construction and erection of the Cap Rouge viaduct.'

In reply, I have to repeat what has already been stated in my letter of the 11th instant, namely, that the order in council of April 17 sanctions the acceptance of the tender of the Dominion Bridge Company, but does not, as stated by you, pass on the different items of the contract. If the contract were submitted to the Governor in Council, and the order in council were passed on the contract, then there can be no doubt, as you state, any deviation from, or changes made in it, should be sanctioned by the Governor in Council. Our contracts, however, are not passed on by the Governor in Council.

The National Transcontinental Railway Act, chap. 71, 3 Edward VII., provides that 'the construction and operation of the eastern division of the National Transcontinental Railway until completed and leased to the Grand Trunk Pacific Railway Company, *shall be under the charge and control of the commissioners.*' The commissioners, therefore, are vested generally with all the powers necessary to construct and operate the said railway, *except where specifically limited by the Act.*

Section 16 of the Act imposes upon the commissioners the obligation to let all the work of construction by tender and contract ; but when the expenditure to be incurred under any one contract exceeds the amount of $10,000 ,then their duty is, if several tenders have been received ,to report to His Excellency in Council all the tenders, indicating which one in their opinion is the lowest acceptable. The responsibility is then put upon the government to decide whether or not the recommendation of the commissioners is to be accepted.

Under this section of the Act the commissioners *have full power to let contracts that do not involve an expenditure of $10,000. The conditions of these contracts are entirely within the discretionary powers vested in the commissioners,* subject to section 17 of the Act, which requires that the contracts shall be guarded by such securities, &c., 'as appear to be necessary for the protection of the public, and for securing the due performance of such contracts, respectively.' *They have the same power to let contracts involving an expenditure in excess of* $10,000, providing the awarding of such contracts has been sanctioned by the Governor in Council.

Such sanction having been given to the acceptance of the Dominion Bridge Company's tender, it seems clear that the commissioners had full power to enter into a contract which contained such provisions for the safeguarding of the public interest as in their opinion were contemplated by section 17 of the Act; also, that the conditions of the contract not having been passed on by order in council, the commissioners must, and do, accept full responsibility for their enforcement in the public interest.

I am, sir, your obedient servant,

The Auditor General. P. E. RYAN, *Secretary.*

AUDIT OFFICE, OTTAWA, January 24, 1907.

DEAR MR. FIELDING,—A difference of opinion exists between this office and the National Transcontinental Railway Commission as to the interpretation of section 16 of Act 3. Edward VII., cap. 71.

The last paragraph reads: 'Provided always that no contract under this section involving an expenditure of ten thousand dollars or upwards shall be concluded by the commission until it has been sanctioned by the Governor in Council.'

The contract with the Dominion Bridge Company for the construction of the Cap Rouge viaduct provided that the work should be completed by September 30, 1906. In the event of its not being completed at that time, the contractors were liable to a penalty for default. The contract has not yet been completed, and I asked the commissioners what steps had been taken, if any, to enforce the penalty clause, or, if the time had been extended, to let me have a copy of the order in council authorizing the extension. The commissioners reply that the conditions of the contract were not passed on by council and are entirely within the discretionary powers vested in the commissioners.

On looking up the order in council in connection with the National Transcontinental contracts, I find that council only sanctions the acceptance of the tenders, and as section 16 of the Transcontinental Act distinctly states that the contracts must be sanctioned by council, I am forced to the conclusion that the Act has not been complied with.

If my interpretation of the Act is correct, I shall be obliged to pass the accounts for payments under these contracts, and as all the payments made by the National Transcontinental Railway Commission are made under letter of credit and consequently before audit, I shall have to request you to cancel their credit and ask that the applications for payment in future be submitted to me for audit before payment.

I think this is an opportune time to repeat a complaint that I have already made to the Clerk of the Privy Council regarding the neglect to supply me with all orders in council having reference to the expenditure of public money. I have frequently to delay the passing of certificates for payment of accounts until I can induce the department making the application to request the Clerk of Privy Council to send me the necessary authority, as he states he can only send me the orders in council after being instructed in each case by the department concerned.

I am thus left in the position of being liable to pass transactions that may have had conditions imposed in connection with them by council when these conditions may have not been fulfilled.

I shall be much obliged if you will afford me an early opportunity to discuss both these subjects with you, more particularly the contracts, as, if my contentions are correct, the sooner the matter is rectified the better, and I feel satisfied that the government is as anxious as I am to have the law complied with.

Yours truly,

Hon. W. S. Fielding, Minister of Finance. J. FRASER, *A.G.*

Transcontinental Railway: Advertising for Tenders.

Audit Office, Ottawa, March 20, 1907.

Sir,—A number of contracts entered into by your commission for transportation of supplies in districts C, D, and E have recently come to hand.

I would respectfully ask if tenders were called for by newspaper advertisement; and whether the lowest tender was accepted in each case.

I am, sir, your obedient servant,

The Secretary, N. T. R. Comm., Ottawa. J. FRASER, *A.G.*

TRANSCONTINENTAL RAILWAY, OTTAWA, March 21, 1907.

DEAR SIR,—I have the honour to acknowledge the receipt of your favour of the 20th instant with respect to certain contracts for the transportation of supplies in districts 'C,' 'D' and 'E,' and to say in reply that it is the invariable practice of the commission to accept the lowest tender put in by a responsible tenderer.

With respect to your inquiry if tenders were called for by newspaper advertisement, I have the honour to say that in very rare cases do we advertise for tenders for the transport of supplies. Our practice is to invite tenders from responsible persons in the locality from which the supplies have to be transported. In this connection, I would point out that contracts for the transport of supplies are clearly not contracts for work of construction within the meaning of section 16 of the National Transcontinental Railway Act, and are, therefore, not subject to the conditions or requirements prescribed by that section. As there are no plans and specifications in connection with such contracts, it would be obviously impossible to advertise them.

I am, sir, your obedient servant,

The Auditor General. P. E. RYAN, *Secretary.*

AUDIT OFFICE, OTTAWA, May 16, 1907.

SIR,—I beg to acknowledge the receipt of your letter of March 21, in reference to your method of calling for tenders for the transportation of supplies.

You state that contracts for transport of supplies do not come under the meaning of section 16 of the National Transcontinental Railway Act. You evidently have not been supplied with a copy of an order in council dated May 21, 1906 (copy of which I inclose) which extends the application of this section to all contracts where an expenditure of $10,000 or upwards is involved.

You also stated in your letter that in some rare cases you have called for tenders by newspaper advertisement for the transport of supplies, and again you write that as there are no plans and specifications with such contracts, it would be impossible to advertise them. These statements seem to be rather conflicting.

In some cases the commission might receive better results by inviting tenders from parties in the locality from which the supplies have to be transported, but I think the practice of calling for tenders by newspaper advertisement should be followed out as far as possible.

I am, sir, your obedient servant,

The Secretary N. T. Ry. Commission, Ottawa. J. FRASER, *A.G.*

Extract from Order in Council, May 21, 1906.

Railways and Canals.

The committee of the Privy Council have had under consideration the expediency of requiring the approval by the Governor in Council of all contracts of the National Transcontinental Railway which involve a large expenditure of public money.

The committee observe that section 16 of the National Transcontinental Railway Act makes such approval essential in the case of contracts for construction where an

expenditure of $10,000 or upwards is involved, and they are of opinion that a similar restriction applying to all contracts would be in the public interest.

The committee therefore recommend that no contract of any kind involving an expenditure of $10,000 or upwards be concluded by the commissioners until it has been sanctioned by the Governor in Council.

JOHN J. McGEE, *C.P.C.*

TRANSCONTINENTAL RAILWAY, OTTAWA, May 17, 1907.

DEAR SIR,—I have the honour to acknowledge the receipt of your favour of the 16th instant in further reference to our method of calling for tenders for the transportation of supplies.

We some time ago received a copy of the order in council dated May 21, 1906, referred to in your letter, but do not understand it as extending the application of section 16 of the National Transcontinental Railway Act in any way. The commissioners have always understood this section as applying to all *contracts for construction* involving an expenditure of $10,000 or upwards.

The opinion having been furnished to the commissioners by the deputy minister of Justice under date April 4, 1906, that 'the purchase of lands for right of way, station grounds, gravel pits, &c., is clearly not a contract for work of construction of the railway *within the meaning of section 16 of the National Transcontinental Railway Act,* and is not subject to the conditions or requirements prescribed by that section,' the order in council above referred to, dated May 21, 1906, was passed providing that no contract of any kind involving an expenditure of $10,000 or upwards shall be concluded by the commissioners until it has been sanctioned by the Governor in Council; and in no case since the passage of this order in council have the commissioners concluded a contract without such approval. This order in council does not, however, extend the application of the provision of section 16, with respect to advertising for tenders, to contracts not within the meaning of the said section.

In reference to the third paragraph of your letter: it is not thought that there is any confliction in the statements referred to by you. In the few instances in which tenders have been advertised for, the commissioners have followed the practice of calling for tenders by newspaper advertisement, where it was thought the best results would be obtained by so doing—as suggested in the fourth paragraph of your letter; but, as a general thing, it is impracticable to advertise, having regard to the points from which the supplies are to be transported.

I am, sir, your obedient servant,

The Auditor General. P. E. RYAN, *Secretary.*

Transcontinental Railway: Land Purchases.

AUDIT OFFICE, OTTAWA, March 30, 1907.

SIR,—Your attention is respectfully called to voucher F 695, for $3,618.80, a payment for purchase of land, &c., in favour of T. L. Morton, agent at Winnipeg, Man., being mostly for right-of-way.

Would it not be well to submit all land accounts to your law clerk before payment, for his certificate that the deeds are in proper form and on record in his office; and

then to have payment made direct by your chief accountant? This procedure seems to be in force for purchase of lands in the province of Quebec.

Is there any special reason why payments of this nature should be made at Winnipeg by your agent there?

I am, sir, your obedient servant,

FREDERICK HAYTER, *for the Auditor General.*

The Secretary, N.T.R. Comm.

TRANSCONTINENTAL RAILWAY, OTTAWA, April 16, 1907.

DEAR SIR,—I have the honour to acknowledge the receipt of your favour of the 30th ultimo referring specifically to voucher No. F 695, $3,618.80, in favour of Thos. L. Morton, and generally to payments for lands in District 'F,' and, in reply, to say that instructions have been given to Mr. Morton to refund the special advance of $3,000 made to him for the purpose of taking options on right-of-way and other properties, &c., and to requisition on the commissioners for an amount sufficient to cover his actual disbursement requirements on account of the business of the commissioners for the period of one month; also that all payments for lands, &c., shall be paid at Ottawa on presentation of draft with deed attached, approved and certified by the commissioners' Winnipeg solicitor.

I am, sir, your obedient servant,

P. E. RYAN, *Secretary.*

Re **Audit of Stations.**

AUDIT OFFICE, OTTAWA, December 11, 1906.

SIR,—I have received from tha comptroller the reports of the travelling auditors for November.

Mr. Schwartz reports a shortage of $260.87 at Drummondville, but no further explanation is given.

Mr. Wallace seems to have been engaged 8 or 9 days at Campbellton and reports the office unsatisfactory.

When the reports of the travelling auditors were asked for it was understood that explanations should be given in reference to any station found unsatisfactory, stating the action taken in reference thereto.

I am, sir, your obedient servant,

The General Manager Govt. Rys. J. FRASER, *A.G.*

MONCTON, N.B., January 21, 1907.

DEAR SIR,—In answer to your letter, dated December 11, I have inquired of Mr. Shannon, and I send you herewith his letter of explanation, dated January 5, with reference to the chortage of $260.87 at Drummondville; and also with reference to the report of Mr. Wallace on the unsatisfactory state of the accounts at Campbellton.

Yours truly,

The Auditor General. D. POTTINGER.

MONCTON, N.B., January 5, 1907.

DEAR SIR,—Referring to the Auditor General's letter of the 11th ult. (herewith returned), in reference to reports of the travelling auditors for November, in which he draws attention to the shortage reported by Mr. Schwartz of $260.87 at Drummondville, and asking explanations.

I have to inform you that I am in receipt of the correspondence in connection therewith, which has been sent me by the traffic auditor. I find that the supposed shortage was caused by Mr. Schwartz having arrived early in the morning, before the bank opened, and that he took over the cash at once and found a difference of this amount between what should be in the till and what was there. It appears that the agent had in his possession some cheques which he had not had time to cash, and that there was an amount of freight due by the Improved Match Co., a cheque for which arrived the same day, after the travelling auditor had left, but that the agent immediately prepared a remittance of the difference, which he put into the cash bag before the departure of Mr. Schwartz.

Although Mr. Schwartz claimed that the agent was short, Travelling Auditor Girard went there immediately and looked into the matter, and he reports that the agent had uncertified cheques for freight delivered in his possession sufficient to make up the deficiency, but that he was unable to turn them in until he had received the cash for them, which he could not do until after the bank opened. He was enabled to cash these that day, and the amount of cash that he was responsible for was remitted the same day to the cashier here.

It would appear to me that where the agent was at fault was in accepting uncertified cheques in payment of freight, although the companies from whom he received them were of good standing, and I have no doubt had the travelling auditor arrived after the bank had opened there would not have been any shortage claimed by the travelling auditor.

With regard to the Auditor General's remarks about Mr. Wallace being engaged eight or nine days at Campbellton, and as to his report of that office being unsatisfactory, I may say that the trouble seems to have been caused by the agent not having had a proper staff, and to the lack of proper facilities for the handling of steamship business, but at the conclusion of Mr. Wallace's visit everything had turned out satisfactorily; and I am in receipt of a report from the traffic auditor in connection with this office, in which he states that he does not think this agent is likely to give us any more trouble, and that the experience which he has gone through in this particular case has been a lesson to him.

Yours truly,

The General Manager Govt. Rys. S. L. SHANNON, *Comptroller.*

Re **Intercolonial Railway Revenue.**

AUDIT OFFICE OTTAWA, August 17, 1907.

SIR,—The chief clerk of my office in charge of the Revenue Audit has recently visited the general offices of the Intercolonial Railway at Moncton. He reports that the work in the Traffic Auditor's Branch has fallen somewhat in arrears, owing, it is claimed, to the additional work thrown on the branch by the new system.

Formerly the work of preparing the statements of the through freight inward, and allotting the charges to the roads over which it came, was done by the Canadian Pacific and Grand Trunk officials. The former road made no charge for doing this work; the latter was paid $40 per month. These statements were of course examined and checked in the Intercolonial Railway office. Under the new system this work has to be done at Moncton.

Considerable of the work formerly handled by the freight claims' agent has been transferred to the Audit Branch, such as the adjustment and disposing of outstandings.

There is also required from this branch monthly, statements showing by divisions the tonnage of freight and number of passengers carried, and a like division of the revenue arising therefrom. The division of the revenue has not been made so far.

I do not question the propriety of the changes that have been made. My reason for referring to them is, that owing to these changes the work of fully auditing the revenue is interfered with. I understand that the checking of the way-bills has not been done since January last. While it may be desirable and useful to have statistics of the traffic, it seems to me it is secondary to a thorough audit of the revenue. The traffic auditor has asked for additional clerks who are capable, and I have no doubt you will have them supplied.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Railways and Canals.

DEPT. OF RAILWAYS AND CANALS, August 19, 1907.

SIR,—I have your letter of the 17th instant. I am somewhat surprised to learn that the Traffic Auditor's branch is falling in arrears. It is certainly not due to any additional work thrown on the branch by the new system of accounting. In any case, the work has got to be done to your entire satisfaction.

The checking formerly done by the Canadian Pacific and Grand Trunk railways was certainly not a businesslike arrangement, and I have no doubt led to more or less losses.

I will at once send Mr. Shannon a copy of your letter, and require him to furnish the information in the shape that you wish.

I am, sir, your obedient servant,

M. J. BUTLER, *D.M.*

The Auditor General.

MONCTON, N.B., September 6, 1907.

DEAR SIR,—I duly received your letter dated August 17, inclosing a copy of a letter written by you to the Deputy Minister of Railways and Canals, with reference to the work in the traffic auditor's office of the Intercolonial, and I sent it to Mr. Shannon for his report. I inclose you herewith a letter from him dated August 23, addressed to me, in which he incloses copy of a letter that he addressed to Mr. Butler, deputy minister, on the same date.

I am, sir, your obedient servant,

The Auditor General. D. POTTINGER.

MONCTON, N.B., August 23, 1907.

DEAR SIR,—I return you herewith the Auditor General's letter of the 17th instant, inclosing a copy of a letter which he sent to the Deputy Minister of Railways and Canals, in reference to the work in the traffic auditor's office, and which you sent me on the 19th instant for my remarks.

I have already received from the deputy minister a copy of this letter, and I inclose you herewith a copy of my letter to him dealing with the matters referred to by the Auditor General.

Mr. Gorman, the chief clerk referred to, spent, I am informed by the traffic auditor, only two days in his office, which I think would not be sufficient time for him to obtain a thorough knowledge of existing affairs in such a large office as the Audit Office is.

I am, sir, your obedient servant,

The General Manager Govt. Rys. S. L. SHANNON, *Comptroller.*

MONCTON, N.B., August 23, 1907.

MY DEAR MR. BUTLER,—I have yours of the 19th instant, inclosing me copy of letter sent you by the Auditor General.

I had also received a copy of this letter, which the Auditor General had sent to the general manager, who turned it over to me. Upon receiving it from the general manager I handed the letter to Mr. Bruce, with the request that he would give me a full report in connection with it. I have to-day received such report, and inclose it for your information.

The letter he refers to, which he wrote me on the 9th instant, I took up and inquired into, and found that the Auditor General's statement that work which had been previously done for us by the Canadian Pacific Railway for nothing, and the Grand Trunk Railway for $60 per month, had under the new system to be done here, to be perfectly true, and this of necessity required additional assistance; then also Mr. Brown transferred considerable work formerly handled by the freight claim agent to the audit office.

The main point, however, of the Auditor General's letter is, that owing to changes, the work of fully auditing the revenue is interfered with, and that more attention is paid to statistics. To this I will say that the primary object of the traffic auditor's office is a thorough check of the revenue, and this is what is endeavoured to be carried out.

I have had the matter up with the general manager, who has sent me additional clerks, but unfortunately the most of them turned out to be unsuitable, and I had to drop them. There are too many inefficients already in that office. As soon as good clerks can be had there will be no cause for complaint.

I am, sir, your obedient servant,

The Deputy Minister, Rys. and Canals. S. L. SHANNON, *Comptroller.*

Re **Intercolonial Railway Revenue, Cashier's Office.**

AUDIT OFFICE, OTTAWA, August 17, 1907.

SIR,—The present practice followed by your cashier is to deposit each day about noon the receipts of the previous day, with the exception of what comes by train from Halifax, reaching Moncton at 5.30 p.m. This necessitates the cashier keeping in his safe over night from five to seven thousand dollars in currency.

At the time he is making his deposit each day he has on hand over one-half of the current day's receipts, which he holds till the following day. The reason he assigned for not depositing each day all the cash on hand at time, was that it was not checked with the agent's advice notes. I would suggest that you should inquire into this matter, when, no doubt, you will be of opinion that it is quite practicable to make the whole deposit each day. This will necessitate the bank issuing two receipts each day, but I assume they will not object.

Since the new system was introduced, the traffic auditor's check of the cashier's receipts has been interfered with, owing to the fact that the new returns required to be furnished daily by the agents to the audit office are not sent promptly. I am glad to learn that this will be rectified by the auditor using his copy of the agent's advice note, which he still gets to check daily with the cashier.

Has it occurred to you that it would be safer and more convenient if the cashier had his office in the station?

I am, sir, your obedient servant,

The General Manager, Govt. Rys. J. FRASER, *A.G.*

MONCTON, N. B., September 7, 1907.

DEAR SIR,—I duly received your letter dated August 17, with reference to the position and mode of working of the cashier's office, and I sent it to Mr. Shannon for consideration of the suggested changes. I send you herewith his letter dated August 22, received in reply.

It is certainly desirable that deposits shall be made in such a way as to leave as small an amount of cash as possible on hand in the railway vaults over night and over Sunday, and I have told him to make every possible arrangement to do this.

In regard to the removal of the cashier's office from the general office building to the station, I am inclined to think that this would not be a very great improvement, if any. The distance is only 500 feet between the office building and the station, and the cashier is provided with a man who attends the trains and carries the money to the office.

Yours truly,

The Auditor General. D. POTTINGER.

MONCTON, N.B., August 22, 1907.

DEAR SIR,—I return you herewith the Auditor General's letter of the 17th instant (being your No. D2/29902), which was sent me on the 19th instant, for my views.

The matter referred to in the Auditor General's letter was discussed by the cashier; Mr. Gorman, chief clerk of the Auditor General's office, and myself, during Mr. Gorman's recent visit to the general offices. His suggestion that the cashier should make two deposits daily cannot be carried out, unless the cashier deposits the second time without balancing. The cashier thinks this not desirable, and I concur in that view. He deposits at half-past twelve o'clock daily, and you will easily see that by the time he is through at the bank, and gets his receipt, the dinner hour of one o'clock has been reached. He then gets back to his office by half-past two, and the bank closes at three o'clock, so that any money received in the interval, there would not be time to thoroughly check and get it into the bank before three o'clock. Mr. Gorman was of the opinion that the bank might be asked to keep open later; but this I do not think they would be inclined to do.

With reference to his paragraph dealing with the traffic auditor's check of the cashier's receipts, I may say that the traffic auditor has had from the commencement of the change in the system a copy of the agents' advice notes of the money sent to the eashier, and it is his duty to check these daily with the amounts returned by the cashier.

The Auditor General draws your attention as to whether it would be safer and more convenient if the cashier had his office in the station. I do not agree with him there. In the first place, there is no available room at the station, and it would necessitate a large expenditure preparing perfect burglar-proof vaults, which we now have in the general offices; and as moneys are constantly coming in to me as treasurer, which I deal with and hand over to the cashier, it would be inconvenient to have to go from this office to the station to hand over such money to the cashier.

Yours truly,

S. L. SHANNON, *Comptroller.*

Re **Defalcation at St. Hyacinthe.**

AUDIT OFFICE, OTTAWA, January 29, 1907.

SIR,—I do not seem to have any reply to my letter of March 7, 1906, inquiring what action had been taken to recover from the Guarantee Company, the Intercolonial Railway share of the guarantee on the agent at St. Hyacinthe; and also what action had been taken against his estate for the balance of his defalcation.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. FRASER, *A.G.*

DEPT. OF RAILWAYS AND CANALS, OTTAWA, February 20, 1907.

SIR,—Referring to your communication of the 29th ult., with further reference to the shortage in the accounts of the late W. Nichols, in his lifetime joint railway agent at St. Hyacinthe, Que., I have the honour to inform you that the department is advised by the Department of Justice, to whom the matter has been referred, that, as it would appear that the children and heirs of the late Mr. Nichols have not accepted, in any way, the succession of their father's estate, and as it would also appear that the deceased left no property available for the payment of the claim of the Intercolonial Railway, they are of the opinion that there would be no use in taking legal proceedings for the collection of the shortage in question.

I am, sir, your obedient servant,

The Auditor General. M. J. BUTLER, *D.M.*

Re **Canals Revenue, Arrears Due.**

AUDIT OFFICE, OTTAWA, January 28, 1907.

SIR,—On January 22, 1906, your attention was called to the large increase in the arrears due for hydraulic rents, during the five years then last passed, the increase in 1904-5 over 1903-4 having been $31,228.47.

The arrears due on June 30, 1906, though showing a decrease at some points, was in the aggregate $3,631.39 more than the year previous. The increases were principally at Carillon, Trent, Welland and Williamsburg canals.

In a letter from your secretary dated January 27, 1906, it was stated that the matter had been referred to the Department of Justice, in order that they might have the necessary steps taken for the collection of the arrears in question.

Notwithstanding this action the total amount of arrears has increased, although it may have led to the payment of some of the amounts due.

I presume you have had recent reports from the superintendents of the several canals, stating the reasons why the various amounts have not been collected and the prospects for their ultimate recovery.

In the case of present holders of leases, there should be no great trouble in collecting the dues, as in the event of refusal to pay, no doubt the lease contains provi-

sion for its cancellation, or in the event of a lessee having a counter claim, I think the superintendent should examine and report on the same and action be taken to procure an early settlement. If any portion of the arrears are uncollectable, steps should be taken for their early removal so as to prevent them from encumbering the records

I am, sir, your obedient servant,

The Deputy Minister of Rys. and Canals. J. FRASER, *A.G.*

DEPT. OF RAILWAYS AND CANALS, OTTAWA, February 4, 1907.

SIR,—I have to acknowledge the receipt of your communication of the 28th ultimo, relative to the arrears of hydraulic and other rents due to this department.

In reply, I have to say that reports are being obtained, some of which have been received and are being sent to the Department of Justice, for the necessary action, in the matter.

I am, sir, your obedient servant,

L. K. JONES, *Secretary.*

The Auditor General.

Re Civil Service Examination Fees.

AUDIT OFFICE, OTTAWA, June 18, 1907.

SIR.—The returns received from you to-day indicate that fees amounting to $2,935 were collected at the entrance examinations last November, $66 from the Excise promotion examination and $26 from the special promotion examinations—in all $3,027. A deposit was made in December last of $2,979; nothing since. That would show $48 short. Awaiting explanations.

I am, sir, your obedient servant,

The Secretary, Bd. C.S. Examiners. J. FRASER, *A.G.*

OTTAWA, June 20, 1907.

SIR,—Replying to your letter of the 18th instant, I find that in addition to the deposit of $2,979 in the month of December last there was also deposited on the 4th April the sum of $44., and that the duplicate and triplicate receipts issued by the Bank of Montreal were forwarded the same day to the Under-Secretary of State for transmission to the Department of Finance. Upon inquiry at the department to-day I am informed that through an inadvertence the triplicate receipt was left on file instead of being forwarded to the Department of Finance as required.

Notwithstanding this deposit there would appear from your letter to be a balance still due the Government of four dollars, which will be immediately deposited, together with the sum of four dollars fee collected for the special examination at Regina of Mr. Hawkins, which does not appear to have been reported.

I am, sir, your obedient servant.

The Auditor General. WM. FORAN, *Secretary.*

Re Board of Civil Service Examiners.

AUDIT OFFICE, OTTAWA, June 19, 1907.

SIR,—I have only recently received the vouchers of expenditure of the Board of Civil Service Examiners for the 9 months ended March 31 last.

From an examination of these vouchers I beg to submit the following observations:

Travelling expenses.—The hotel bills should be furnished.

Hamilton.—Two examinations were held at Hamilton, presumably one of them an Excise promotion. You paid for six days services for the one and five days for the other. Last year five days were charged for the entrance examination, and two for the Excise. There is a charge for repairs to lighting fixtures of the hall, $6.09—seemingly a strange charge.

Winnipeg.—The examiner charges for six days and it is extended $35, which you paid. The rent of hall cost $24; last year it was only $12.

London—No details given.

Regina—The examiner charges for two days extra for special examination of Mr. Hawkins.

Toronto.—Charles Rose was paid $20 for preparing desks, cartage, caretaker, &c., while there was no such charge in previous years.

Calgary.—Examiner charges for six days and $30 for six days rent of his law office. There were only 12 candidates; fees $50.

Ottawa.—There is a payment of $23.75 for the rent of 25 chairs and 80 tables. That calls for some explanation.

I am, sir, your obedient servant,

The Secretary, Bd. C.S. Examiners. J. FRASER, *A.G.*

OTTAWA, June 21, 1907.

SIR,—I am in receipt of your letter of the 19th instant, respecting certain items of expenditure in connection with the Board of Civil Service Examiners for the year ended the 31st March, 1907, and beg to reply as follows, taking up the several items in the order in which they are dealt with in your letter :—

Travelling expenses.—The travelling done by members of the Board in the past has been so limited that I have not thought it necessary that this requirement should be fulfilled, but now that you have called attention to the matter, I shall see that in future hotel bills are furnished as desired.

Hamilton.—The two examinations held at Hamilton were, as stated in your letter, an Excise Examination and the Entrance examinations. There is no record in this office of an Excise examination occupying less than five days. The examination held last year to which you refer as having occupied only two days was the regular promotion examination and not the Excise examination as you state. The examinations at Hamilton are held in the Post Office where of course no rent is charged the Board. The candidates having complained of the poor light at the Excise examination the sub-examiner undertook to have the lighting fixtures repaired, and I consider that the charge of $6.09 which he made for that purpose was a proper one to be paid by the Board.

Winnipeg.—Two examinations were held at this 'centre' in the month of November last. The first on the 7th and 8th, and the second on the 13th, 14th, 15th and 16th. The allowance for the first examination should have been $15 and for the second $25, making a total of $40. Instead I find that the sub-examiner was paid only $35, so that it cannot be held that the amount received by the examiner was out of the way. I presume the difference in the rent of hall is explained by the fact that the examinations were held on two different occasions.

London.—The account giving the details of this examination has evidently been mislaid. I shall endeavour to obtain a detailed statement from the sub-examiner at that centre, and furnish you with the same as soon as received.

Regina.—A special examination for Mr. Hawkins, who was unable to attend the regular examination on account of illness, was authorized by Order in Council, and was held on the 29th and 30th November, and this explains the two days extra charge by the sub-examiner to which you call attention.

Toronto.—In former years the examinations at this centre were held at the College of Physicians and Surgeons of Ontario, where desks and chairs were provided by the college authorities. This year it was necessary to hold the examination elsewhere, and Mr. Rose, who is an officer of the said college, agreed to have the desks and chairs supplied without charge providing the Board reimbursed him the cost of having them cleaned and brought to and from the place of examination. This was agreed to and explains the item of $20 paid Mr. Rose.

Calgary.—There were two examinations held at this point during the month of November last, the first on the 7th and 8th, and the second on the 13th, 14th, 15th and 16th of said month. The sub-examiner was accordingly allowed $30 for his services. I agree that the charge of $30 for the use of the room for the examinations is somewhat excessive, but I understand from the sub-examiner that he could not get accommodation for anything like the same money outside of his own office, and he considers the charge a fair and reasonable one in view of the charges usual in such cases at Calgary.

Ottawa.—The examinations in this city are held in the chambers of the Senate and of the House of Commons. It is also necessary at times to use room No. 16 of the House of Commons. This room has to be fitted up with desks and chairs, and in connection with the last examinations it was also found necessary to put a number of desks and chairs in the chambers of the Senate and of the House of Commons, and this explains the charge of $25 for the rent of 25 chairs and 80 tables. There were a number of chairs available in room 16, but no desks, and this is the reason of the discrepancy in the number of each article required by the Board.

I am, sir, your obedient servant,

The Auditor General. WM. FORAN, *Secretary.*

AUDITOR GENERAL'S REPORT
1906-07

Steamship Service Between Canada and Great Britain: Allan's Contract.

AUDIT OFFICE, OTTAWA, December 18, 1906.

SIR,—I have the honour to acknowledge the receipt of your letter of the 10th instant, making application for a cheque of $23,141 in favour of Messrs. H. & A. Allan, being a further amount allowed by the department for steamship service between Canada and Great Britain for the quarter ended September 30, 1906.

Before passing this claim I should like to have the various papers and documents sent you by the Messrs. Allan and upon which you base your calculations.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, December 19, 1906.

SIR,—In reply to your letter of December 18, I beg to send you herewith the original statements upon which we make up the Allan claim referred to. I would call your special attention to the fact that those logs are being constantly referred to by us for the minister; and we would like to have them back the very first moment possible. The typewritten statement inclosed for the September quarter may be retained.

I have the honour to be, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D.M.*

AUDIT OFFICE, OTTAWA, January 3, 1907.

SIR,—With further reference to your application of the 10th ult. for a cheque of $23,141 in favour of Messrs. H. & A. Allan, contractors for the weekly mail steamship service between Canada and Great Britain, being a balance which you have admitted due to them on the September quarter 1906 sailings, I beg to say that, in my opinion, the mileage agreed upon in the contract, between Canada and Great Britain for the purpose of the subsidy, having been made a provision of the contract, any payment otherwise calculated than in accordance with this provision should be authorized by the Governor in Council.

I have been informed that the steamers of the Canadian Pacific Railway line, employed by the contractors on this service are not giving as full a service, so far as passenger traffic from Canada to Great Britain is concerned, as the contractors' own steamers—that is, the two Empresses do not call at Halifax for the embarkation of passengers. It seems to me the contract calls for a uniform service, and that the provision in the contract to call at Halifax for the embarkation of mails should be interpreted so as to afford as great facilities to the port of Halifax as are given by the contractors' own steamers.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, January 7, 1907.

SIR,—Referring to your letter of the 3rd January, I beg to state, in connection with the first paragraph, that a recommendation was signed by the minister and sent to council to-day asking that 183 miles be added to each of the various distances as specified in the contract.

With respect to your second paragraph, the question as to the performance of the service at Halifax does not enter into the claims now before you for the quarter ended September 30, last. For your information, however, I beg to send you a copy of a letter addressed to the Deputy Minister of Justice, and a copy of his reply thereto, asking whether under the contract these steamships were obliged to call at Halifax or not.

Under the circumstances I would be glad if you would issue the cheque applied for as soon as possible.

I have the honour to be, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D.M.*

TRADE AND COMMERCE DEPT., OTTAWA, December 14, 1906.

SIR,—I am directed by the Right Honourable the Minister of Trade and Commerce to forward you herewith a certified true copy of the contract between the Canadian government and Messrs. H. & A. Allan, for steamship services between Canada and Great Britain, under date the 19th day of January, 1906.

Though the contract has been made with the H. & A. Allan line, the government has been officially advised that an agreement has been entered into between the Canadian Pacific Railway Company and the Messrs. Allan by which the two Empress steamships of the Canadian Pacific Railway line, that is to say, the *Empress of Britain* and the *Empress of Ireland* are to perform part of this service, and will practically come under the agreement entered into between the government and the Messrs. Allan.

I am now directed by the minister to ask the opinion of the Department of Justice as to whether the Allans are complying with the contract by permitting the Canadian Pacific Railway steamships to anchor and land passengers and mails at Halifax by tender instead of actually tying up at the wharf, and also whether these steamships specially referred to can be required to take on or discharge freight at Halifax.

I have the honour to be, sir, your obedient servant,

The Deputy Minister of Justice. F. C. T. O'HARA, *Private Secretary.*

JUSTICE DEPARTMENT, OTTAWA, December 27, 1906.

SIR,—Referring to your letter of the 14th instant, transmitting copy of a contract between the Canadian government and Messrs. H. & A. Allan for steamship services between Canada and Great Britain, dated 19th January, 1906, with reference to the arrangement existing between the Messrs. Allan and the Canadian Pacific Railway Company, and asking for an opinion as to whether the Allans are complying with the contract by permitting the Canadian Pacific Railway steamships to anchor and land

passengers and mails at Halifax by tender instead of actually tying up at the wharf, and also whether these steamships specially referred to can be required to take on or discharge freight at Halifax, I am to inform you that in the opinion of the minister (1) the steamships are not by the contract required to tie up at any wharf. It is sufficient for them to call at Halifax and land or receive the mails, and this, in the opinion of the minister, may be done by means of lighter or tender.

(2) The contract contains no requirements with regard to taking on or discharging freight at Halifax, and consequently the company is under no obligation in that respect.

Papers returned.

I have the honour, &c.,

F. C. T. O'Hara, Esq., Private Secretary, E. L. NEWCOMBE, *D.M.*

Minister of Trade and Commerce.

AUDIT OFFICE, OTTAWA, May 16, 1907.

SIR,—I beg to acknowledge the receipt of your application of the 14th instant for a cheque of $117,208.80 in favour of Messrs. H. & A. Allan, being the amount allowed by the department, under the terms of the contract dated January 19, 1906, upon their subsidy claim of $127,349.31 for the steamship service between Canada and Great Britain during the quarter ended March 31, last.

According to the detailed statement which you have sent me showing how the amount allowed has been arrived at, I notice that, in the case of the voyage of the steamer *Tunisian,* sailing from Liverpool on January 11, the average rate of speed is given as 13·17 knots per hour. The average called for by the contract is 15 knots per hour, so that the *Tunisian* on this trip falls below the average by 1·83 knots. Under clause 12 of the contract, a deduction of at least 35 per cent should be made from the amount specified therein for one round trip of the *Tunisian,* whereas only 15 per cent has been deducted. I shall be obliged if you will point out to me the clause of the contract under which the department is empowered to ignore clause 12 in this respect.

There are several other voyages during the quarter in which the department, after making all allowances, apparently, for heavy weather, &c., does not impose the full penalty prescribed in clause 12, and it seems to me, before I deal finally with the claim now before me, I should be able to satisfy myself that the department is within its rights under the contract, in the course it has taken.

As you are aware, in the case of the subsidy for this service for the December quarter, 1906, there were two supplementary claims, and in calling your attention now to the present claim I desire to avoid if possible any further claim being made, so far as the March quarter is concerned.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, May 17, 1907.

SIR,—I beg to acknowledge the receipt of your letter of May 16th in connection with the claim of the Messrs. H. & A. Allan for subsidy on the Canada-Great Britain steamship service for the quarter ended March 31, last.

In connection with the deductions I presume you received a copy of the statement showing allowances which were made by direction of the minister. During the winter months there are, as you know, heavy difficulties to encounter in the way of navigation besides delays which may be occasioned by fog and ice, and for this reason certain allowances were made by the minister, as indicated on the statement forwarded you with my letter of May 14.

I would point out that clause 32 of the contract reads as follows:—

'The minister shall at all times be the judge as to whether the terms of this contract have been or are being fully and faithfully carried out and complied with within the true intent and meaning thereof, and his decision in that respect shall be binding, final and conclusive.'

I have the honour to be, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D.M.*

AUDIT OFFICE, OTTAWA, May 22, 1907.

SIR,—I have the honour to acknowledge the receipt of your letter of the 17th instant in explanation of the amount allowed by the department to Messrs. H. & A. Allan ($117,208.80) under their contract of January 19, 1906, for the steamship sailings between Canada and Great Britain during the quarter ended March 31, last.

I received the statement of sailings to which you refer in your letter, in which the particulars of each round voyage, in accordance with clause 12 of the contract, are given, and upon which the amount to be allowed the contractors should be based, but, as you are aware, the amount which you have allowed is not based on the rate of speed as shown by this statement.

In some instances an arbitrary deduction of 15 per cent or 22½ per cent has been made instead of the deduction called for by the rate of speed shown to have been maintained by the steamers concerned during the voyages in question.

I have not been able to find in the contract any provision empowering the minister to depart from the provisions of clause 12 in regard to the deductions that may be made.

Clause 32 certainly gives the minister wide powers, but you will observe that the powers therein conferred are limited by the terms of the contract—'He shall be the judge as to whether the terms of this contract, &c., &c.'

It seems to me this clause, in view of the explicit provisions of clause 12, is not sufficient to enable him to make arbitrary deductions.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

NOTE by A.G.—Subsequently paid by order of the Governor in Council.

Steamship Service, West Coast of British Columbia.

AUDIT OFFICE, OTTAWA, November 26, 1906.

SIR,—I beg to acknowledge receipt of your application of the 21st instant for a cheque of $4,375, being a claim made by the Canadian Pacific Railway Company for steamship service on the west coast of British Columbia during the September quarter, 1906, under the terms of a contract dated September 14, 1906.

Clause 3 of this contract enumerates certain ports at all of which the steamer performing the service is obliged to call in order to entitle the contractors to the full subsidy, but according to the list of ports at which calls were made during the September quarter as given on the voucher sent me, the following ports, named in the contract, did not participate in the service: Aberdeen, Oceanic, Balmoral, Port Hardy, China Hat, Kitkatla, North Pacific Cannery, Dominion Cannery, Quathiaski Cove.

Please let me have your reasons for asking for the full quarterly subsidy, in view of the incomplete service rendered.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, November 28, 1906.

SIR,—I beg to acknowledge receipt of yours of the 26th instant, requesting the reasons for payment of full quarterly subsidy to the Canadian Pacific Railway Company for steamship services on the west coast of British Columbia for the September quarter, in view of calls not having been made at Aberdeen, Oceanic, Balmoral, Port Hardy, China Hat, Kitkatla, North Pacific Cannery, Dominion Cannery and Quathiaski Cove; and have to say that all the above with the exception of Aberdeen and Quathiaski Cove are new ports of call under the new contract which was only made in September last.

With regard to Aberdeen, this was a cannery which was burned some time ago, and the mails for that port are landed at Oceanic Cannery, which has practically taken its place.

Quathiaski Cove was a disputed call and was only agreed upon at the last moment, as it is stated to be positively unsafe for vessels any larger than the *Tees*. The controller of the railway mail service informs me that Quathiaski Cove was served by the Union Steamship Company by arrangement, and this was charged to the Canadian Pacific Railway.

In view of the above, and the fact that all the calls were made where possible, as required under the terms of the old contract for the September quarter, the new contract not being completed until November 23rd instant, it appears to me the subsidy is properly payable in full as requested. Hereafter the new contract will apply.

I have the honour to be, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D.M.*

AUDIT OFFICE, OTTAWA, November 29, 1906.

SIR,—I have the honour to acknowledge the receipt of your letter of the 28th instant, in explanation of your having asked for the full subsidy claimed by the Canadian Pacific Railway Company, for steamship service on the west coast of British Columbia during the quarter ended September 30, 1906, notwithstanding the fact that the required calls were not made at several of the ports enumerated in the contract.

I called your attention to the omissions in question because, though the contract was not completed, according to the copy sent me, until September 14, 1906, yet the first clause explicitly states that 'the contractors having prior to the first day of

July last, past, placed steamers necessary to properly perform the service hereinafter specified, &c.,' and, of course, I am obliged to treat the contractors' claim in accordance with their agreement under contract. However, in view of your explanations I have passed the claim.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

Steamship Service, St. John, Halifax and London, Eng., Cold Storage.

AUDIT OFFICE, OTTAWA, February 5, 1907.

SIR,—I beg to acknowledge the receipt of your application of the 1st instant, for a cheque of $12,000 in favour of Furness, Withy & Company, being the first instalment of the subsidy of $18,750 for a steamship service between St. John, Halifax and London, England.

Before certifying to the payment of the amount asked for I should like to be informed of the steps taken by the department in regard to the provisions of paragraphs 2, 3 and 4 of the contract. In these paragraphs the contractors bind themselves to provide steamers sanctioned by the minister, having suitable accommodation for carrying perishable cargo, such as fruit, dairy produce, &c.; certain apparatus for supplying fresh air, and in so far as one of the steamers is concerned, a refrigerating plant. Provision is also made for the proper arrangement in the hold of apples shipped in barrels and for the inspection and supervision of the loading and unloading of any fruit carried by the company's steamers.

Please send me the certificates or other communications which you have received respecting the contractors' compliance with these provisions.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commere. J. FRASER, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, February 5, 1907.

SIR,—I have yours of even date in *re* application made for a cheque in favour of Messrs. Furness, Withy & Company for subsidy for steamship service between St. John, Halifax and London; and note your request for further information as regards the provisions of paragraphs 2, 3 and 4.

In reply I beg to state that the steamers employed were such as were sanctioned by the minister as having suitable accommodation for the carrying of perishable cargo; and it is a well known fact that they were fitted out under the supervision of the Department of Agriculture with the necessary apparatus for supplying fresh air. As to refrigerating plant, I am not advised as to whether any of the vessels contained it or not. In any event refrigerating plant was not needed in connection with any cargo that they carried. As for inspection under terms of section 4, you will notice that they were subject to supervision of any officer appointed for that purpose, should the minister deem it advisable. The minister has not seen fit to appoint such an officer, in point of fact the Department of Agriculture has special supervision over that class

of goods; and had there been any lack on the part of the vessels of the necessary accommodation, undoubtedly this department would have been advised; but no complaints of any description were received during the year in connection therewith. The department can, therefore, only assume that everything was satisfactory.

I have the honour to be, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D.M.*

AUDIT OFFICE, OTTAWA, February 7, 1907.

SIR,—The Department of Trade and Commerce has made application to this office for the issue of a cheque of $12,000 in favour of Furness, Withy & Company, being a claim for subsidy for a steamship service between St. John, Halifax and London, England, during the six months ended December 31, 1906, performed by the steamers *Evangeline, London City, Almeriana, St. John City, Florence, Halifax City.* The contract under which this service is carried on calls for steamers 'fitted with suitable accommodation for carrying perishable cargo, such as apples or other fruit, dairy produce and other provisions, without deterioration; with holds and 'tween decks, provided with a thorough system of ventilation by means of the forced circulation of fresh air by electric or steam fans, in such manner as to secure a uniform cool temperature. The intakes for fresh air shall be protected by contrivances for that purpose similar to the "Gibbs" steamship ventilators, so as to be operated in all weathers without permitting water, spray or other dampness being taken into any places where cargo is carried, and such ventilating appliances shall be operated at all times when cargo is on board. At least one of the steamers so employed shall be equipped with a refrigerating plant for the forced circulation of cooled air through places where tender or early varieties of apples are carried; the space to be so cooled to be equal to from twenty-five thousand to forty thousand feet. Temperature to be maintained at between 50 and 55 degrees Fahrenheit'; also 'the steamers while employed on the contract service shall not carry in any hold or between any decks more than five tiers of barrels of apples or other fruit, except they be stowed in such manner and with such dunnage as will relieve any tier from the weight of more than four other tiers.'

I inclose you a copy of the correspondence that has taken place between the Department of Trade and Commerce and this office respecting the contractors' compliance with these provisions, and I shall be obliged if you will let me know the nature of the inspection and supervision exercised by your department in regard to the export of fruit, dairy produce and such other perishable cargo for the transportation and exportation of which the subsidy in question was evidently voted.

I should also like to have a certificate from the proper officer of your department that the steamers named are furnished in accordance with the provisions of the contract and, in so far as your department is concerned, that the subsidy has been earned

I am, sir, your obedient servant,

The Deputy Minister of Agriculture. J. FRASER, *A.G.*

AGRICULTURE DEPARTMENT, OTTAWA, February 27, 1907.

SIR,—I received in due course your letter of the 7th instant, in reference to the application of Furness, Withy & Company, for the subsidy for steamship service between St. John, Halifax and London, under the contract between them and the Crown,

by which among other things they undertook to furnish accommodation for perishable cargo, inclosing copy of correspondence between your office and the Department of Trade and Commerce in reference to the matter, and asking for a certificate from this department that the steamers named in the contract had sufficiently complied with its requirements to entitle them to the subsidy. Having referred the matter to the Dairy and Cold Storage Commissioner, I have received from him a report thereon of which the following is a copy:—

'Referring to the attached correspondence from the Auditor General in respect to the claim of Furness, Withy & Company, for a subsidy for the steamship service between St. John, Halifax and London, England, during the six months ending December 31, 1906, performed by the steamers *Evangeline, London City, Almeriana, St. John City, Florence* and *Halifax City,* I beg to submit the following statement:

'Since the first of September last a Dominion fruit inspector, under direction of this branch, has been in attendance at Halifax during the loading of each cargo of apples carried by the above named steamers, and has reported regularly to this office regarding the handling of the cargo and the manner of stowing in the holds. The discharge of these cargoes at London, England, has also been watched and reported on by the cargo inspector employed by the Department of Agriculture at that port. Thermographs have been placed in the holds of each of these steamers and the records show that satisfactory temperatures have been maintained throughout the voyage. No damage to cargo through lack of ventilation or other bad methods of handling or stowage has been reported by our inspectors. The steamships *Evangeline* and *St. John City* are equipped with Gibbs electric fans, but the other four steamers are fitted with ordinary cowl ventilators only. The reports show that none of the steamers in question are fitted with a 'refrigerating plant for the forced circulation of cooled air.'

Your obedient servant,

The Auditor General. GEO. F. O'HALLORAN, *D.M.*

Audit Office, Ottawa, February 28, 1907.

Sir,—With further reference to your application of the 1st instant, for a subsidy of $12,000 to the Furness, Withy Company for steamship service between St. John, Halifax and London, England, I beg to inclose for your information a copy of a letter which I addressed to the Department of Agriculture, and also a copy of the answer which I received to-day.

You will notice that the deputy minister states, on the reports of his officers, that none of the steamers of the company is 'fitted with a refrigerating plant for the forced circulation of cooled air,' and though the reports of the officers in question would indicate that otherwise the accommodation provided and the service rendered was up to the contract requirements, it seems to me some notice should be taken of the absence of this refrigerating plant, before payment of the subsidy claimed is made.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

Trade and Commerce Dept., Ottawa, March 2, 1907.

Sir,—I have yours of the 28th, further with reference to the application made for a cheque in favour of Furness, Withy & Company, for services between Halifax and London. I note the statement made by the Deputy Minister of Agriculture to effect

that none of the steamers running on the line during the period covered by the claim were fitted with refrigerating plant.

I also wrote some days ago to the agent of the company in Montreal, asking the direct question as to whether any vessel running on the service is fitted with refrigerating appliances, as required by the contract. I received a reply, as per copy herewith, in which you will note that he makes no direct answer to the inquiry. He states that there was positively no shipments of refrigerating cargo offered at Halifax, and in cases where they had steamers specially fitted for such cargo, there was no demand for such accommodation.

If such is the case, I do not see why we should continue to insist upon a large expenditure in providing refrigerating plant which is never used. You will note from Mr. O'Halloran's report that no complaints were made with reference to the carrying of fruit during the season, and that it was landed in good order, and that the vessels were fitted with the usual ventilating appliances, all that can be required for fruit. I may add that this department has received no complaints this season with reference to the service in question.

I have the honour to be, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D.M.*

MONTREAL, February 21, 1907.

DEAR SIR,—We have to acknowledge receipt of your favour of the 18th instant, in further reference to delay to payment of Halifax-London subsidy. We note the Auditor General is making inquiries as to the manner in which this contract has been carried out, especially with reference to provisions under clauses 2, 3 and 4. We are pleased to be able to state that we are aware of no complaint whatever in regard to this service during the past season, and we trust that none have been received by your department. We are giving a service all the year round in excess of the requirements of the contract, and especially in connection with the apple business, shipments have been arriving in a condition satisfactory to all concerned.

We are communicating with our Halifax office, however, to get their fullest information in connection with these matters, and also with regard to the refrigerator accommodation.

In the meantime we would remind you that when this matter was taken up before we ascertained definitely that there was positively no shipments of refrigerator cargo offering at Halifax, and in cases where we have had several of the steamers fitted up specially for this service, there was absolutely no demand for the accommodation.

Yours truly,

FURNESS, WITHY & CO.,

The Deputy Minister of Trade and Commerce. J. R. BINNING, *Manager.*

NOTE by A.G.—The subsidy was paid.

Steamship Service, North Shore of St. Lawrence River.

AUDIT OFFICE, OTTAWA, October 12, 1906.

SIR,—With reference to your application of the 10th instant for a cheque of $6,000 in favour of Holliday Bros., being the amount of subsidy claimed for the steam-

ship service on the north shore of the St. Lawrence during the quarter ended September 30, 1906, I beg to call your attention to the absence of any evidence on the voucher you have sent me that the necessary calls were made at the following ports by the steamer *Arranmore:* Point de Monts, Trinity Bay, Sheldrake, Thunder River, Long Point.

Please let me know your reasons for asking for the full subsidy in view of this apparent deficiency in the service called for by the contract.

I am, sir, your obedient servant,

F. C. T. O'Hara, Esq., J. FRASER, *A.G.*

Acting Deputy Minister, Trade and Commerce.

TRADE AND COMMERCE DEPT., OTTAWA, October 15, 1906.

SIR,—I have yours of the 12th in *re* application for a cheque in favour of Messrs. Holliday Brothers, for subsidy, and stating that no evidence has been furnished that calls were made at certain specified ports. In reply to this I beg to state that the only evidence that could be furnished would be that of the captain of the vessel, as there are no Customs officers at any of the points named.

I have the honour to be, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D.M.*

AUDIT OFFICE, OTTAWA, October 16, 1906.

SIR,—I have the honour to acknowledge the receipt of your letter of the 15th instant, with reference to the omission from the claim of Holliday Bros. for the subsidy asked for in your application of the 10th instant, of any evidence that the calls prescribed in their contract were made at certain ports named in my letter of the 12th instant, in which you say that, as there are no Customs officers at the ports in question, the only evidence that could be furnished is that of the captain of the steamer *Arranmore.*

You will notice that the captain gives a list of the ports at which the steamer called on the trips for which the subsidy has been asked; but that there is no mention of the ports to which I have referred. I presume, therefore, that the required calls were not made at these ports, and I should like to have your reasons for overlooking the omission, before passing your application for payment.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, November 2, 1906.

SIR,—Referring to yours of the 16th ultimo in *re* the claim of Holliday Bros. for subsidy for North Shore service, in which you pointed out that the captain gives

a list of the ports at which the steamer called on the trips for which the subsidy has been asked, but that there was no mention of those referred to by you, I immediately wrote Messrs. Holliday Bros., and am to-day in receipt of a reply, as per inclosed.

Possibly this information may be all that you may require. Perhaps it would have been better if they had sent a certificate from the captain to that effect; but he is not always get-at-able, being only a few hours at Quebec and most of the time en route.

If you are not satisfied with their letter, kindly advise me and I will get the captain's certificate.

I may add that during one of the trips referred to I was on board the *Arranmore*, and know personally that she did call at at least some of the places named; but could not state positively with reference to some of the others, as we passed part of that shore in the night.

I have the honour to be, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D.M.*

QUEBEC, November 1, 1906.

DEAR SIR,—Replying to your favour of recent date calling attention to the fact that there is no mention in our mail subsidy claim of our ss. *Arranmore* having called at Sheldrake, Thunder River, Long Point, &c., we beg to say that although these places were not mentioned in our claim as having been ports of call, the steamer did invariably call at all these places and others to land passengers and freight when any offering.

Trusting these explanations will be satisfactory,

We have the honour to be, dear sir, your obedient servants,

The Deputy Minister of Trade and Commerce. HOLLIDAY BROS.

AUDIT OFFICE, OTTAWA, December 28, 1906.

SIR,—With reference to your application of the 15th instant, for a cheque of $8,000 in favour of Geo. T. Davie and Sons, attorney for Holliday Bros., contractors for the steamship service between Quebec and certain ports on the north shore of the St. Lawrence river, being amount of their claim for subsidy to close of navigation, 1906, I beg to point out that the service performed during the year was not fully in accordance with the frequency of service called for by the contract, and in some instances ports of call named in the contract were seemingly ignored by the contractors.

I understand though that you have good reasons for allowing the full subsidy, notwithstanding the incompleteness of the service, and I would like to be informed of them before passing the claim now before me.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, December 29, 1906.

SIR,—I beg to acknowledge yours of the 28th instant, referring to the Holliday Bros. subsidy on the Quebec and lower St. Lawrence service to the close of navigation, and pointing out that the service performed was not fully in accordance with the frequency of the service called for by the contract, &c., and beg to say:

That the contract as originally made called for six trips per month, but in August last, authority was given by the Right Honourable the Minister of Trade and Commerce (under section 22 of the contract) for the dropping off of one trip per month, provided calls were made at Manicouagan; and during the months of October and November there was experienced in the gulf the worst season for over 30 years, causing all services to be seriously upset and regular schedules put out of business; in fact, the *Arranmore*, which extended her last trip below Natashquan with light-house supplies for the Marine and Fisheries Department was unable to return to Quebec, and had to put into Halifax for the winter.

The service for October being fully performed, and for November, as far as circumstances would permit, I am disposed to consider the full subsidy earned.

I have the honour to be, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D.M.*

Services of Mr. Buchanan, Supervisor of Lead Output at B. C.

AUDIT OFFICE, OTTAWA, September 12, 1907.

SIR,—I find on examination of the vouchers and cheques sent me in connection with the administration of the bounties on iron, steel and lead, &c., paid during the fiscal year 1906-7, that salary and travelling expenses to the amount of $2,136.60 were paid Mr. Geo. O. Buchanan to March 31, 1907, as supervisor of the output of lead at the British Columbia mines.

As there does not seem to have been any bounty paid on lead ore mined during last year, in consequence of the high price of lead in the English market, I should like to have some explanation of the continued employment of Mr. Buchanan, and the nature of the services he performed during last year.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, September 14, 1907.

SIR,—I have yours of the 12th, in which you refer to salary and travelling expenses of G. O. Buchanan as supervisor of lead in British Columbia, and pointing out that no bounty had been paid on lead during the year, and inquiring the nature of the service he performed during that time.

In answer I can only point out it is true that no bounty was paid during the year; but as the price of lead was fluctuating and might at any time reach a point where bounty would be payable, it was not thought advisable to break up the machinery and discharge Mr. Buchanan, although the services of the other man employed were dispensed with some months ago, it being considered that Mr. Buchanan could oversee the whole business until the expiration, under the terms of the Act, of the time under which bounty was payable. Under these circumstances it has not been deemed advisable to make any further change until the expiration of the time limit in June next.

I have the honour to be, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D.M.*

Re **Cullers' Fees.**

AUDIT OFFICE, OTTAWA, June 18, 1906.

SIR,—I have to call your attention to the large reduction in the receipts from cullers' fees, the amount to the end of May being $2,737.31 as compared with $8,218.62 for the fiscal year 1904-5. The expenditure for this service to the end of May was $12,147.04.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, June 19, 1906.

SIR,—I have yours of yesterday's date, calling attention to the large reduction in receipts from cullers' fees as compared with those for the previous fiscal year. In reply I beg to state that the same question was asked last year, and there can be but one answer. There are less fees collected because there is less timber to cull, and the culling of timber is fast passing away, and it will be but a short time before the fees will be at the vanishing point.

I have the honour to be, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D.M.*

Re **Grain Inspection, Manitoba, &c.**

AUDIT OFFICE, OTTAWA, April 13, 1907.

SIR,—I have received the returns of cars and cargoes inspected in the grain division of Manitoba during July, August, September and October.

Would it not be possible to render these returns more promptly; if not during each succeeding month, certainly not later than two months following the month covered?

I have also received a quantity of counterfoils, but in such a condition that it is not possible to compare them with the returns. They are being returned to your department.

The return for July reports as inspected, 3,062 cars and 3,329,550·35 bushels grain; and as weighed, 2,740 cars and 3,329,550·35 bushels grain. Seemingly all cars inspected are not weighed.

To be of use in checking these returns, each counterfoil should indicate whether inspection or weighing, its No., its date, the company for whom inspected or weighed, the quantity contained, and the class of grain; and the counterfoils appertaining to each month, with a summary of same corresponding with the return, forwarded with it.

The inspector should be asked to carry out these suggestions when making future returns.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. JOHN GORMAN, *for A.G.*

AUDITOR GENERAL'S REPORT
1906-07
